RISK MANAGEMENT

Interest rate risk

The group is exposed to interest rate risk since part of the loan is contracted at variable interest rates, while most of the assets are interest-free. Since the Group does not have significant assets that generate interest income, the Group's income and cash flows from business activities are not significantly dependent on changes in market interest rates. The Group's interest rate risk arises from long-term loans. Loans approved at variable rates expose the Group to cash flow interest rate risk. Loans approved at fixed rates expose the Group to fair value interest rate risk. The Group does not use derivative instruments for active protection against exposure to cash flow interest rate risk and fair value interest rate risk.

Credit risk

Credit risk arises from cash and cash equivalents, and receivables from customers. The Group's policies ensure that services provided to customers are billed in cash or via credit cards, and with deferred payment for those customers who have an adequate credit history. The Group protects itself from credit risk - the risk of collecting claims from customers with payment insurance instruments and by assessing the creditworthiness of customers. Currently, this risk cannot threaten the financial stability of the Group's companies.

Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations on time. Liquidity risk management is the responsibility of the Management Board, which has built a quality framework for monitoring short-term, medium-term and long-term financing and all requirements related to liquidity risk. The Group manages liquidity risk by constantly monitoring the forecasted and actual cash flow, comparing it with the maturity of financial assets and liabilities.

Market risk

Market risk is the risk that changes in market prices, such as changes in foreign currencies and interest rates, will affect the Group's income or the value of its financial instruments. The objective of market risk management is to manage and control exposure to market risk within acceptable parameters, optimizing returns. There were no significant changes in the impact of market risk on the Group, nor were there any changes related to the measurement and management of market risk.
