

Preliminary business results in Q3 2026.

Business indicators after nine months confirm expectations for business development in 2026. Compared to the same period in 2025, enasolAuto doo, which owns Qelo brand has had another strong quarter and growth in all key business segments.

Compared to Q3 2026, all important indicators show significant growth. It is especially important to highlight **the 166% revenue growth** compared to Q3 2025.

Comparison Q3_2025 / Q3_2026		
	Q3_2025	Q3_2026
Total number of charges on our and other chargers	15,864	38,948
Total energy delivered at our and other chargers in MWh	382.73	1,182.84
Energy delivered by our ultra-fast chargers in MWh	240.08	972.12
Income in €	273,507.53	729,578.31

The overall results for the three quarters of 2026 are also positive. **Revenue growth is 157%, and the growth in delivered energy is 179%.**

Comparison of Q1-Q3_2025 / Q1-Q3_2026		
	Q1-Q3_2025	Q1-Q3_2026
Total number of charges on our and other chargers	31,501	70,155
Total energy delivered at our and other chargers in MWh	671.55	1,876.81
Energy delivered by our ultra-fast chargers in MWh	327.32	1,329.03
Income in €	435,058.73	1,118,221.96

There are primarily three main reasons for the growth in indicators:

- The implementation of the investment plan resulted in an increase in the number of filling stations
- The number of users has increased
- The market clearly recognizes Qelo as a leading brand.

In Q3 2026, enasolAuto doo **delivered 1 gigawatt hour** of energy to customers for the first time in its business history.

At the time of publishing this report, the Company would like to clarify its expectations regarding operating revenues. In previous announcements, revenue expectations were in the range of €1.2 million – €1.6 million, **but given the new data, the Company now expects revenues of €1.3 million – €1.5 million in 2026.**

The Company continues with investments and expansive business growth. At the end of Q3 2026, we installed 86 chargers. The Company expects to have another 30 chargers installed by the end of Q1 2027. The Company notes that the dynamics of investments also depends on external factors that the Company cannot influence.

Qelo is a leading independent technology integrator and provider of green transformation services and electromobility business models in Croatia, with the ambition to soon become a reality in most countries in Southeast Europe. The company is a startup founded in 2021. The electricity in Qelo chargers is energy that comes from renewable sources. Through the unique "Qelo Card", it enables its clients, companies, individuals and others, to pay for charging services for all types of e-vehicles (cars, trucks, buses, etc.) at hundreds of thousands of locations in Europe. The company's goal is to make the transition to the electrification of transport simpler, more convenient and more appropriate to the needs of users. The company behind the Qelo brand is enasolAuto.
