Luka Ploče Group comprises: Luka Ploče d.d. ("Company"), Pomorski servis Luka Ploče d.o.o., Luka šped d.o.o and Pločanska plovidba d.o.o.

- The throughput for the period ended 31 March 2024 amounted to to 973,213 tons, evidencing a decrease of 17% in comparison to the same period in the prior year (2023: 1,175,098 tons). This is primarily attributed to a decline of 28% in bulk cargo throughput brought about by a decrease in the throughput of coal (40%) as well as pig iron and scrap iron (25%) when compared to the same period in the prior year. Although a total decrease was noted in bulk cargo throughput, an increase in throughput relating to coke and clinker was noted (comprising 16% of the total throughput in bulk cargo in 1<sup>st</sup> quarter). General cargo throughput evidenced an increase of 11% primarily attributed to the increase of throughput relating to steel coils. Liquid cargo throughput evidenced an increase of 6% when compared to the same period in the prior year.
- It is necessary to note that the Russian-Ukrainian crisis which emerged in 2022 has contributed positively to the Company's operations as a result of the disruption noted across global logistics flow chains and it continues to contribute positively during 2024 albeit to a lesser extent. The total throughput of the Company continues to evidence high growth when compared to the levels of throughput prior to the crisis (**25% growth** when compared to the same period in 2021 (2021: 780.564 tons)).
- Income from sales amounted to 8,342 thousand euro, evidencing an decrease of 2% in comparison to the same period in the prior year (2023: 8,518 thousand euro). Operating expenses excluding the cost of goods sold evidence a 4,35% growth in comparison to the same period in the prior year. This increase can be attributed to thegrowth in the staff costs and costs related to collective agreement (7%) which comprises 70% of total increase in costs when compared to the same period in the prior year.
- **EBITDA margin excluding the impact of trading** for the period ended 31 March 2024 amounted to **38%** while the EBITDA margin for the same period in 2023 amounted to 44%.

# The Russian-Ukrainian crisis and impact of sanctions imposed against Russia on the business

Taking into consideration the previous two years, we note that the Russian-Ukrainian crisis has contributed positively to the Company's operations as a result of the disruption noted across global logistics flow chains. Namely, intensified congestion was noted in the northern ports with the Black Sea being positioned close to the warzone. This resulted in a heightened increase in vessel insurance costs which further contributed to the growth in overall costs of logistics across that route, coupled with already prominent congestion present. Consequently, the challenges redirected additional business by means of driving additional throughput to the Company. This can be seen when comparing current period throughput to the period prior to the crisis - an **increase of 24%** in throughput was noted when comparing quarter 1 of 2024 to quarter 1 of 2021.

for the 1<sup>st</sup> quarter of 2024

# The Russian-Ukrainian crisis and impact of sanctions imposed against Russia on the business (continued)

The Group did not execute any financial transactions with any Russian financial institution and does not have financial exposure to same. There were no transactions with Russian goods during 2024, rather the Company substituted the same with American coal.

The Group has assessed the associated risks arising from the aforementioned as follows:

- Increase in the cost of transport, raw materials and supplies, energy and fuel (when compared to previous years before the conflict), which is further transferred to other costs.
- Given the significant increase in costs and compacted by logistical challenges faced, the Group has
  noted a significant increase in requests for advance payments by suppliers while the delivery time
  for receipt of goods from suppliers has been prolonged.

Although the above-mentioned risks still exist, a reduced inflationary pressure on the Group's operations compared to 2022 and 2023 has been observed (e.g. in terms of commodity prices). However, the pressure of heightened macroeconomic factors are still visible when considering the Group's operations and our clients' business.

The Group continues to maintain a satisfactory level of liquid assets sufficient to meet all liabilities as they fall due, and the need for additional short-term financing has not been noted in the prior and current year.

### Trade receivables, financial indebteness and the Group's liquidity outlook

**Trade receivables** as at 31 March 2024 amounted to **20.36 million euro**, which evidences an decrease of **9%** when compared to the same period in the prior year. **65%** of the total trade receiveables are **not yet due**, of which **29%** relate to **trading goods not yet dispatched**. 88% of overdue receivables have a maturity of less than 30 days.

Liabilities to banks are long-term in nature and amounted to 15,052 thousand euro on 31 March 2024. These relate to:

- HBOR loan which was contracted in 2018 at a fixed interest rate, amounting to 10.5 million euro.
- HPB loan, which was contracted at a variable interest rate linked to the EURIBOR and amounted to 4.4 million euro.
- Pločanska plovidba d.o.o. has a loan from PBZ with a variable interest rate which amounted to 190 thousand euro.

The Group has no other liabilities to banks.

**Cash** and cash equivalents **increased** by **12%** from 18,492 thousand euro on 31 December 2023 to **20,775 thousand euro** on 31 March 2024. There were no **irrevocable letters of credit** as at 31 March 2024.

The Group continues to maintain a satisfactory level of liquid assets sufficient to meet all liabilities as they fall due.

for the 1<sup>st</sup> quarter of 2024
