The Company has 100% ownership in subsidiary Ljekarne Prima Pharme.

At the meeting of the Supervisory Board, which was held on 7 November 2023, the Management Board received approval to conduct an abbreviated termination of Primus nekretnine d.o.o. without liquidation. During 2024, Primus nekretnine d.o.o. ceased operations.

Pliva Hrvatska d.o.o., Zagreb owns 25.32% of the Company and has 26.41% of the voting rights. Given the share in the ownership and business transactions with the Company, Pliva Hrvatska has significant influence on the current operations of the Company.

Financial risks and exposure to price risk, credit risk, liquidity and cash flow risk

The most significant market risk for the Company is the long collection period for trade receivables, especially HZZO (Croatian State Health Insurance) related receivables. Therefore, a significant amount of working capital is not available, which strongly affects the cash flow of the Company and timely settlement of its liabilities.

As the receivables represent, directly or indirectly, amounts owed by state institutions, their collection should not be regarded as probable of default risk. This indirectly increases the need for additional funding, which means additional business costs.

Credit risk arises primarily from trade receivables. The risk is higher when dealing with privately owned pharmacies. Hospitals, on the other hand, have extended collection periods, but there is no risk of non-settlement.

A part of the Company's assets are interest-bearing assets, as a result of which its revenue and investing cash flows depend on fluctuations in market interest rates.

With the introduction of the euro as the official currency in the Republic of Croatia on 1 January 2023, the company's currency risk is significantly reduced.

The Company's interest rate risk arises from its short-term and long-term borrowings at variable rates. Variable-rate borrowings expose the Company to the interest-rate cash flow risk. Fixed-rate borrowings expose the Company to the interest-rate fair value risk.

Price risk arises from continuous decrease in the prices of prescription medicinal products on the HZZO list and administrative approach in determining the prices and margins of medicinal products. To lower this risk, the Company has focused on expanding the lines of products that are not limited by law in respect of the price of the product.

Regarding EU restriction measures, which refers to the consequences of exposure and the impact of the Russian invasion of Ukraine, Medika d.d. declares that it does not have a direct business relationship with entities from Russia or Ukraine, nor it is otherwise directly exposed to those entities in its business.

Nevertheless, the Company's Management Board estimates that a direct impact on the Company operations is possible due to the impact of the entire economy on global level, mainly due to the increase in the price of the energy products, both raw materials, interest rates and inflation that have increased further with the Russian invasion of Ukraine. Given the uncertain extent of the impact of the economy, the Company monitors developments and assesses the impact on business financial situation and cash flows.
