3. Balance sheet as at 30.06.2022
4. Statement of profit or loss for the period 1.1.2022 – 30.06.2022
5. Statement of cash flow for the period 1.1.2022 – 30.06.2022
6. Statement of changes in equity for the period 1.1.2022 – 30.06.2022
7. Notes to the half year financial statements

MANAGEMENT REPORT

Erste Bank Croatia achieved positive business results in H12022, recording growth in total loans and deposits

Zagreb, 1 August 2022. – “We are happy with the results achieved in the first half of 2022. Positive indicators of business operations, exceeding the level of HRK 100 billion when it comes to the total assets of our local group, growth of total loans with a steady growth of deposits, the influx of new customers and increase in the number of users of our digital solutions — George on-line banking platform and KEKS Pay app — are factors influencing our optimistic outlook for the rest of the year, which also affirm that our business model is effective,” said **Christoph Schoefboeck**, CEO of Erste Bank Croatia, commenting on the business results achieved in the first half of 2022 and added: “Approval of Croatia’s entry into the European monetary union with the first day of next year is certainly one of the most important news that marked the year so far. Joining the eurozone will lead to further integration of the Croatian economy into the European financial and economic flows, positively increasing its competitiveness and attractiveness to investors, which will ultimately ensure further intensification of the process of convergence. At the same time, the demanding criteria that Croatia had to fulfil as part of the euro adoption process will positively contribute to the achievement of the basic objective — a high-quality and long-term sustainable position of the Croatian economy based on solid foundations.”

IN BRIEF

According to an unrevised unconsolidated financial report, which includes the results of Erste Bank Croatia (“the Bank”) excluding subsidiaries, the Bank’s net profit in the first half of 2022 amounted to HRK 745.0 million, which is 45.8% higher than HRK 511.0 million in the same period of 2021. Net profit growth is the result of a further reduction in risk costs and an improved operating result, supported primarily by growth in income from transaction operations in the post-COVID period and by positive trends in the trading segment. Net interest income increased by 0.7%, from HRK 811.0 million in the first half of 2021 to HRK 817.0 million in the same period this year. At the same time, the net fee and commission income increased by 24.3%, from HRK 218.0 million in the first half of 2021 to HRK 271.0 million in the same period this year. Net trading and fair value result in the first six months of 2022 reached HRK 154.0 million, 49.5% more than HRK 103.0 million in the same period a year earlier.

The Bank’s total assets at the end of June 2022 were HRK 92.3 billion, or 11.5% more than at the end of 2021, when it amounted to HRK 82.8 billion. Total loans to customers as of 30 June 2022 amounted to HRK 50.7 billion, 10.9% more than HRK 45.7 billion at the end of 2021. Total deposits of the Bank’s customers as of 30 June 2022 amounted to HRK 74.7 billion, which is 15.1% more than at the end of 2021, when they amounted to HRK 64.9 billion.

EBC Group’s¹ net profit before minority interests amounted to HRK 867.0 million in the first half of 2022, 42.6% higher than HRK 608.0 million in the same period in 2021. ECB Group’s net interest income amounted to HRK 1,002.0 million, compared to HRK 1,006.0 million in the first six months of 2021. Net fee and commission income amounted to HRK 396.0 million, 13.5% more than HRK 349.0 million in the first half of 2021.

EBC Group’s total assets at the end of June 2022 amounted to HRK 101.6 billion, which is 10.1% more than at the end of 2021, when it amounted to HRK 92.3 billion. Total loans to customers as of 30 June 2022 amounted to HRK 55.1 billion, which is 10.2% more than HRK 50.0 billion at the end of 2021. Total deposits from EBC Group’s customers as of 30 June 2022 amounted to HRK 77.6 billion, up 13.6% compared to the end of 2021, when they amounted to HRK 68.3 billion.

¹EBC Group’s consolidated financial statement includes the following subsidiaries in addition to Erste Bank Croatia: Erste Nekretnine d.o.o., Erste&Steiermärkische S-Leasing d.o.o, Erste Bank a.d., Podgorica, Erste Card Club, Erste Group IT HR d.o.o. and Izbor Nekretnina d.o.o.

GROWING DEMAND FOR NEW LOANS

Demand for new loans in the first six months of 2022 recorded positive trends and growth rates. In the retail segment, the Bank placed a total of over HRK 2.9 billion in new loans, which represents an increase of 22.0% compared to the same period of 2021.

The increase in new household placements was mainly driven by the growth of new housing loans, while the placement of new cash loans was at approximately the same levels as in the previous year. In the corporate segment, the Bank placed a total of over HRK 6.5 billion in new loans in the first six months of 2022, which represents a 22.0% increase compared to the same period in 2021. Most of the newly generated exposure in the corporate segment stems from financing clients from natural resources, construction, production of consumer products, hotels and real estate segments, whether micro, small or medium-sized clients. A very similar situation is present in the segment of large-size clients, where the increased exposure in the health care industry is additionally emphasized.

DOWNWARD TRENDS OF NPLs

In the first half of 2022, risk costs continued to decline, while the share of the Bank's so-called NPLs was additionally reduced from 6.7% at the end of 2021 to 4.3% at the end of June 2022. With respect to private individuals, the NPL share reached 5.7% at the end of June 2022, compared to 8.2% at the end of 2021. In the corporate segment, the NPL share was 3.2% in mid-2022, compared to 6.4% at the end of 2021. As a responsible business entity, the Bank will continue to monitor and manage its loan portfolio, in accordance with its business policies and applicable credit risk management standards, while respecting all regulatory rules and applying a balanced approach that takes into account the objective market situation and customer needs.

USE OF BANK'S DIGITAL SOLUTIONS ON THE RISE

The use of digital solutions of Erste Bank, George on-line banking platform and KEKS Pay app, has continued to grow in the first half of 2022. George online banking platform recorded a total of nearly 388 thousand users at the end of June 2022, 13.5% more than at the end of 2021, when there were about 342 thousand users recorded. The total volume of transactions in the first half of 2022 was about HRK 16.3 billion, 43.0% more than HRK 11.4 billion recorded in the same period last year. At the same time, KEKS Pay app recorded almost 279 thousand users at the end of June 2022, of which 76% are not the Bank's customers. Compared to about 233 thousand of users at the end of 2021, this is an increase of 19.7%. The total volume of transactions in the first half of 2022 amounted to HRK 387.3 million, which is an increase of 75.5% compared to the same period last year, when it amounted to HRK 220.7 million.

OUTLOOK

"After a prolonged period of gradual decline in interest rates, it was likely to expect a stabilisation of this trend in 2022, also influenced by inflationary developments, consequences of monetary policy stance and global geopolitical developments," Schoefboeck stressed and continued: "The recent reduction in regulatory cost, resulting from the accession of the Republic of Croatia to the eurozone, is certainly one of the components that will have a positive impact on the level of interest rates in the medium term and the overall lending conditions in Croatia. Among other benefits of integration into the monetary union, such as the practical elimination of currency risk and the contribution to reducing the risk premium, and bearing in mind the fact that the banking system in Croatia has already been highly liquid, the expected increase in interest rates in Croatia, especially in relation to some other European countries, should certainly be mitigated to some extent. However, in the short term, in the coming period, the level of interest rates will depend dominantly on the moves of monetary policy-makers in the segment of raising reference interest rates, notably the European Central Bank, in response to the current high inflation environment and the ensuing uncertainties associated with the conflict in Ukraine."

"It should be stressed that global factors, such as geopolitical risks, continuing problems in supply chains, strong inflation, and monetary policy responses, will also largely determine economic perspectives in the coming period. Nevertheless, membership in the monetary union, in addition to entering the so-called Schengen zone, will, I am convinced, place the Republic of Croatia on the map of the European Union as a fully integrated member which will make further progress in terms of economic growth and development in the coming period. With positive economic trends, stable public finances and the potential that lies in using EU funds under the Next Generation instrument, Croatia is looking towards the future with optimism. At the same time, continuous work on further improving the investment and legal security remains a fundamental precondition for long-term sustainable economic growth and development", Schoefboeck underlined.

Risk management

Risk management is a set of procedures and methods established for identifying, measuring, assessing, controlling and monitoring of risks, including reporting of risks to which the credit institution is or might be exposed to in its operations. The Bank is obliged to regularly measure and assess the risks identified in its business. Methods of measuring and assessing the risks must include appropriate quantitative and/or qualitative measurement methods and risk assessment that will enable the observation of changes in Bank's risk profile, including the emergence of new risks.

The most significant risks that affect Bank's business operations are credit, market, operational and liquidity risk, strategic, reputational and compliance risk, and transversal risks: macroeconomic, political, pandemic and ESG risk.

Credit risk is the risk of potential loss due to a debtor's non-payment of obligations towards the Bank, and it arises from the possibility that the Bank's credit claims and related fees and interest will not be repaid in the foreseen amount and timeframe. The Bank identifies, measures, follows up on, controls, i.e. actively manages the credit risk as one of the most important risks and determines the existence of appropriate capital level for covering of such risks. The most significant risks related to credit risk are: default risk, migration risk, currency induced credit risk, residual risk, credit risk concentration and model risk.

Market risks represent the risk of loss in open position stemming from the change in the movements of the market prices, including changes in interest rates, exchange currencies and prices of securities. The most significant risks that market risk includes are: interest rate risk and credit spread risk.

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events, and includes legal risk. Legal risk is considered as a secondary impact of operational risk and other risk categories, such as credit, market and liquidity risks ("source" risks), and it includes losses or other expenses triggered by the breach of rules resulting in legal proceedings or in other voluntary actions on behalf on the institution undertaken with the view to avoiding upcoming legal risk.

Operational risk definition excludes strategic and reputational risk. The Bank assesses the reputational risk for assessment purposes due to the strong links with the operational risk (e.g. most of operational risk events have a strong impact in terms of reputation).

Liquidity risk is a risk of loss stemming from an existing or expected inability of a credit institution to settle its monetary obligations upon maturity. Liquidity risk arises from maturity mismatch between assets and liabilities.

Strategic risk is possibility of adverse effect on the bank's financial result or capital due to absence of adequate strategies and adverse business decisions, or their inadequate implementation, changes in the business environment in which the bank operates or failure of the bank to adequately respond to these changes. Elements considered within strategic risk are business risk, capital risk and profitability risk.

Reputational risk is the current or prospective risk arising from negative perceptions on the part of customers, suppliers, stakeholders, the public or other relevant parties that, apart from the bank's reputation itself, can adversely affect the bank's share price, earnings, funds and liquidity.

Macroeconomic risk is the risk that the bank incurs losses due to adverse changes in the overall economy. It includes also a risk of severe shock that could result in such financial instability that will spread in all parts of financial system and to the extent that could have negative impact on the real economy.

Political risk is the exposure to a loss, caused by events in a particular country which are under the control of the government but clearly not under the control of an independent private enterprise or individual, e.g. expropriation, changes in regulatory/legal regime (incl. changes of banking regulatory regime defined by national or international authorities), war, terrorism and other political upheaval, which might have negative impact on the capital position or profitability of an institution (directly or indirectly through its clients).

Pandemic risk is possibility of adverse effect on the bank's financial result, capital or operations due to the impact of widespread infectious disease in humans on human health, economies, and communities. Pandemics are epidemics (occurrence of disease above an expected norm) that affect at least several countries on more than one continent.

ESG (Environmental, Social and Governance) risks arise as negative financial impact from the materialization of negative environmental, social or governance events. Environmental risks are those posed by the exposure to climate or environmental degradation related risk events, and they usually materialize through physical risk or damages, or through transitional risk creating additional costs and capital expenditure need, or in some cases damages through liabilities. Social risks are mostly those which materialize due to poor standards of respecting elementary rights, inclusiveness, or ineffective labour relations and unfair, untransparent or malleus customer practices. Governance risks are prominently those related to poor or untransparent company governance measures, missing or weak code of conduct including lack of substantiated policies on anti-money laundering, briberies and corruption, or tax citizenship.

Except above mentioned risks the Bank also manages all other risks that could affect their business operations such as: real estate risk, step-in risk, business risk of excessive leverage etc.

COVID-19

After the outbreak of the COVID-19 pandemic, the Group reacted adequately and promptly and adopted the recommendations of the Croatian National Bank and the EBA in its operations (in accordance with the CNB Circulars Reg. No. 180-020-19-03-20-BV and Ur.br.348-020-20-3-BV and EBA GL / 2020/02, i.e. Guidelines on legislative and non-legislative moratorium on loan repayments applied in the light of the COVID-19 crisis). In connection with the above, internal regulations have been adopted that regulate this area, whereby relevant clients are provided with measures to defer payment or new financing for liquidity purposes.

The Group has in accordance with the Erste Group Bank AG guidelines, identified certain industries and clients that have increased risk in accordance with the internal rating, where they are classified as increased risk clients (stage 2 clients). The Group actively monitors and reports on the loan portfolio related to the mentioned measures (covid-19 portfolio) and continues to monitor the development of the situation in the form of maintaining an adequate level of expected credit losses and appropriate classification into risk groups.

Ukraine War

The conflict in the parts of Eastern Ukraine which started in 2014 has not been resolved to date. In December 2021-January 2022, the news on the increased concentration of Russian military forces alongside the Russian-Ukrainian border started to raise concerns about possible Russian military intervention into Ukraine. In late February 2022, the conflict escalated with significant numbers of troops becoming more active in Ukraine and a state of emergency was declared in Ukraine. As of March, the sanctions against Russia were imposed by many countries of the Western world, aiming to respond to the gravity of Russia's violation of the sovereignty and territorial integrity of Ukraine, and grave human rights violations that have been committed in Ukraine and in Russia.

The evolving Russia-Ukraine situation does not impact the Group and the Bank directly. In cooperation with the Erste Group, the Group and the Bank have been adequately and actively monitoring the situation between Russia and Ukraine for several months and have no direct exposure to the state or to entities from Ukraine and Russia. Limits on Russian banks to which there is also no exposure at the Group and the Bank level (including local branches of Russian banks) have also been suspended. In addition, the Group and the Bank has identified clients on an individual level who could be indirectly more affected by the current situation, and there are no significant exposures in its portfolio in this regard either.

DECLARATION OF KEY PERSONNEL RESPONSIBLE FOR PREPARATION OF UNAUDITED FINANCIAL STATEMENTS

According to our best knowledge:

1. Shortened set of half year unaudited financial statements for Erste&Steiermärkische Bank d.d. and its subsidiaries prepared in accordance with appropriate standards of financial reporting of banks in Republic of Croatia gives complete and true state of assets and liabilities and financial result and affairs of Erste&Steiermärkische Bank d.d.
2. Management report contains true and fair view of affairs and results of Erste & Steiermärkische Bank d.d. and its subsidiaries

NOTES TO THE HALF YEAR FINANCIAL STATEMENTS (PFI)

Name of issuer: ERSTE & STEIERMARKISCHE BANK DD

OIB: 23057039320

Reporting period: 1.1.2022 - 30.06.2022

1. History and incorporation

Erste&Steiermärkische Bank d.d. (the Bank) was established in 1954 and was entered into the Court Register as a joint stock company on 24 January 1990. The Bank's registered head office is at Jadranski trg 3a, Rijeka, the Republic of Croatia. The Bank is a holding company for the Erste Bank Croatia Group (the Group) which has operations in the Republic of Croatia and Republic of Montenegro.

2. Significant Accounting policies

The half year financial statements are prepared in accordance with the Ordinance on the structure and content of periodic financial reports for issuers during the year prescribed by Croatian Financial Services Supervisory Agency, International Financial Reporting Standards, as well as the instructions from Annex V of the Commission Implementing Regulation (EU) No 680/2014 of 16 April 2014 laying down implementing technical standards with regard to supervisory reporting of institutions according to Regulation (EU) No 575/2013 of the European Parliament and of the Council.

The half year financial statements have been prepared in accordance with IAS 34 "Interim Financial Reporting" and do not include all the information and disclosures required in the annual consolidated financial statements. Therefore, the half year financial statements should be read together the Group's consolidated financial statements as of 31 December 2021 which are available on the Bank's official website.

CHANGE IN SIGNIFICANT ACCOUNTING JUDGEMENTS, ASSUMPTIONS AND ESTIMATES

When preparing the half year financial statements, management undertakes a number of judgements, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. The actual results may differ from the judgements, estimates and assumptions made by management, and will seldom equal the estimated results. Judgements, estimates and assumptions applied in the half year financial statements, including the key sources of estimation uncertainty, were the same as those applied in the group's last annual financial statements for the year ended 31 December 2021.

COVID -19

After the outbreak of the COVID-19 pandemic, the Group reacted adequately and promptly and adopted the recommendations of the Croatian National Bank and the EBA in its operations. In connection with the above, internal regulations have been adopted that regulate this area, whereby relevant clients are provided with measures to defer payment or new financing for liquidity purposes.

Regarding the Covid-19 pandemic uncertainties, the Bank will continue to follow the developments closely and will recognise any effects as the situation further unfolds.

3. Definition of the consolidated group

The Bank is a parent company of the banking group (the Group) which includes the following subsidiaries and associates consolidated in the financial statements:

Name of subsidiary	Ownership interest	Principal activity	Registered office
Erste Nekretnine d.o.o.	100%	Real estate business	Ivana Lučića 2A, Zagreb
Erste Bank AD Podgorica, Montenegro	100%	Credit institution	Arsenija Boljevića 2A, Podgorica, Montenegro
Erste Card Club d.o.o.	100%	Financial intermediation and services	Ulica Frana Folnegovića 6, Zagreb
Erste&Steiermärkische S-Leasing d.o.o.	50%	Financial and operating leasing	Zelinska 3, Zagreb
Izbor Nekretnina d.o.o.	100%	Real estate management and lease	Ivana Lučića 2A, Zagreb
Erste Group IT HR d.o.o.	80%	IT engineering	Jurja Haulika 19/A, Bjelovar
Name of associate			
Erste d.o.o.	45.86%	Management company for obligatory and voluntary pension fund	Ivana Lučića 2A, Zagreb

In June 2022, Erste card club d.o.o. sold its whole investment in Erste card d.o.o., Slovenia which was in Group consolidated financial statements for the financial year ending 31 December 2021 presented as a disposal group held for sale.
