Notice pursuant to the Capital Market Act

### Planned shutdown of ammonia and urea production

Pursuant to the Rules of the Zagreb Stock Exchange Petrokemija Plc issues the following notice:

In the period from 28 May to 11 June 2021, the ammonia and urea manufacturing plants will be shut down. This planned shutdown will enable the optimisation of mineral fertilizer production according to market demand, as spring sowing and the period of intensive use of mineral fertilizers are almost over. It will also enable the necessary repair and maintenance of equipment, aimed at minimising the risk of unplanned shutdowns during the autumn season.

Other mineral fertilizer manufacturing plants operate as planned and sufficient quantities of all types of mineral fertilizers have been secured to maintain the supply of domestic and regional markets.
