

Business results in the first eight months of 2026.

The results of operations for 8 months of 2026 continue the positive trends in the operations of enasolAuto doo and demonstrate the justification of expectations about operating income. August 2026 was a record-breaking month in all business segments.

	08/2025	08/2026
Total number of charges on Qelo and other chargers	5,698	15,164
Total energy delivered to Qelo and other chargers in MWh	142.87	475.41
Energy delivered at Qelo ultra-fast chargers in MWh	97.08	403.97
Income in €	105,106.08	295,392.69

All segments grew between two and three times, with the growth in energy delivered on Qelo ultra-fast chargers in MWh being 4.16 times higher than last year. Total revenues for July and August 2026 are higher than the total revenues generated in 2025.

Compared to the first eight months of 2025, enasolAuto doo, under which the Qelo brand operates, is recording strong growth in all key business segments.

	01-08_2025	01-08_2026
Total number of charges on Qelo and other chargers	27,318	60,266
Total energy delivered to Qelo and other chargers in MWh	581.14	1,606.52
Energy delivered at Qelo ultra-fast chargers in MWh	283.02	1,124.65
Income in €	376,000.87	957,154.42

The company confirms its revenue expectations in **the range of €1.2 million to €1.6 million.**

The Management Board would like to emphasize that expectations are based on existing business plans, and the realization of business plans largely depends on factors that are not necessarily under the control of the Company's management. Significant changes in the availability of financing may have an impact on the dynamics of realization of the speed of opening new locations and connections.

Qelo is a leading independent technology integrator and provider of green transformation services and electromobility business models in Croatia, with the ambition to soon become the same in most countries of Southeast Europe. The company is a startup, founded in 2021. The electricity in Qelo chargers is energy that comes from renewable sources. Through the unique "Qelo Card", it enables its clients, companies, individuals and others, to pay for charging services for all types of e-vehicles (cars, trucks, buses, etc.) at hundreds of thousands of locations in Europe. The company's goal is to make the transition to the electrification of transport simpler, more convenient and more appropriate to the needs of users. The company behind the Qelo brand is enasolAuto.
