Financial risks and exposure to price risk, credit risk, liquidity and cash flow risk

Within financial risks, foreign exchange risk is significant. The Group realizes majority of its revenue on domestic market in Croatian kuna. The Group's purchase of goods is partly realised on the foreign market. The Group is therefore exposed to foreign exchange risk arising from various changes in foreign exchange rates mainly linked to the EUR. All borrowings are in Croatian kuna so the Group is not exposed to foreign exchange risk from this part.

The Group has part of assets which are interest-bearing so the Group's income and operating cash flows are dependent of changes in market interest rates.

The Group's interest rate risk arises from short term and long term given loans and borrowings with variable interest rates. Borrowings with variable interest rates expose the Group to cash flow interest rate risk. Borrowings with fixed interest rates expose the Group to the fair value interest rate risk exposure.

The Group does not use derivative instruments to actively hedge cash flow and fair value interest rate risk exposure. However, the Group continuously

16

monitors changes in interest rates. Various scenarios are simulated taking into account refinancing, renewal of existing positions and alternative financing.

Price risk arises from a continuous decrease in the price of HZZO's List of medicinal products and administrative approach in determining prices and margins of medicinal products. To lower this risk, the Group focused on increase of variety of products which are not limited by law in respect of the price of the product.

Majority of the credit risk relates to trade receivables. Credit risk is higher when dealing with private owned pharmacies. However, hospital have longer collection period, but there is no risk of unpayment.

The most significant risk within market risks is a long collection period of receivables, especially HZZO and HZZO related receivables. Therefore, a significant amount of working capital is not available what has an influence on cash flows and timely settlement of Group liabilities.

As these receivables are directly or indirectly related to the receivables from the State institutions, the collection of these receivables should not be classified as a collection of receivables risk. This increases the need for additional financing, which increases finance expenses.

The epidemic caused by the Covid-19 virus, which appeared in Croatia in March 2020, had no significant impact on the operations of the Group, both in 2020 and 2021 and in the first six months of 2022, and the Group did not use support provided by the Republic of Croatia to companies whose business was therefore compromised.

Regarding EU restriction measures, which refers to the consequences of exposure and the impact of the Russian invasion of Ukraine, Group declares that it does not have a direct business relationship with entities from Russia or Ukraine, nor is it otherwise directly exposed to those entities in its business.

Nevertheless, the Group's management estimates that an indirect impact on the Group's operations is possible due to the impact on the entire economy on global level, mainly due to the increase in the price of energy products, both raw materials, interest rates and inflation that have increased further with the Russian invasion of Ukraine. Given the uncertain extent of the impact on the economy, the Group monitors developments and assesses the impact on business, financial situation and cash flows.

Regarding EU restriction measures, which refers to the consequences of exposure and the impact of the Russian invasion of Ukraine, Group declares that it does not have a direct business relationship with entities from Russia or Ukraine, nor is it otherwise directly exposed to those entities in its business.

Nevertheless, the Group's management estimates that an indirect impact on the Group's operations is possible due to the impact on the entire economy on global level, mainly due to the increase in the price of energy products, both raw materials, interest rates and inflation that have increased further with the Russian invasion of Ukraine. Given the uncertain extent of the impact on the economy, the Group monitors developments and assesses the impact on business, financial situation and cash flows.
