Ericsson Nikola Tesla signs new contracts

Ericsson Nikola Tesla signed a series of new contracts in the segment of digital transformation of society and in the field of expansion and modernization of communication solutions for business users in the amount of EUR 3.1 million.

Cooperation has been contracted with the Ministry of Tourism and Sport of the Republic of Croatia within the framework of the Croatian Digital Tourism - eTourism project. By developing and putting into operation mobile applications and the central portal, the public sector will be able to plan, implement and monitor tourism policies more effectively, while other stakeholders will be provided with faster, better quality and simpler operations.

Work continues on the modernization of the cadaster and land registry information system; contracts related to upgrading, maintenance and new measurements were signed with the Ministry of Justice and Public Administration (MJPA) of the Republic of Croatia and the State Geodetic Administration. The upgrade and maintenance of the Unified Information System for monitoring the implementation of the General Administrative Procedure Act and the upgrade and maintenance of the quality management system in public administration were contracted with the MJPA.

Part of the contracted work regards the health sector - we would like to highlight the continuation of the consolidation of the CEZIH health information infrastructure system with the Central State Office for the Development of the Digital Society.

The expansion and modernization of communication solutions for business users continues.

Communications Ericsson Nikola Tesla

Ericsson enables communications service providers to capture the full value of connectivity. The company's portfolio spans Networks, Digital Services, Managed Services, and Emerging Business and is designed to help our customers go digital, increase efficiency and find new revenue streams.
