Impact of the Russian-Ukrainian conflict on the business operations

The crisis that arose at the back-end of February 2022 as a result of the Russian-Ukrainian conflict has caused a high level of volatility across global markets, the result of which has contributed to sizeable challenges across a wide range of factors: shifts in geopolitical and economic stability, volatility in the global supply chain and a negative impact on general humanitarian factors. The significant impact of the sanctions on Russia has already been recorded globally by means of significant increases in commodity prices and pronounced capital market volatility, which will continue to affect the global supply chain and purchasing power of legal and natural entities (e.g. through rising costs, supply/demand cycle challenges, rising inflation, etc...).

The Company does not conduct financial transactions through any Russian financial institution and has no financial exposure to same.

The throughput relating to Russian coal as per the Company's FY22 plan was anticipated to amount to less than 2% of the total planned throughput of the Company for the financial year. Despite this, the Company still realised an overall increase in throughput amounting to 78% to 30 June 2022 when compared to the same period in the prior year. No throughput relating to Russian goods has occurred to date in FY22.

The Company has assessed the associated risks as follows:

- ♣ Potential decline in the trading segment activities due to the imposed sanctions on the import of Russian coal/commodities. The Company intends to replace its planned quantities of Russian coal with other sources to the extent possible. The effect of such is very likely to lead to increased global demand for coal/commodities from non-Russian sources and as such will result in price increases for same.
- ♣ The overall impact on the total revenues and throughput of the Company cannot be assessed at this stage. The Company does not have access to customer information relating to customers' business activities with Russia and as such is unable to assess the effect of same on the business.
- An increase in the prices of transport, raw materials, energy and fuel, which is passed on to other costs.
- Given the significant increase in prices and compacted by logistical challenges faced, the Company has seen a siginficant rise in the request for upfont payments for goods and services from suppliers as well as a prolonged time period for delivery of the same. As a result, the Company has had to proactively plan and in detail for its current needs and for unforeseen circumstances while having to pay for these upfront. This impacts the liquidity of the Company and opens the need for additional financing. Management is actively assessing the market in order to better position itself in light of these new circumstances.

Trade receivables and the Company's liquidity outlook

Trade receivables as at 30 June 2022 amounted to 221 million kuna, which evidences an increase of 240% when compared to the same period in the prior year. 96% of the total trade receiveables are not yet due, of which 65% relates to trading goods not yet delievered.

Cash and cash equivalents decreased by 37% from 112.782 thousand kuna as at 31 December 2021 to 70.811 thousand kuna as at 30 June 2022. The Company invested its own resources to purchase trading goods while market instability impacted the significant rise in prices of commodities which has resulted in a greater need for cash and cash equivalents. As a result of all the aforementioned, the Company has raised short-term debt during the second guarter of 2022 amounting to 9.7 million Euro.

To date of this report the balance of cash has increased. The Company maintains a satisfactory level of liquid assets sufficient to meet all liabilities as they fall due.

The employee headcount has increased from 380 employees as at 30 June 2021 to 400 employees as at 30 June 2022. During June 2022, 26 new employees joined the Company. Employee costs have increased by 2% as compared to the same period in the prior year given the significant increase in work load and throughput (78% to date). As such, the average gross salary per employee has increased to 11.000 kuna in 2022. while the same amounted to 10.000 kuna in the prior year.

Contracted investments

The Company has contracted a new mobile port crane to the value of 4 million Euro. Expected delivery is anticipated in Q4 2022/Q1 2023. In addition the the aforementioned investment, the Company has contracted machinery and equipment to the value of 2,1 million Euro.
