BOARD REPORT

Key messages

New circumstances and challenges related to the Russian-Ukrainian crisis and the still present negative effects associated with the COVID-19 pandemic, i.e., the reduction of tender activity during 2020 and 2021, had a negative impact on the operations of Dalekovod Group (hereinafter: the Group) for the first three months. Challenges related to the Russian-Ukrainian crisis further accelerated the already rising growth of prices of materials and raw materials and consequently increased inflationary pressures on other costs, which had a negative impact on the Group's profitability. Due to the mentioned circumstances and challenges, the Group initiated intensive activities in key markets, i.e., with key customers, in regulating existing activities and settling the difference based on increased costs.

Thus, at the Group level in the first quarter of 2021, operating income decreased by 37 percent compared to the same period last year and amounted to HRK 178.9 million. The parent company, Dalekovod d.d., had the most significant impact on the decline in the Group's revenues. (hereinafter: the Company) due to the termination of work on two projects in Ukraine and less activity in the Scandinavian countries and the company Dalekovod Ljubljana d.o.o. The expected activity level was lower than the previous year due to the final works on the Cirkovce-Pince 2x400kV project. On projects in Ukraine, the Company does not expect losses or negative impact on the Company's profitability due to the structure of contracts with investors where risks are minimized. The production segment generated revenues by 13 percent compared to the same period last year and amounted to HRK 37 million. Despite the growth of revenues in the production segment, there was a decline in profitability due to the above-mentioned circumstances related to the prices of materials and raw materials. Due to the high level of contracted business, the company Dalekovod Mostar achieved revenue growth in the amount of 24 percent in 2021 compared to the same period last year. Dalekovod Projekt d.o.o. and the company Dalekovod EMU d.o.o., due to reduced customer activity in the domestic market, recorded a decline in revenue compared to last year.

EBITDA of the Group in the reporting period amounts to -19.4 million, and the most significant impact on such realization is the previously mentioned circumstances related to the reduced tender activity of crucial customers due to the COVID-19 pandemic and challenges associated with the Russian-Ukrainian crisis in the context of solid growth of prices and other costs.

Following the recapitalization and payment of the total subscribed capital of HRK 410 million in cash in January 2022, on 11 February 2022, the Company settled its debts to creditors whose claims were determined by a pre-bankruptcy settlement. The total amount of settled claims at the Company level amounted to HRK 357 million. Consequently, the indebtedness indicators and the company's overall financial position and the Group as of 31 March 2022 significantly improved compared to the same period last year. Given the above, i.e., the elimination of capital inadequacies and limited financial opportunities, the implementation of the recapitalization will ensure continued development and greater resilience to external risk factors of the Company and the Group.

* In accordance with the international financial standards, the items in the profit and loss account and in the reports on the Group's and the Company's financial position in the previous period, i.e., in 2020 and in 2021, have been harmonised for financial impact of the mentioned transactions, i.e., the termination of business activity.

The Group's operating revenues in 2022 amounted to HRK 179 million and were lower by 37 percent compared to the same period last year, while the Company's operating revenues amounted to HRK 101 million and decreased by 50 percent compared to the same period the previous year. EBITDA (Calculated as follows: "Operating income - Operating expenses + Depreciation") at the Group level amounts to HRK -19.4 million, which is a decrease of HRK 34 million compared to the same period last year, while the EBITDA margin fell from 5, 1 percent in 2021 to -10.9 percent in 2022. An even more significant change in the context of declining profitability was recorded within the Company. EBITDA at the Company level amounts to HRK -21.8 million, which is a decrease of HRK 34 million compared to the same period last year, i.e., a reduction in the EBITDA margin from 5.9 -21.5 percent. The Group's

net profit in the first quarter of 2022 amounted to HRK -25.97 million and consisted of operating profit in the amount of HRK -26.1 million and profit from discontinued operations (related to the sale of the galvanizing segment) in the amount of 163 thousand. The Company's net profit amounted to HRK -27.8 million, which is a decrease of HRK 26.5 million compared to the same period last year.

This result was caused by the previously mentioned key events that marked the first quarter of 2022, i.e., the impact of the COVID-19 pandemic on the activities of investors and the challenges related to the Russian-Ukrainian crisis.

The overview of the Group's key segment business activities

During the first quarter of 2022, the Energy Sector (construction of transmission lines and substations) recorded a 58 percent drop in revenues compared to last year, with total revenues amounting to HRK 76.2 million. The profitability of both segments was significantly reduced due to the lower level of activity and the negative impact of rising prices of raw materials and other related costs. Reduced activity in the Scandinavian market had a negative effect on the revenues of the Dalekovod segment, and the cessation of work on two projects in Ukraine affected the revenues of the Transformer Sections segment. The transmission line segment, i.e., the high and low voltage department, is currently working on 22 large projects (two in Norway, 11 in Sweden, four in the region, two in Germany, and three in Croatia) and six smaller projects, and the substation segment on eight large ones (four in Croatia, one in Norway and one in Macedonia).

During the first quarter of 2022, several smaller projects in Croatia with a total value of HRK 35 million were contracted in the high and low voltage departments. The substation department acquired two projects in the first quarter of 2022 with a total value of HRK 21 million.

The Infrastructure sector recorded revenue growth of 8 percent compared to the same period last year, and total revenues this year amount to HRK 19 million. Most of the revenue came from the construction of the Dugo Selo-Križevci, Zaprešić-Savski Marof, and Vinkovci-Vukovar railways and the ventilation replacement project in the Učka tunnel. Currently, 14 projects are active, and works are underway on 11 construction sites. The sector's profitability has decreased due to the previously mentioned

circumstances, i.e., the growth of raw materials and supplies prices. The most important investors in this sector are HŽ Infrastruktura, Hrvatske ceste and Bina Istra.

During the first quarter, a lighting and EVP project was contracted for the client Cengiz in the amount of HRK 56 million. Another HRK 126-155 million potential contracts have been opened in the selection decision phase.

Production segment (Proizvodnja MK d.o.o. and Proizvodnja OSO d.o.o.) - by separating the company Proizvodnja MK and OSO d.o.o. into two companies, Proizvodnja MK d.o.o. and Production of OSO d.o.o. enabled more efficient implementation of different development strategies for each segment to increase the efficiency of both companies.

The company Proizvodnja MK d.o.o. During the first quarter, it produced/processed 947 tons, which decreased about 34 percent compared to the same period last year. The decline in quantitative indicators is due to high activity in the same period the previous year due to the project Cirokvce-Pince 2x400kV. Regardless of the recorded decline in the context of the amount of production or processing of materials, the operating income of the company Proizvodnja MK d.o.o. in the first quarter they were 13 percent higher than in the same period last year and amounted to HRK 20.4 million as a result of rising output prices.

The company Proizvodnja OSO d.o.o. During the first quarter, it produced/processed 277 tons, which decreased 20 percent compared to the same period last year. Due to the circumstances mentioned above, the decline in quantitative indicators is a consequence of reduced activities of key customers, including the parent company. Regardless of the recorded decline in the context of the amount of production or processing of materials, the operating income of the company Proizvodnja OSO d.o.o. in the first quarter they were 12 percent higher than in the same period last year and amounted to HRK 16.8 million as a result of rising output prices.

The realized EBITDA of the production segment, i.e., both companies, amounts to HRK -1 million and is lower by HRK 2.4 million compared to the same period last year.

The design segment related to the activities of Dalekovod Projekt d.o.o. Due to the reduced activity of customers in the domestic market, it recorded a decrease in operating revenues of 12 percent compared to the previous year, which amounted to HRK 7 million. Considering the decline in revenues, a decline in profitability was also recorded, and the slowdown in the dynamics of contracting new business was noticeable. Given the stable level of contracted work, the realization for the next period is ensured.

Dalekovod Ljubljana d.o.o. The company's EBITDA for the first quarter of 2022 amounted to HRK 5.3 million. In the first quarter of 2022, it generated HRK 42.3 million in revenue, of which HRK 33.4 million relates to the Cirkovce-Pince 2x400kV project. The reduced level of second-hand revenues is related to the reduced volume of work on the project, i.e., its imminent completion.

Dalekovod Emu d.o.o. operates at locations in Zagreb and Vela Luka and generated revenue of HRK 0.5 million, which is a decrease of 40 posts compared to last year. Its business performs activities in the segment of measuring and testing high and low-frequency electromagnetic fields and calibration of electricity meters in its calibration plant in Vela Luka. Calibration of electricity meters in the first quarter of 2022 is below the planned quantities, and significant calibration of electricity meters is expected in the second half of the year. The work in the segment of measuring and testing high and low-frequency electromagnetic fields for the first quarter of 2022 is in line with the planned quantities, and such dynamics are expected by the end of the year.

Dalekovod Mostar d.o.o. The company's EBITDA for the first quarter amounted to HRK 0.6 million. In the first quarter of 2022, it generated revenues of HRK 16.6 million, which is an increase of about 24 percent compared to the same period last year. Increased revenues result from slightly accelerated project implementation in the first quarter of 2022 and high levels of contracted work during 2021. The performance of these projects has slowed over the past two years due to the COVID-19 pandemic.

The significant improvement in the financial position of the Group and the Company was significantly influenced by the implementation of the recapitalization process. As previously mentioned, based on the Shareholders' Decision on the increase of the Company's share capital, HRK 410 million was paid, i.e., 41,000,000 new ordinary shares were subscribed with an individual nominal amount of HRK 10.00, and the Company's share capital was increased to HRK 412,471,930.00. . On 11 February 2022, the Company used the funds raised to issue new shares to settle its debts to creditors whose claims were determined by a pre-bankruptcy settlement. The total amount of settled claims based on principal and interest at the Company level amounted to HRK 357 million. Consequently, the indebtedness indicators and the company's overall financial position and the Group improved significantly.

In addition to the previously mentioned, the most significant changes in the financial position relate to changes in working capital; current assets decreased by 40 percent and current liabilities by 50 percent. The most significant impact on the reduction of existing assets is the previously mentioned use of recapitalization funds and payment of claims determined by the pre-bankruptcy settlement and following the decisions of the General Assembly held on 30 June 2022. The transaction in question also impacted a significant reduction in short-term liabilities.

Changes in the Financial Position and Business Results Report

The most significant business endeavours related to changes in the Financial Position and Business Results Report for quarterly reporting period of the issuer in relation to the last fiscal year are described in the Management Board's Report published with these financial reports.

Access to financial reports

The revised annual financial reports for the Company and the Group for 2021 have been published on the Company's website (www.dalekovod.hr) and the Zagreb Stock Exchange website (eho.zse.hr).

Accounting policies

The accounting policies of the Company and the Group that are applied when preparing the financial reports for 2022 are the same as the accounting policies that were applied in the annual financial report for 2021.

Business result

An interpretation of the business results of the Company and the Group is given in the Management Board's Report which is attached to these financial reports.

Contingent liabilities and commitments

As of 31 March 2022, the Group has concluded contracts whose performance has begun but has not been completed. The expenses yet to be incurred under these contracts are estimated at 829,071 thousand HRK.

As of 31 March 2022, the Group and the Company are exposed to contingent liabilities based on issued bank guarantees (as a payment security and the security of quality of performed works) in the total amount of 452,256 thousand HRK and 407,114 thousand HRK (as of 31 December 2021: 419,573 thousand HRK for the Group and 368,650 thousand HRK for the Company). The Company is additionally exposed as a co-debtor of subsidiaries regarding debt in the total amount of 37,939 thousand HRK (as of 31 December 2021: 43,515 HRK). The Group and the Company estimate that it is not certain that there will be a collection of contingent liabilities based on bank guarantees, given that the Group and the Company have fulfilled all contractual obligations based on projects, as in the previous periods.

During its regular course of business operation, the Group was involved in several disputes, either as a plaintiff or as a defendant. In accordance with the opinion of the Management Board and the legal advisor, a provision has been made for those disputes that will potentially result in losing a court case. In addition to disputes for which a provision has been made, there are also judicial disputes which, in the opinion of the Management Board and the legal advisor, will not result in losing a court case.

Income and expenses

All significant changes in the income and expenses of the Company and the Group are stated in the Management Board's Report which is attached to these financial reports.
