### Plant Overhaul Completed

Petrokemija Plc completed the overhaul of its production plants which included the Ammonia, UREA, Water Processing, Power Plant, Sulphuric Acid, DEE, PEPI, KAN 1, AN/KAN 2 and NPK 1 plants within the planned deadlines.

During the overhaul, a new combustion air preheater of the primary reformer was installed at the Ammonia plant, representing a major investment worth around HRK 22 million.

The total cost of the overhaul, which also included the implementation of investments aimed at developments that will enhance the energy efficiency of the factory, is valued at HRK 90 million.

Production gradually resumed as of 8 February, whereby the ammonium citrate production will start after the completion of repairs on the AN/KAN 2 plant and comprehensive assessment of the plant's condition with regard to the damage caused by the earthquake.
