The completion of work on the project, which was planned for the beginning of June 2024, has been extended until the beginning of August 2024.

The hydraulic gantry crane for Terminal Bršica, worth €2.5 million, was supplied and delivered to the Terminal on April 8, 2024, and after installation of the crane and training of the workers, it started working at the end of May 2024.

Also, the overhaul of the 32 t coastal crane at Terminal Rijeka, started at the beginning of the previous year, is in the final phase, and in the first half of 2024, works worth €55,000 were carried out. Completion of the works is expected during July this year.

Renovation works of warehouse no. 9 at the Rijeka Terminal for the needs of the Maintenance Service workshops that were started in 2023, were completed at the beginning of 2024, and the total value of the project works is €871 thousand. ### ***The impact of the Russian invasion of Ukraine on the Company's operations***

The war in Ukraine and the sanctions imposed on Russia have an impact on the world economy, and therefore on the European and Croatian economy, and indirectly on the Company's operations. The largest EU economies have minimal GDP growth rates, so lower Croatian GDP growth rates are expected. Due to Russia's invasion of Ukraine and the interruption of the operation of their ports, there were significant disruptions of traffic routes through the ports of the Black Sea, as well as finding alternative traffic routes. The secondary effect of the conflict is visible in market disruptions in the supply of energy, disruptions in the food products market, and the growth of the inflation rate, which has an impact on the Company's operations, partly in the increase in operating costs. The company intends to continuously monitor costs, and with quick business decisions to influence the achievement of cost efficiency, which will result in more profitable operations.

### ***The impact of the Red Sea crisis on the Company's operations***

The Port of Rijeka, like all other ports in the world, is exposed to the action of a number of factors that can lead to a change in the direction of movement of ships, i.e. to a change in the flow of goods, which indicates the sensitivity of port systems and the great demands for the reorganization of entire logistics chains in order to enable smooth flow of goods.

Due to the crisis in the Red Sea, shipping companies are rerouting their ships via the Cape of Good Hope, which increases the ship's travel time and also increases freight rates. The aforementioned will have the greatest impact on container traffic, which is organized as liner maritime traffic. Container traffic accounts for 11% of the traffic of the Port of Rijeka and transshipment of different types of cargo enables the advantage of adaptation in unpredictable situations that may arise in the supply chain.

It is difficult to predict to what extent the crisis will affect business, it will certainly depend on the duration of the navigation restrictions and the willingness of all shippers to maintain the existing lines at the ports of call.
