

Management Board interim report for the temporary unaudited annual financial statements for 2022 Medika d.d. Zagreb

Management interim report

Comment on temporary unaudited unconsolidated financial statements for the fourth quarter of the year 2022

In accordance with the prescribed deadlines for submitting financial statements for the fourth quarter of the year 2022, Medika d.d. (the Company) has prepared temporary unaudited financial statements which present approximate balance sheet as at 31 December 2022, approximate profit and loss statement for the fourth quarter of 2022, approximate statement of changes in equity and approximate statement of cash flow. We point out that these financial statements are temporary and as such are not approved by the Supervisory Board. Furthermore, financial statements are unaudited and investors should not take them as a basis for their investment decisions, but they should merely use them as approximate info until the publishing of the final results, since there may be differences between temporary and final results.

Publishing of the final results (annual audited financial statements) for the Company and the Group is expected by 31 March 2023.

With the above stated, Management Board does not comment financial statements, but only presents key events for the Company in 2022.

Pliva Hrvatska d.o.o., Zagreb owns 25.32% of the Company and has 26.41% of the voting rights. Given the share in the ownership and business transactions with the Company, Pliva Hrvatska has significant influence on the current operations of the Company.

Financial risks and exposure to price risk, credit risk, liquidity and cash flow risk

Within financial risks, foreign exchange risk is significant. The Company realizes majority of its revenue on domestic market in Croatian kuna. The Company's purchase of goods is partly realised on the foreign market. The Company is therefore exposed to foreign exchange risk arising from various changes in foreign exchange rates mainly linked to EUR. All borrowings are in Croatian kuna so the Company is not exposed to foreign exchange risk from this part.

The Company has part of assets which are interest-bearing so the Company's income and operating cash flows are dependent on changes in market interest rates.

The Company's interest rate risk arises from received and given short term and long-term loans and borrowings with variable interest rates. Borrowings with variable interest rates expose the Company to interest rate risk from cash flows. Borrowings with fixed interest rates expose the Company to the fair value interest rate risk exposure.

The Company does not use derivative instruments to actively hedge cash flow and fair value interest rate risk exposure. On the other hand, the Company continuously monitors changes in interest rates. Various scenarios are simulated taking into account refinancing, renewal of existing positions and alternative financing.

Price risk arises from a continuous decrease in the price of HZZO's List of medicinal products and administrative approach in determining prices and

margins of medicinal products. To lower this risk, the Company focused on increase of variety of products which are not limited by law in respect of the price of the product.

Majority of the credit risk relates to trade receivables. Credit risk is higher when dealing with private owned pharmacies. On the other hand, hospitals have longer collection period, but there is no risk of unpayment.

The most significant risk within market risks is a long collection period of receivables, especially HZZO and HZZO related receivables. Therefore, a significant amount of working capital is not available which significantly influences on cash flows and timely settlement of Company's liabilities.

As these receivables are directly or indirectly related to the receivables from the State institutions, the collection of these receivables should not be classified as a risk of unpayment. This indirectly increases the need for additional financing, which increases finance expenses.

The epidemic caused by the Covid-19 virus, which appeared in Croatia in March 2020, did not have a significant impact on the company's operations in 2020., 2021. and in 2022 and the Company did not use support provided by the Republic of Croatia to companies whose business was therefore compromised.

Regarding EU restriction measures, which refers to the consequences of exposure and the impact of the Russian invasion of Ukraine, Company declares that it does not have a direct business relationship with entities from Russia or Ukraine, nor is it otherwise directly exposed to those entities in its business.

Nevertheless, the Company's management estimates that an indirect impact on the Company's operations is possible due to the impact on the entire economy on global level, mainly due to the increase in the price of energy products, both raw materials, interest rates and inflation that have increased further with the Russian invasion of Ukraine. Given the uncertain extent of the impact on the economy, the Company monitors developments and assesses the impact on business, financial situation and cash flows.
