Collaboration between Ericsson Nikola Tesla and the Ministry of the Interior and the Ministry of Justice and Public Administration of the Republic of Croatia continues

Ericsson Nikola Tesla has signed new deals with the Ministry of the Interior and the Ministry of Justice and Public Administration of the Republic of Croatia worth approximately HRK 35 million in total.

In collaboration with companies Securitas Hrvatska and Hidraulika Promet, Ericsson Nikola Tesla and the Ministry of the Interior signed a contract related to continuing the implementation of "Green Borders" project. This project is aimed at establishing the surveillance of the state border in line with Schengen rules. The collaboration includes the equipping of the Ministry of the Interior's off-road vehicles with highly sophisticated video equipment which is connected to both the central national center and local centers for state border surveillance. In this area, in collaboration with Securitas Hrvatska, a contract for stationary systems was signed with the Ministry of the Interior as well. This contract is related to equipping additional locations with video equipment and software whose functionalities are in line with Schengen rules.

Ericsson Nikola Tesla and the Ministry of Justice and Public Administration of the Republic of Croatia signed a contract related to the services of improving, finishing and upgrading GAPA IT system as well as educating its users. The contracted activities include the development of an IT system which will provide support to process and quality management in public administration. The project aims to use services to improve the existing Single application system for the monitoring and control of administrative procedures (GAPA IT system) which collects data in order to improve the monitoring of administrative procedures and making decisions in public law bodies as well as removing unnecessary administrative procedures. The existing GAPA IT system will be improved by finishing the existing functionalities and adding new ones to the system, as proposed by primary system users.
