### **SUBJECT: Information for investors and the public**

The catastrophic natural disaster in Bosnia and Herzegovina resulted in human casualties and extreme material damage, which, at this time, cannot be estimated or quantified.

The storm accompanied by extreme rainfall resulted, amongst others, in large-scale damage to the transport infrastructure that connects the port of Ploče with its users in the region. Given the extreme damage to the railway infrastructure around Jablanica and Konjic, railway traffic has been suspended. As a consequence, the delivery and shipment of cargo by rail to and from the port of Ploče has been suspended.

Given the extent of the damage, it is unknown when railway traffic will stabilize. As such, Luka Ploče d.d. cannot at this point in time estimate when the damage will be repaired and when railway traffic through the affected areas will commence again.

This outcome is the result of a catastrophic natural disaster which by its nature is unpredictable, extraordinary and unforeseen and could not have been avoided by Luka Ploče d.d..

Luka Ploče d.d. will, in these unforeseen circumstances, do everything possible to provide the best possible support to all its users.

**Luka Ploče d.d.**
