Croatia osiguranje d.d.

Management Report for 2017

Insurance market of the Republic of Croatia in 2017

The insurance market in 2017 was extremely dynamic with a total increase of 4.5% (HRK +392 m), which is an acceleration of last year's premium market growth trends. Growth was recorded of all product lines, except casualties, where car casualties, loans and health insurance realised double-digit growth.

The total life insurance premium amounted to HRK 2.99 bn. The trend of switching from classic life products (HRK -23m) to those in which the policyholder is exposed to investment risk (HRK 66m) has continued, with total life insurance rising by 1.5% (HRK 46m).

The total non-life insurance premium in 2017 was HRK 6.2 billion. Motor vehicles account for almost half of total growth (HRK 159m), with motor vehicles accounting for 49% of total non-life insurance premiums. The drop in average price (HRK -7 / -0.7%) to HRK 922 is still under control, with the decline slowing down. The market had a growth of 73,000 new net policies, or 3.5%. Health insurance in total growth is accounted for by 25% growth (HRK 80m) and accounts for about 8% of total market premium. The rest relates to loans (HRK +42m) and fire insurance (HRK +46m).

CROATIA osiguranje d.d., Jagićeva 33, Zagreb (hereinafter: Company), is the leading company in the Republic of Croatia in life and non-life insurance with market shares of 33.6% in the non-life insurance segment and 17.9% in the life insurance segment. The total market share of companies based in the Republic of Croatia amounts to 28.5% and -0.6 p.b. is lower than in 2016, primarily due to a fall in transportation (fronting premiums, leasing) and a slight fall in the segment of motor vehicles.

Operating results and financial position of the Company and the Group

Company

Croatia osiguranje d.d. has been going through a transformation process since 2014. At the beginning, a financial restructuring was performed with a share capital increase amounting to HRK 840m, thus reaching a strong capital adequacy of 261 percent for the parent company based on no revised report. The organisational restructuring began in a situation where only about 23 percent of employees were in sales. By the end of 2017, this amount increased to 60 percent. The process continues, so that in the coming years there will be at least seventy percent of those who work in sales services and are directly oriented to the client. The sales part of the organisation has been restructured by reducing the number of organisational levels, and the sales structure is tailored to the specific market segments and is more focused on the client and the market, while the sales process itself has been significantly accelerated and digitised. A large number of products has been developed and improved, also including the price management system. The centralisation and automation in the process of claims processing has brought visible shifts. The process of restructuring the corporate culture is also going in the right direction. Measurement of the organisation's health, through the so-called OHI (Organizational Health Index) index shows positive changes in all of its elements, and key shifts were made in the area of innovation and knowledge sharing, customer orientation, and employee motivation. At the beginning of July, Croatia Croatia zdravstveno osiguranje d.d.merged with Croatia osiguranje d.d., and at the end of September regulatory authorities approved the acquisition of Cardif osiguranje by Croatia. This was followed by the previously defined process of organisational and market consolidation. A combination of stable and strong market positions, high organisational and cost effectiveness will enable long-term business sustainability.

The restructuring results are visible in the financial results. In 2017, Croatia osiguranje d.d. reported profit before tax in the amount of HRK 184.5m (profit after tax of HRK 150.9m).

Earned premiums amounted to HRK 2.158 million, which is an increase of 9%. The total gross written premium (before adjustments by the net increase in the provision for premium receivables and related write-offs) increased by 9% and amounted to HRK 2.463m. The written premium in non-life insurance amounted to HRK 1.930m, which is an increase of 11% compared to the same period last year.

The largest increase is recorded in loan receivables and health insurance, while the largest decline is recorded in transportation insurance due to the stowage effect. The written premium in life insurance amounted to HRK 534m which is at the level of the previous year.

In the non-life and life insurance investment business, revenues were realised in the amount of HRK 421m, which is 14% more than in 2016. Finance costs in 2017 have increased to HRK 168m.

Gross paid claims amounted to HRK 1.424m representing an increase of 2% compared to the same period in 2016.

Administrative costs amounted to a total of HRK 401m recording an increase of 19% compared to the same period in 2016. Acquisition costs amounted to a total of HRK 408 million recording an increase of 1% as a result of investments in sales.

Croatia osiguranje d.d.

The following is a summary of key business indicators in 2017 calculated on the basis of the report to HANFAs, but according to the formulas shown below:

| Key performance indicators | 31 Dec. 2015 | 31 Dec. 2016 | Change in p.p. |
|----------------------------|--------------|--------------|----------------|
| Claims ratio (non-life)* | 59,0% | 56,4% | -2,6 |
| Cost ratio (non-life)** | 44,3% | 42,8% | -1,5 |
| Combined ratio (non-life) | 103,3% | 99,2% | -0,6 |

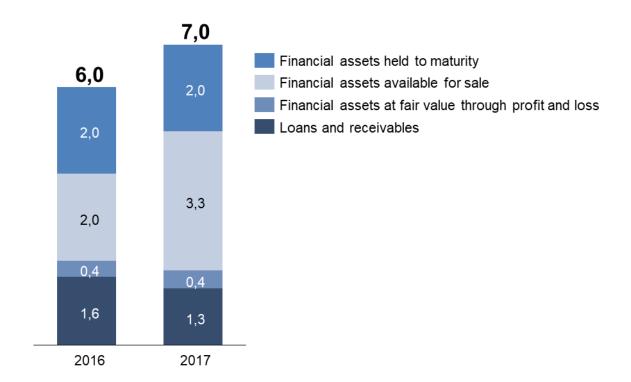

^{*} Claims ratio = (Income from commissions and fees + Other insurance-technical income + Net Claims incurred + Cost for premium returns + Other technical expenses) / Net Earned premiums

The combined ratio, as the indicator of success in non-life insurance in 2017, amounted to 99.2%, which is 4.1 percentage points better than in the same period of 2016. The claims ratio is better by 2.6 percentage points and amounted to 56.4%. The cost ratio amounted to 42.8% which is 1.5 percentage points lower than in 2016.

Total assets of the Company as at 31 December 2017 amount to HRK 9.7 billion, which represents an increase of 11.1% compared to 31 December 2016.

Technical reserves amounted to HRK 6.4 billion and are 7% higher than the technical provisions as of 31 December 2016.

The structure of investments (HRK billion)

^{**} Cost ratio = Acquisition costs and administrative expenses / Net Earned premiums

Croatia osiguranje d.d.

Group

In 2017, the CROATIA osiguranje d.d. Group (hereinafter: the Group) achieved consolidated profit after tax and non-controlling interest in the amount of HRK 253m.

In 2017, the total gross written premium (before adjustments by the net increase in the provision for premium receivables and related write-offs) at the Group level amounted to HRK 3.141m, which represents an increase by 4%. The gross written premium of non-life insurance amounted to HRK 2.502m which represents an increase by 5%, while gross written premium of life insurance amounted to HRK 639m which represents an increase by 2%.

Earned premiums in the reporting period amounted to HRK 2.720.1 m which represents an increase by 2,6% compared to the same period last year.

In the non-life and life insurance investment business, the Group generated income from investments in the amount of HRK 500m which represents an increase of 28%, with an investment cost of HRK 171m which represents an increase of 74%.

Gross claims in 2017 amounted to HRK 1.698m, which is a decrease of 3% compared to the same period last year.

Acquisition costs and administrative expenses amounted to a total of HRK 1.145m and represents an increase by 5.1% in which administrative expenses increased by 7,7%, and acquisition cost increased by 2,5%. The increase in acquisition costs and administrative expenses is the result of, among other things, business reorganization.

Total assets of the Group as at 31 December 2017 amount to HRK 11 billion, which represents an increase by 7% compared to 31 December 2016.

Technical provisions amounted to HRK 7.2 billion, which represents an increase by 5.7% compared to the technical provisions as at 31 December 2016.

Significant business events in the reporting period

The Croatian Financial Services Supervisory Agency, at a session of the Administrative Council held on 3 March 2017 issued a Decision on the basis of which it approved the company CROATIA osiguranje d.d. to merge with the company Croatia Lloyd d.d. As of 3 April 2017, CROATIA osiguranje d.d. merged with CROATIA Lloyd d.d.

On 28 June 2017, the Croatian Financial Services Supervisory Agency issued a Decision on the basis of which it approved the company CROATIA osiguranje d.d. to merge with CROATIA zdravstveno osiguranje d.d. As of 3 July 2017, CROATIA osiguranje d.d. merged with CROATIA zdravstveno osiguranje d.d.

On 24 May 2017, CROATIA osiguranje d.d. and BNP Paribas Cardif, France, have signed a purchase agreement, whereby CROATIA osiguranje purchased the 100 percent stake in BNP Paribas Cardif osiguranje. On 29 September 2017, the Croatian Financial Services Supervisory Agency issued a Decision on the basis of which it approved the company CROATIA osiguranje d.d. directly acquiring a qualifying holding of over 50% in the voting rights and the share capital of BNP Paribas Cardif osiguranje. On 18 October 2017 CROATIA osiguranje d.d. and BNP Paribas Cardif, France concluded a Share Transfer Agreement, whereby CROATIA osiguranje purchased the 100% stake in BNP Paribas Cardif osiguranje.

Significant events after the end of the financial year

Significant business events after the end of the year are described in Note 34. Events after the balance sheet date of the Consolidated and separate financial statements for 2017.

Expected development in the future

In 2017, real GDP growth was achieved in all quarters by the data available from the Central Bureau of Statistics. Growth in economic activity is also visible in the insurance market, which also grew by 4.5%. In view of the above, we expect the continuation of positive economic trends that have contributed to the growth of the insurance market and its growth in the last year. It is expected that the entire economy, including the insurance industry, will take advantage of a positive business environment and preconditions for approaching levels in developed markets in other EU countries.

In the long run, there is a high growth potential of the Croatian market. The per capita premium in developed European countries is about seven times higher than the average premium in Croatia. Neighbouring Slovenia has about a three and half times higher premium per capita compared to the Croatian market. This measure does not take into account the development of the country and therefore is a good indicator of the share of premium in the GDP. For example, the Croatian market has earned a premium in 2017 at 2.5 percent of the GDP. The Slovenian market is twice as large, and the European is three times larger than the Croatian insurance market. In addition to the relative size of the market, there is also a difference in the structure. In Europe, the premium structure is dominated by personal insurance, life and health, comprising between one-half and two-thirds of the premium.

The Company continues with continuous improvement in all business segments with the aim of strengthening the leading position on the Croatian market. Key business improvement activities include:

- Introduction of new products and improvement of existing ones according to customer needs
- Continued sales force strengthening activities with the aim of growth in the profitable retail segment and the segment of small and medium-sized businesses
- Further improvement in processes with the aim of providing the best customer service

In the forthcoming period, the goal is to continue the best practice of transferring operational excellence from the parent to subsidiaries in the region. New sources of growth in the future are combinations of organic and acquisition activities. New acquisitions are aimed at strengthening the insurance business and further development of healthcare offering in addition to using the synergies arising from the insurance offer.

Research and development activities

Customer focus and continuous innovations are the values of the Group that underlie research activities and new product development. The aim is to provide fast and quality service and increasing client satisfaction.

We conduct trends and developments in highly developed insurance markets with a focus on the EU. Also we conduct market research activities regularly with the goal of better understanding the existing market needs and creating products that will adequately respond to them. In this way, we connect the relevant worldwide insurance products with the needs of clients in Croatia. We also introduce new and innovative products that will ensure long-term growth and retaining the Company's leading market position.

During product development, our focus is on creating products with quality insurance coverage and on the service that we provide as a whole. Special emphasis is placed on quality and available service which will adequately cover risks with which our clients are faced. We monitor trends and continuously implement the latest technology solutions as well as numerous innovations to ensure customer satisfaction. Customer satisfaction is continually monitored and we respond to all challenges we face.

Company subsidiaries

As at 31 December 2017, the Company has one registered subsidiary (Subsidiary Ljubljana). In its legal transactions, the subsidiary operates under CROATIA osiguranje d.d. subsidiary Ljubljana, in Croatian language, and under CROATIA ZAVAROVANJE d.d. subsidiary Ljubljana, in Slovenian language.

Financial risk management

Financial risk management is described in Note 2.37. to the Consolidated and separate financial statements for 2017.

Other

In accordance with the statutory obligation and the permitted exemption pursuant to Art. 21. of the Accounting Act, the Company has prepared a nonfinancial report to be published as part of the annual financial report of the parent company Adris Grupa d.d.

During 2017, PwC provided non-audit services comprising a benchmark analysis service to Croatia osiguranje d.d.

Corporate Governance Statement

CROATIA osiguranje d.d., Vatroslava Jagića 33, Zagreb (hereinafter: the Company), applies the Corporate Governance Code, which was jointly adopted by the Croatian Financial Services Supervisory Agency (HANFA) and Zagreb Stock Exchange and is available on their web sites.

By applying the provisions of the Corporate Governance Code, Rules of the Zagreb Stock Exchange (which are available on its website), the Companies Act (Official Gazette 111/93, 34/99, 121/99, 52/00, 118/03, 107/07, 146/08, 137/09, 125/11, 152/11, 111/12, 68/13, 110/15) and the Capital Market Act (Official Gazette 88/08, 146/08, 74/09, 54/13, 159/13, 18/15, 110/15, 123/16, 131/17), the Company makes its operations and operating results transparent and accessible to the public. All explanations and possible deviations from the above rules are published by the Company in the Corporate Governance Code Annual Questionnaire which will be publicly available, for year 2017, on the website of the Company (www.crosig.hr) and on the website of the Zagreb Stock Exchange.

In order to take the necessary measures to achieve its business objectives, the Company has established a system of internal controls as a totality of elements: an adequate organisational structure, an implemented management system with the establishment of key and control functions, prescribed control activities for portfolio management, administrative and accounting procedures, security and adequate information system including a reporting system at all levels of the Company.

The system of internal controls in financial reporting ensures reasonable accuracy of financial statements in their presentation of financial results and the financial position of the Company, and their compliance with International Financial Reporting Standards.

The Company's accounting policies represent the principles, rules and practices that the Company applies in preparing and presenting financial statements. The Company's accounting policies are defined by a special Rulebook. A summary of significant accounting policies is disclosed in the Company's financial statements.

The internal accounting control procedures include the control of formal, substantive and computational accuracy of an accounting document:

- Control of formal accuracy of an accounting document determines whether the document has been prepared in accordance with applicable regulations,
- Substantive control of an accounting document determines whether the business changes actually occurred and in the range as indicated,
- Control of computational accuracy of an accounting document means the control of mathematical operations (division, multiplication, addition and subtraction), based on which the results are obtained in the document.

The control of accounting documents is carried out in accordance with the Company's organizational structure and internal regulations by a person holding authorisation to do so as defined in the internal documents of the Company. The organisational chart is located on the internal network and is available to all employees. The control of formal, substantive and computational accuracy is confirmed by a physical and/or electronic signature of the person who has signed it.

In accordance with the provisions of the Insurance Act, the Company has formed an internal audit function at the highest organizational level which structurally reports directly to the Management Board and functionally to the Audit Committee and the Supervisory Board. Activities of the internal audit function are based on the work plans adopted by the Supervisory Board following a positive opinion of the Management Board. The internal audit function analyses and evaluates the activities

Croatia osiguranje d.d.

of the Company and provides expert advice, recommendations and advice on controls. Internal audit assists the Company in meeting the set goals by introducing a systematic and disciplined approach to assessing and improving the effectiveness of risk management, control and corporate governance.

The Company has established a risk management function in the form of an independent organisational unit directly answerable to the Management Board. This function established a risk management system consisting of a set of internal acts, procedures and methodologies to identify, estimate or measure, control and report risks. The risk management system is regularly being improved in accordance with best market practices and the requirements of external regulations. More detailed information on risk management can be found in the Notes to the financial statements.

In accordance with the Insurance Act, the Company has formed an effective compliance function which includes advising and reporting to the Management Board and Supervisory Board on Company compliance with the Insurance Act and other regulations governing the operation of an insurance company, carrying out an assessment of the possible impact of changes in the legal environment on Company operations, and determining and assessing compliance risk.

The Company has established an effective actuarial function that according to the Insurance Act coordinates calculation of technical reserves, ensures the appropriateness of methodologies and models, evaluates the adequacy and quality of data needed to evaluate technical reserves, compares the assumptions and experience, and gives its opinion to the Management Board and Supervisory Board about calculating technical reserves, insurance risk takeovers, the appropriateness of the reinsurance program and participation of actuarial function in the implementation of the Compnay's risk management system.

In accordance with the Insurance Act, the Company has appointed a certified actuary who verifies data, methods and underlying documents for the calculation of technical provisions according to accounting regulations, and whether the technical provisions and premiums are designed to enable a permanent fulfilment of all Company obligations under the insurance or reinsurance contract regarding which the actuary provides an Opinion and Report to the Management Board and Supervisory Board.

Under the Insurance Act, the Company applies internal control systems to companies of the Group involved in the insurance part of business, while the companies concerned apply systems of internal controls in accordance with its legal framework.

Significant direct holders of shares in the Company are:

- Adris grupa d.d. with a share of 66.1% and
- Restructuring and Sales Centre of the Republic of Croatia, with a share of 30.6%.

On the website of the Central Depository and Clearing Company there is data available on the 10 largest shareholders.

According to the Company's current Articles of Association, the limitation of voting rights of shareholders or partial restriction of voting rights does not exist.

The Company's Management Board, according to the Articles of Association, consists of at least three (3) and a maximum of seven (7) members, one of whom is the President of the Management Board. The Company's Management Board had 5 members at 31 December 2017.

The right to appoint individual members of the Supervisory Board are set out in Article 24 of the Articles of Association in favour of the Republic of Croatia and employees of the Company. In accordance with the provisions of the Articles of Association, and in connection with the provision of Article 256, paragraph 3 of the Companies Act, the Republic of Croatia has the right to directly appoint two (2) members of the Supervisory Board, as long as it holds at least 25% of the Company's ordinary shares plus one ordinary share; however, as long as it holds at least 10% of ordinary shares of the Company, pursuant to the same statutory provisions, and in connection with the provision of

Croatia osiguranje d.d.

Article 256 paragraph 3 of the Companies Act, the Republic of Croatia has the right to directly appoint one (1) member of the Supervisory Board. One (1) member of the Supervisory Board is appointed by the work council of the Company, i.e. by employees, through direct and secret elections in the manner prescribed for the election by the work council, and they are entitled to this right as long as the conditions prescribed by the Labour Act are met.

The Articles of Association can be changed at the General Assembly in accordance with the provisions of the Companies Act, while the Supervisory Board is authorised to amend the provisions of the Articles of Association based on the decision of the General Assembly to the extent that the these amendments are of an editorial nature.

The members of the Management Board and the Supervisory Board are not shareholders of the Company.

The Company does not own treasury shares, and the General Assembly did not authorise the Company to acquire treasury shares.

The General Assembly, in accordance with the provisions of the Articles of Association, makes decisions by public voting at meetings convened usually by the Management Board and by the Supervisory Board only when it deems this necessary for the benefit of the Company. The powers of the General Assembly are governed by the Articles of Association and they do not deviate from the powers that the General Assembly of a public limited liability company has under the Companies Act. A shareholder is entitled to attend and vote at the General Assembly only if it informed the Management Board in writing of their participation no later than six days before the General Assembly.

The bodies of the Company are the General Assembly, the Supervisory Board and the Management Board.

The General Assembly comprises all of the shareholders of the Company.

Members of the Supervisory Board are:

Ante Vlahović President until 12 June 2017
 Mladen Blažević Vice President until 10 May 2017
 Branko Zec Member until 15 April 2017

Roberto Škopac
 Member since 22 April 2014, President since 21 June 2017

• Josip Tica, PhD, Professor Member until 12 June 2017

• Vitomir Palinec Member

• Petar Miladin, PhD, Professor Member since 12 June 2017

Hrvoje Patajac
 Member since 12 June 2017, Vice President from 21 June

2017 until 26 October 2017

Mima Kurilić Janušić
 Member since 12 July 2017

• Željko Lovrinčević, PhD, Member since 19 September 2017, Vice President from 26

October 2017

Members of the Management Board are:

Damir Vanđelić President
 Nikola Mišetić Member
 Marijan Kralj Member
 Robert Vučković Member
 Miroslav Klepač Member

• Sanel Volarić Member (until 31 January 2017)

The Supervisory Board established an Audit Committee.

Members of the Audit Committee are:

| • | Hrvoje Patajac | President |
|---|-------------------------------|--|
| • | Vitomir Palinec | Member |
| • | Roberto Škopac | Member until 26 October 2017 |
| • | Petar Miladin, PhD, Professor | Member until 21 June 2017 |
| • | Josip Tica, PhD, Professor | Member until 21 June 2017 |
| • | Marko Pokrajac | Member since 21 June 2017 (member until 29 January 2018) |
| • | Aleksandar Radulović | Member since 21 June 2017 (member until 29 January 2018) |
| • | Željko Lovrinčević, PhD | Member since 26 October 2017 |

During 2017, the Company actively implemented measures to promote gender equality at the Company's overall level. The focus was placed on equal terms in terms of sex and age in the tendering process for new employment as well as internal redistribution of workers. Equal criteria were also applied to the recruitment of employees in the management positions of the Company, where continuous progress is being made. There are also no differences in wages for the same level of work or work of equal value. On all levels we are recording equal representation of experts regardless of sex and age parameters. With respect to the professional criteria, the Company applies the strategy of recruiting and developing the management functions of the appropriate profession and level of education in relation to the nature of the function and its requirements. The Company also continuously carries out education and training of employees for the purpose of further improvement and development of competencies.

Responsibility for the financial statements

The Management Board of the Company is obliged to prepare separate and consolidated financial statements for each financial year which give a true and fair view of the financial position of the Company and the Group and the results of their operations and cash flow, in accordance with applicable accounting standards, and is responsible for keeping proper accounting records so that it can, at any time, enable the preparation of financial statements. The Management Board has a general responsibility for taking such steps as are reasonably available to safeguard the assets of the Company and Group and to prevent and detect fraud and other irregularities.

The Management Board is responsible for selecting suitable accounting policies that are in accordance with the applicable accounting standards and then apply them consistently; adoption of reasonable and prudent judgments and estimates; and preparing the financial statements on the going concern basis unless it is inappropriate to presume that the Company and the Group will continue in business.

The Management Board is responsible for submitting the annual report of the Company and the Group, which includes the annual financial statements, to the Supervisory Board, following which the Supervisory Board should approve these for submitting to the General Assembly for acceptance.

The separate and consolidated financial statements which are presented on pages 28 to 156 as well as the forms, prepared in accordance with the *Ordinance on the form and content of financial statements and additional reports of insurance and reinsurance companies (Official Gazette 37/16)* adopted by the Croatian Financial Services Supervision Agency, as presented on pages 157 to 181, were approved by the Management Board on 26 April 2018 and submitted for issue to the Supervisory Board. In acknowledgment, the financial statements are signed by the Company's authorized persons, as follows.

Independent auditor's report To the Shareholders and Management Board of Croatia osiguranje d.d.

Report on the audit of the separate and consolidated financial statements

Our opinion

In our opinion, the separate and consolidated financial statements give a true and fair view of the separate and consolidated financial position of Croatia osiguranje d.d. (the Company) and its subsidiaries (the Group) as at 31 December 2017, and of its separate and consolidated financial performance and separate and consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

Our opinion is consistent with our additional report to the Audit Committee.

What we have audited

The separate and consolidated financial statements of the Company and the Group comprise:

- the separate and consolidated statements of financial position as at 31 December 2017;
- the separate and consolidated statements of comprehensive income for the year then ended;
- the separate and consolidated statements of changes in equity for the year then ended;
- the separate and consolidated cash flow statements for the year then ended; and
- the notes to the separate and consolidated financial statements, which include significant accounting policies and other explanatory information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the separate and consolidated financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company and the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code). We have fulfilled our other ethical responsibilities in accordance with the IESBA Code.

To the best of our knowledge and belief, we declare that we have not provided to the Company non-audit services that are prohibited under Article 5(1) of Regulation (EU) No 537/2014. The non-audit service that has been provided to the Company and the Group in the period from 1 January 2017 to 31 December 2017 is disclosed in the Management Report.

PricewaterhouseCoopers d.o.o., Heinzelova 70, 10000 Zagreb, Hrvatska T: +385 (1) 6328 888, F:+385 (1)6111 556, www.pwc.com/hr

Our audit approach

Overview

Materiality

- Overall materiality for the separate financial statements of the Company: HRK 25 million, which represents 1% of Gross written premium.
- Overall materiality for the consolidated financial statements of the Group: HRK 30 million, which represents 0.95% of Gross written premium.

Group scoping

- In establishing the overall approach to the group audit, we determined the type of work that needed to be performed by us, as the group engagement team, and component auditors operating under our instruction. Where the work was performed by component auditors, we determined the level of involvement we needed to have in the audit work at those components to be able to conclude whether sufficient appropriate audit evidence had been obtained as a basis for our opinion on the Group financial statements as a whole.
- Our audit scope addressed almost 100% of the Group's absolute value of profit after tax and 99% of the Group's absolute value of total assets.

Key Audit Matters

- KAM 1 Estimation of technical provisions
- KAM 2 Valuation of investment property and property for own use

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the separate and consolidated financial statements. In particular, we considered where management made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. We also considered the risk of management override of internal controls, including among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

Materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance whether the separate and consolidated financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the separate and consolidated financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall group materiality for the separate and consolidated financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

| Overall separate and group materiality | The Company: HRK 25 million The Group: HRK 30 million |
|---|--|
| How we determined it | The Company: 1% of gross written premium The Group: 0.95% of gross written premium |
| Rationale for the materiality benchmark applied | We chose gross written premium as the benchmark because it is the benchmark against which the performance of the Company and the Group is measured, in terms of both its market share and customer base. |

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the separate and consolidated financial statements of the current period. These matters were addressed in the context of our audit of the separate and consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter

Estimates used in calculation of insurance contract liabilities and Liability Adequacy Test (LAT)

Refer to note 2.21 "Summary of significant accounting policies – Technical provisions" and note 25 "Technical provisions".

The Group and Company had technical provisions of HRK 7.2 billion and HRK 6.4 billion, respectively, at 31 December 2017 representing 90% of the Group's total liabilities (Company: 90%). This is an area that involves significant judgement over uncertain future outcomes, including primarily the timing and ultimate full settlement of long term policyholder liabilities, and therefore we considered it a key audit matter for our audit.

Consistent with the insurance industry, the Group uses valuation models to support the calculations of the technical provisions. The complexity of the models may give rise to errors as a result of inadequate/incomplete data or the design or application of the models.

Economic assumptions such as investment return and interest rates and actuarial assumptions such as mortality, longevity, customer behaviour, loss ratio and cost ratio are key inputs used to estimate these mainly long-term liabilities. Significant judgement is applied in setting these assumptions.

The Group's IFRS liability adequacy test was performed in order to confirm that technical provisions were adequate in the context of expected future cash outflows.

How our audit addressed the key audit matter

We used our own actuarial specialists to assist us in performing our audit procedures.

In particular, our audit focused on the models considered more complex and/or requiring significant judgement in the setting of assumptions used in calculation of technical provisions or performing liability adequacy test.

We obtained the understanding of the internal actuarial process including management's determination and approval process for setting of economic and actuarial assumptions.

Our assessments also included challenging, as necessary, specified economic and actuarial assumptions considering management's rationale for the actuarial judgments applied along with comparison to applicable industry experiences. We considered the appropriateness of actuarial judgments used in the models, which may vary depending on the product and/or the specifications of the product, and also the compliance of the models with the applicable accounting standards.

Furthermore, by performing our recalculations we have determined whether the models and systems were calculating the technical provisions accurately and completely.

We tested the validity of management's liability adequacy testing which is a key test performed to check that the liabilities are adequate as compared to the expected future contractual obligations. The inputs used were reconciled to the accounting records.

Our work on the liability adequacy tests included assessing the reasonableness of the projected cash flows and challenging the assumptions adopted in the context of both the Group and industry experience and specific product features.

Key audit matter

How our audit addressed the key audit matter

Based on the evidence obtained, we found that the assumptions and data used within the models calculating technical provisions were reasonable. We consider management's conclusion to be consistent with the available information.

As a result, the technical provisions are within a reasonable range of outcomes in the context of the uncertainties disclosed in the financial statements.

We also assessed the adequacy of the disclosures regarding these liabilities in the financial statements and found them appropriate.

Valuation of investment property and property for own use

Refer to notes 16 and 17 of the financial statements. The investment property and property for own use amount to HRK 1.52 billion and represent the 14% of the Group's total assets and HRK 0.85 billion and represent the 9% of the Company's total assets as at 31 December 2017.

According to the Notes 2.13 and 2.14 investment property is subsequently measured at fair value and property for own use is subsequently measured according to revaluation method.

The valuation of the Group's property portfolio is inherently subjective due to, among other factors, the individual nature of each property, its location and the expected future rental income for each particular property.

The existence of significant estimation uncertainty, together with the fact that only a small percentage difference in individual property valuation assumptions, when aggregated, could result in material misstatement, are the reasons why we have given specific audit focus and attention to this area.

The valuations were carried out by third party companies ("the Valuers"). The valuers were engaged by the Group and Company, and performed their work in accordance with the Croatian "Rules on the methods of valuation". The valuers used by the Group were firms with experience in the property estimation.

In determining a property's valuation, the valuers took into account property specific current information such as the current tenancy agreements rental income earned by the asset and expenses where applicable. They then applied assumptions in relation to capitalisation rates and current market rent and growth, based on available market data and transactions.

External valuations

We read the valuation reports for sample of properties and discussed our findings with management. We confirmed that the valuation approach for each property was in accordance with professional valuation standards and respective real estate valuation regulation and suitable for use in determining the carrying value of investment properties and properties for own use at 31 December 2017.

It was evident from our discussions with management and our review of the valuation reports that close attention had been paid to each property's individual characteristics and its overall quality, location and marketability as a whole.

There was no evidence of management bias or influence on the valuers.

We assessed the valuers' qualifications and expertise to determine whether there were any matters that might have affected their objectivity or may have imposed scope limitations upon their work. We found no evidence to suggest that the objectivity of any valuer in their performance of the valuations was compromised.

We carried out procedures, on a sample basis, to test whether property specific information supplied to the valuers by the Group reflected the underlying property records held by the Group. No issues were identified.

Assumptions

Our work over the assumptions focused on sample of properties consisting of the largest properties in the portfolio and those properties where the assumptions used significantly changed to prior year. We also engaged our own in-house valuation specialist to challenge the work performed and assumptions used by the valuers.

We challenged management on significant movements in the valuations. We concluded that the assumptions used in the valuations were supportable in light of available and comparable market evidence.

Key audit matter

How our audit addressed the key audit matter

Comparable market information was used for properties which are currently not rented and for some specific properties the valuers take into consideration cost method, all in line with applicable real estate valuation regulations.

The Group recorded the assessed values determined by the valuers.

Overall valuation estimates

The valuations adopted by the Group were all within an acceptable range. We also considered whether or not there was bias in determining individual valuations and found no evidence of bias.

How we tailored our company and group audit scope

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the separate and consolidated financial statements as a whole, taking into account the geographic and management structure of the Company and the Group, the accounting processes and controls, and the industry in which the Company and the Group operate.

As at 31 December 2017, the Group consists of the parent company, Croatia osiguranje d.d. and 15 direct subsidiaries of which 4 subsidiaries are from foreign countries. We audited the parent company and two domestic subsidiaries. One domestic subsidiary was audited by another auditor based on our audit instruction. We worked with other PwC network firm in relation to the audit of foreign subsidiaries of the Group. Eight domestic direct subsidiaries were not audited because they are immaterial to the Group as a whole.

Considering our ultimate responsibility for the opinion of the separate and consolidated financial statements, we are responsible for the direction, supervision and performance of the group audit. In this context, we determined the nature and extent of the audit procedures for the components of the Group to ensure that we performed sufficient work to enable us to provide an opinion on the separate and consolidated financial statements as a whole.

Overall, our audit procedures covered almost 100% of the Group in respect of revenue, profit after tax and total assets.

Reporting on other information including the Management Report and Corporate Governance Statement

Management is responsible for the other information. The other information includes the Management Report and Corporate Governance Statement (but does not include the separate and consolidated financial statements and our auditor's report thereon) which we obtained prior to the date of this auditor's report.

Our opinion on the separate and consolidated financial statements does not cover the other information, including the Management Report and Corporate Governance Statement.

In connection with our audit of the separate and consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the separate and consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

With respect to the Management Report and Corporate Governance Statement, we also performed procedures required by the Accounting Act in Croatia. Those procedures include considering whether the Management Report includes the disclosures required by Article 21 and 24 of the Accounting Act, and whether the Corporate Governance Statement includes the information specified in Article 22 of the Accounting Act.

Based on the work undertaken in the course of our audit, in our opinion:

- the information given in the Management Report and the Corporate Governance Statement for the financial year for which the separate and consolidated financial statements are prepared is consistent with the separate and consolidated financial statements;
- the Management Report has been prepared in accordance with the requirements of Article 21 and 24 of the Accounting Act; and
- the Corporate Governance Statement includes the information specified in Article 22 of the Accounting Act.

In addition, in light of the knowledge and understanding of the entity and its environment obtained in the course of the audit, we are required to report if we have identified material misstatements in the Management Report and the Corporate Governance Statement and other information that we obtained prior to the date of this auditor's report. We have nothing to report in this respect.

Responsibilities of management and those charged with governance for the separate and consolidated financial statements

Management is responsible for the preparation of the separate and consolidated financial statements that give true and fair view in accordance with International Financial Reporting Standards as adopted by the European Union, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the separate and consolidated financial statements, management is responsible for assessing the Company's and Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company and the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's and the Group's financial reporting process.

Auditor's responsibilities for the audit of the separate and consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the separate and consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these separate and consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the separate and consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's and Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's and Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the separate and consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the separate and consolidated financial statements, including the disclosures, and whether the separate and consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the separate and consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

Appointment

We were first appointed as auditors of the Company and the Group for the financial year ended 31 December 2014. Our appointment has been renewed annually by shareholder resolution representing a total period of uninterrupted engagement appointment of 4 years, with the last renewal by the general meeting of shareholders as of 12 June 2017.

Other Legal and Regulatory Requirements

PricewaterhouseCoopers d.o.o.

Based on the Ordinance on the form and content of financial statements and additional reports of insurance and reinsurance companies (Official Gazette 37/16), "Ordinance"), the Management Board of the Company created forms presented on pages 157 to 181, entitled the Statement of financial position of the Company as at 31 December 2017, and the Statement of comprehensive income, Statement of changes in equity and Cash flow statement of the Company for the year then ended together with information to reconcile the forms to the Company's financial statements. The Company's management is responsible for the preparation of these forms and information on reconciliation and they do not represent an integral part of these financial statements, but contain information required by the Ordinance. The financial information in the forms is based on the Company's financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union as presented on pages 28 to 156 adjusted for the purposes of the Ordinance.

The engagement partner on the audit resulting in this independent auditor's report is Siniša Dušić.

PricewaterhouseCoopers d.o.o.

Heinzelova 70, Zagreb

26 April 2018

Notes to the financial statements

1. GENERAL INFORMATION ON THE COMPANY

1.1. Legal framework, activities and employees

CROATIA osiguranje d.d., Zagreb, Vatroslava Jagića 33 (the "Company") is registered in the Court Register of the Commercial Court in Zagreb under the Company's Court Reg. No. ("MBS") 080051022 and PIN ("OIB") 26187994862.

The Company's principal activity is non-life and life insurance business and reinsurance business in the non-life insurance group. Since 2004 the Company's shares have been listed in the first listing of the Zagreb Stock Exchange, Zagreb.

The Company is the parent company of the Croatia osiguranje d.d. Group (the "Group").

1.2. Company bodies

The Company's bodies are the General Assembly, the Supervisory Board and the Management Board.

Members of the Supervisory Board:

| • | Ante Vlahović | President until 12 June 2017 |
|---|-------------------------------|---|
| • | Mladen Blažević | Vice President until 10 May 2017 |
| • | Branko Zec | Member until 15 April 2017 |
| • | Roberto Škopac | Member since 22 April 2014, President since 21 June 2017 |
| • | Josip Tica, PhD, Professor | Member until 12 June 2017 |
| • | Vitomir Palinec | Member |
| • | Hrvoje Patajac | Member since 12 June 2017, Vice President from 21 June 2017 until 26 October 2017 |
| • | Petar Miladin, PhD, Professor | Member since 12 June 2017 |
| • | Mima Kurilić Janušić | Member since 12 July 2017 |
| • | Željko Lovrinčević, PhD, | Member since 19 September 2017, Vice President from 26 |
| | | |

October 2017

Members of the Management Board:

| • | Damir Vanđelić | President of the Management Board |
|---|-----------------|-----------------------------------|
| • | Robert Vučković | Member of the Management Board |
| • | Nikola Mišetić | Member of the Management Board |
| • | Marijan Kralj | Member of the Management Boards |
| • | Miroslav Klepač | Member of the Management Board |
| • | Sanel Volarić | Member (until 31 January 2017) |

1.3. Subsidiaries

The Group consolidated the following entities as at 31 December 2017:

| | | 3 | 31 December 2017 | | |

1.4 Reclassification

During 2017, the Group and the Company reclassified the staff costs of the claims management sector in the statement of comprehensive income to present more clearly costs according to their function. The reclassification has no effect on the statement of financial position, statement of changes in equity nor the cash flow statement.

Effects on the Statement of comprehensive income for 2016 (Group):

| | | 2016 | | 2016 |
|-----------------------------------|---|-------------------------|------------------|------------------------|
| Item | Description of reclassification | Before reclassification | Reclassification | After reclassification |
| | | in HRK'000 | in HRK'000 | in HRK'000 |
| | | | | |
| Claims incurred (Note 8) | Staff costs of the claims management sector | (1,730,229) | (80,944) | (1,811,173) |
| Administrative expenses (Note 10) | reclassified as Claims incurred | (623,962) | 80,944 | (543,018) |

Effects on the Statement of comprehensive income for 2016 (Company):

| | | 2016 | | 2016 |
|-----------------------------------|---|-------------------------|------------------|------------------------|
| Item | Description of reclassification | Before reclassification | Reclassification | After reclassification |
| | | in HRK'000 | in HRK'000 | in HRK'000 |
| | | | | |
| Claims incurred (Note 8) | Staff costs of the claims management sector | (1,415,799) | (71,969) | (1,487,768) |
| Administrative expenses (Note 10) | reclassified as Claims incurred | (409,118) | 71,969 | (337,149) |

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of significant accounting policies adopted in the preparation of financial statements is set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

In 2017, the Group and the Company reclassified certain items in the Statement of comprehensive income in order to present the costs more clearly (Note 1.4). Hereinafter, the policies applied by the Group also mean the policies applied by the Company, unless otherwise stated.

2.1. Statement of compliance and basis of presentation

The financial statements for 2017 have been prepared in accordance with the Accounting Act (Official Gazette 78/15, 134/15 and 120/16) and International Financial Reporting Standards ('IFRS') as adopted in the European Union and in accordance with the Ordinance on the structure and content of the financial statements for insurance or reinsurance companies (Official Gazette 37/16).

These are consolidated financial statements of the Croatia osiguranje Group that also include separate financial statements of the Company ("Parent" of the Group) as defined in International Accounting Standard 27 "Separate Financial Statements" and International Financial Reporting Standard 10 "Consolidated financial statements".

2.2. Basis of preparation

The consolidated and separate financial statements of the company CROATIA osiguranje d.d. have been prepared in conformity with International Financial Reporting Standards (IFRS) as adopted in the EU and IFRS Interpretations Committee (IFRS IC) interpretations applicable to companies reporting under IFRS. The consolidated and separate financial statements have been prepared under the historical cost convention, as modified by the revaluation of land and buildings, investment property, available-for-sale financial assets, and financial assets at fair value through profit or loss.

The preparation of financial statements in conformity with IFRS as adopted in the EU requires the use of certain critical accounting estimates. It also requires the Management Board to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated and separate financial statements, are disclosed in Note 2.34.

2.3. Adoption of new and amended International Financial Reporting Standards ("IFRSs")

The accounting policies adopted are consistent with those of the previous financial year unless otherwise stated and disclosed.

The Group has adopted the following new and amended IFRS and IFRIC interpretations during the year which were endorsed by the EU. When the adoption of the standard or interpretation is deemed to have an impact on the financial statements or performance of the Group, its impact is described below.

(a) New and amended standards adopted by the Group:

The Group has adopted the following new and amended standards for its annual reporting period commencing 1 January 2017 which were endorsed by the European Union and which are relevant for the Group's financial statements:

- Recognition of Deferred Tax Assets for Unrealised Losses Amendments to IAS 12
- Disclosure Initiative Amendments to IAS 7

The adoption of these improvements did not have any impact on the disclosures in the financial statements of the Company and the Group, nor did it have any impact on the current period or any prior period and is not likely to affect future periods.

(b) Standards and interpretations not yet adopted:

Certain new standards and interpretations have been published that are not mandatory for 31 December 2017 reporting periods and have not been early adopted by the Group. The Group's assessment of the impact of these new standards and interpretations is set out below:

• IFRS 17 Insurance contracts (effective for annual periods beginning on or after January 1, 2021-IASB) — not yet endorsed in the EU

IFRS 17 was issued in May 2017 as a replacement for IFRS 4 *Insurance Contracts*. The Standard requires a current measurement model, where estimates are remeasured in each reporting period. The contracts are measured by using the following parameters:

- (probability-)weighted discounted cash flows
- explicit risk adjustment and
- contractual service margin CSM which represents the unearned profit under the contract which is recognised as income over the coverage period.

According to the Standard, the entity may choose where to present the change in the discount rates - either in profit or loss or directly in other comprehensive income. The final choice is likely to reflect the manner in which insurers disclose their financial assets in accordance with IFRS 9.

An alternative, simplified approach to premium allocation is permitted for the liability for remaining coverage for insurance contracts with short-term coverage, frequently drawn up by non-life insurers.

There is an amendment to the general measurement model called "access to variable fee approach" for certain contracts drawn up by life insurers where the policyholders have a share of returns on the underlying items. When applying the variable fee approach, the entity's share of the fair value changes of the underlying items is included in the contractual service margin. Consequently, the results of the insurers using this model will likely be less unstable than with the general model.

At this stage, the Company is not able to estimate the total impact of the standard on the financial statements, it will make more detailed assessments of the impact over the following periods. The Company plans to adopt this standard on its effective date.

IFRS 9 Financial instruments and associated amendments to various other standards (effective
for annual periods beginning on or after 1 January 2018 or later for insurance companies with
the exception for insurance companies until 1 January 2021 when the adoption of the new
insurance standard is expected).

IFRS 9 addresses the classification, measurement and derecognition of financial assets and financial liabilities and introduces new rules for hedge accounting. In December 2014, IASB made further changes to the classification and measurement rules and also introduced a new impairment model. With these amendments, IFRS 9 is now complete.

In 2016, the IASB adopted an amendment to IFRS 4 that allows insurers to apply IAS 39 instead of IFRS 9 for annual periods beginning on or after 1 January 2021, provided that certain prerequisites are met. These prerequisites applying to entities whose activities are predominantly connected with insurance, are met by the Group, and the Management intends to use this option to defer the application of IFRS 9.

• IFRS 15 Revenue from contracts with customers and associated amendments to various other standards (effective for annual periods beginning on or after 1 January 2018)

The IASB has issued a new standard for the recognition of revenue. This will replace IAS 18 which covers contracts for goods and services and IAS 11 which covers construction contracts.

The new standard is based on the principle that revenue is recognised when control of a good or service transfers to a customer – so the notion of control replaces the existing notion of risks and rewards. The application of IFRS 15 will require the identification of separate performance obligations which could affect the timing of the recognition of revenue going forward.

The Management of the Group has assessed the impact of the new IFRS 15 rules and considers that it will not have a significant impact on the business as most of the revenue refers to insurance income.

The Management Board plans to adopt the standard on its effective date and when endorsed by the European Union.

• IFRS 16 Leases (issued in January 2016 and effective for annual periods beginning on or after 1 January 2019)

IFRS 16 will affect primarily lessee accounting and will result in the recognition of almost all leases on the balance sheet. The standard removes the current distinction between operating and finance leases and requires recognition of an asset (the right to use the leased item) and a financial liability to pay rentals for virtually all lease contracts. An optional exemption exists for short-term and low-value leases. The income statement will also be affected because the total expense is typically higher in the earlier years of a lease and lower in later years. In addition, operating expenses will be replaced by interest and amortization.

Operating cash flows will be lower higher as cash payments for the principal portion of the lease liability will be classified within financing activities. Only the part of the payments that reflects interest can continue to be presented as operating cash flows.

Lessor accounting will not change significantly. Some differences may arise as a result of the new guidance on the definition of a lease. Under IFRS 16, a contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The standard will affect primarily the accounting for the Group's operating leases.. At this stage, the Group is not able to estimate the total impact of the new standard on the Group's financial statements, it will make more detailed assessments of the impact over the next twelve months. The Group plans to adopt this standard on its effective date.

2.4. Key estimates and estimation uncertainty

In preparing these financial statements, estimates were used which influence the presentation of assets and liabilities of the Group, the income and expenses of the Group and the disclosure of contingent liabilities of the Group.

Future events and their effects cannot be reliably anticipated, and therefore actual results may differ from these estimates. The accounting estimates used in the preparation of the financial statements are subject to change as new events occur, as more experience is gained, additional information is obtained and due to the changing environment in which the Group operates.

The key estimates used in applying accounting policies in the preparation of the financial statements relate to impairment losses on loans and receivables, calculation of technical provisions and determining fair value of investments in real estate.

Information about the assessments of the Management regarding the application of IFRS, which have a significant impact on the financial statements, and the information about the estimates with a high risk of likely significant adjustment in the next year, is presented in Note 2.34.

2.5. Consolidation

The consolidated financial statements comprise the Company and its subsidiaries (together "the Group").

Subsidiaries

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group and are de-consolidated from the date that control ceases.

Transactions eliminated at consolidation

Balances and transactions between Group members and any unrealised income and expenses arising from intragroup transactions, are eliminated in preparing the consolidated financial statements. Unrealised losses are also eliminated in the same way as unrealised gains, but only if there are no indicators of impairment.

Non-controlling interests

Non-controlling interests in subsidiaries are included in the total equity of the Group.

Losses applicable to non-controlling interests in subsidiaries are added to non-controlling interests in situations where this causes non-controlling interests to be disclosed with negative value. The reconciliation of non-controlling interest is based on the proportionate amount of the net assets of the subsidiary, with no adjustment to goodwill and recognition of profit or loss in the income statement.

Loss of control

At the moment of loss of control, the Group derecognises assets and liabilities of subsidiaries, interests of minority shareholders and other elements of equity related to the subsidiary. Any surplus or deficit arising on the loss of control is recognised in profit or loss. If the Group retains any share in the subsidiary, such share is measured at fair value at the date that control ceases. After that, this is reported as an investment valued using the equity method or as available-for-sale financial assets, depending on the level of influence retained.

Joint arrangements

The Group applies IFRS 11 to all joint arrangements. Under IFRS 11 investments in joint arrangements are classified as either joint operations or joint ventures depending on the contractual rights and obligations of each investor. The Group has assessed the nature of its joint arrangements and determined them to be joint ventures. Joint ventures are accounted for using the equity method.

Merger of entities under common control

A merger or a business combination involving business entities under common control is a business combination in which all of the combining business entities are controlled by the same party (or parties) both before and after the business combination, and that control is not transitory. The predecessor method of accounting is used to account for the mergers of entities under common control. According to the predecessor method of accounting, the carrying amount of the assets (including goodwill, if any) and liabilities of the acquired or merged company (or the company that has ceased to exist as a result of the merger) are transferred to the successor company from the consolidated financial statements of the highest entity that has common control and which prepares consolidated financial statements or a lower level entity if justified.

The merged entity's results and balance sheet are incorporated prospectively from the date on which the merger or business combination between entities under common control occurred.

On the date of the merger, inter-company transactions, balances and unrealised gains and losses on mutual transactions are eliminated.

The difference between the transferred fee and the carrying amount of the net assets of the acquired company is recognised in equity (in retained earnings).

2.6. Presentation currency

The Group's financial statements are presented in Croatian kuna (HRK) as the functional currency of the Company and subsidiaries in Croatia and presentation currency of the Group.

2.7. Foreign currency transactions

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currency are translated into the functional currency using the exchange rate effective at the reporting day. Non-monetary assets and liabilities denominated in foreign currency and measured at fair value are translated into the functional currency using the exchange rate effective on the date their fair value is determined.

Changes in the fair value of monetary securities denominated in or linked to a foreign currency and classified as available-for-sale are analysed between translation differences resulting from changes in the amortised cost of the security and other changes in the carrying amount of the security. Foreign exchange rate differences resulting from the conversion of monetary assets and liabilities are recognised through profit or loss, and are presented within finance income or finance cost. As at 31 December 2017, the official HRK exchange rate was HRK 7.513648 for EUR 1 and (31 December 2016: HRK 7.557787).

2.8. Gross premium written

- /i/ Gross written premiums represent basic operating revenueand they comprise the non-life and life insurance written premiums.
- /ii/ Non-life insurance gross written premiums include all amounts of premiums written in the current accounting period, irrespective of the fact whether these amounts partially or completely pertain to a later accounting period.

Non-life insurance gross written premiums include all gross premiums written in the accounting period, whose beginning of the insurance year falls within the accounting period, irrespective of the fact whether they pertain in whole or in part to later accounting periods. The premiums are presented in gross amounts, that is, they include brokers' commissions, but exclude taxes and charges levied with premiums. Written premiums include the adjustment of the premium written in the prior accounting periods as well as estimates of premiums written at the end of the period. Written premiums, that is, gross written premiums and unearned premiums include adjustments for the write-off of receivables from policyholder as a result of insurance termination. Net impairment losses on receivables for premium of the insured party are recognised as a deduction of gross written premium.

The earned portion of received premiums is recognised as income. Premiums are earned from the date of the risk occurrence during the insurance period, based on the assumption of risk patterns.

/iii/ Life insurance gross written premiums include all amounts of premiums collected until the end of the accounting period.

In accordance with the exception permitted by IFRS 4, life insurance premiums are recorded in books on a cash basis. Supplemental insurance premiums are also recorded on a cash basis.

2.9. Investment income and expenses

/i/ Investment income comprises the income realised through participating interests (dividends, profit share, entries – increase in value), income from investments related to land and buildings, interest income, unrealised profit from fair value investment through profit or loss, income from sales of investment, net foreign exchange gains and other investment income.

The land and buildings investment income consists of income realized due to an increase in land and buildings value, land and buildings sales income, land and buildings rental income and other investment income from land and buildings. Land and buildings rental income and other operating leases are recognised in profit or loss on a straight-line basis over the entire term of the lease.

Interest income is recognised in the income statement as it accrues, taking into account the effective yield on the assets. Interest on monetary assets at fair value through profit or loss is recognized using the effective interest rate method and is presented in interest income. Dividend income is recognised in the income statement on the date that the dividend is declared. The accounting policy in relation to the finance income recognition is disclosed in Note 2.16. "Financial instruments".

/ii/ Investment expenses include interest expense, investment impairment, losses realised on the sale of investments, net foreign exchange losses and other investment expenses.

2.10. Claims incurred

Claims incurred include all settled amounts for claims in the accounting period, irrespective of the accounting period in which they were incurred, net of the reinsurance portion in claims, collected recourses, sold and recovered amounts and gross of claims provisions at the end of the accounting period but net of claims provisions at the beginning of the accounting period.

In addition to net claims paid, gross claims paid include the costs related to claims payment (appraisals, attorneys' fees, staff costs of the claims management sector etc.), surrenders and recourse claims expenditures.

2.11. Operating expenses

Operating expenses include the costs of insurance sale and administration costs. The sales costs include all direct costs incurred in concluding insurance contracts, such as agents' costs, costs of salaries of sales staff, commissions and marketing costs.

Non-life insurance commission expenses are recognised on a straight-line basis over the accounting period in accordance with the recognition of the premium income to which they relate. Commission expenses for non-life insurances are recognised on a pay-as-you-go basis. Administration costs include the costs incurred in connection with portfolio management, expenses for employees as well as other material and non-material costs.

2.12. Intangible assets

Intangible assets are initially carried at cost, which includes the purchase price, including import duties and non-refundable tax after deducting trade discounts and rebates, as well as all other costs directly attributable to bringing the asset to their working condition for their intended use.

Intangible assets are recognised if it is probable that future economic benefits associated with the item will flow to the Group, if the cost of the asset can be reliably measured, and if the cost exceeds HRK 3,500.

After initial recognition, assets are measured at cost less accumulated amortisation and any accumulated impairment losses.

The amortisation of assets commences when the assets are ready for use, i.e. when the assets are at the required location and the conditions necessary for use have been met. The amortisation of assets ceases when the assets are fully amortised or classified as assets held for sale. The amortisation is calculated by writing off the purchase cost of each particular asset during the estimated useful life of the asset, by applying the straight-line method. The estimated useful life of intangible assets is 4 years.

Deferred acquisition costs

Deferred acquisition costs for non-life insurance comprise commissions calculated for the internal and external sales network incurred in concluding insurance policies during the financial year. In this regard, the commission charged to the sales network represents the total acquisition commission for each insurance policy. Indirect or general sales costs are not deferred.

For non-life insurance, at the reporting date deferred acquisition costs are calculated using the methodology comparable to the method of calculating the provision for unearned premiums at the reporting date.

By introducing the accounting policy of deferral of acquisition costs, the Group has also introduced recording liabilities for undue commission. Liabilities for undue commission is the difference between the total commission to be calculated for a particular insurance policy and the accrued commission. The basis for calculating the total commission is the value of the written (charged) premium, while the basis for calculating the accrued commission is the amount of the charged premium by each policy.

The recoverable amount of deferred acquisition costs is assessed at each reporting date as part of the liability adequacy test of non-life insurance.

2.13. Property and equipment

Property, plant and equipment are initially carried at cost, which includes the purchase price, including import duties and non-refundable tax after deducting trade discounts and rebates, as well as all other costs directly attributable to bringing the asset to their working condition for their intended use.

Property, plant and equipment are recognised if it is probable that future economic benefits associated with the item will flow to the Company, if the cost of the asset can be reliably measured, and if the cost exceeds HRK 3,500.

After initial recognition, land and buildings are carried at revalued amount, being their fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. The increase in value of assets due to the revaluation is recognised in other comprehensive income. A revaluation is performed with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the balance sheet date. The Group assessed the fair value of these assets during 2014.

After initial recognition, equipment and other tangible assets are measured at cost less accumulated depreciation and any accumulated impairment losses.

Maintenance and repairs, replacements and improvements of minor scale are expensed when incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an asset beyond its originally assessed standard performance, the expenditures are capitalised i.e. included in the carrying value of the asset.

Gains or losses on the retirement or disposal of fixed assets are included in the income statement in the period when incurred.

The depreciation of assets commences when the assets are ready for use, i.e. when the assets are at the required location and the conditions necessary for use have been met. The depreciation of assets ceases when the assets are fully depreciated or classified as assets held for sale. Depreciation is charged so as to write off the cost of each asset, other than land and tangible assets under construction, over their estimated useful lives, using the straight line method, as follows:

| | 2017 | 2016 |
|-------------------------|-------------|-------------|
| | Estimated | Estimated |
| | useful life | useful life |
| Buildings | 40 years | 40 years |
| Furniture and equipment | 4-10 years | 4-10 years |
| Computer equipment | 3-4 years | 3-4 years |
| Vehicles | 5 years | 5 years |

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

2.14. Investment property

Investment property (land, buildings) that are not used for operations and that are owned by the Group or under a finance lease and that are held to enable the Group to realise rental income and/or increase in the asset market value and are measured at fair value through profit or loss.

The Group measures the fair value of its investment property at the end of each accounting period, and such measurement is based on the appraisal by a hired appraiser.

Subsequent expenditure is capitalised only when it is probable that future economic benefits associated with it will flow to the Group and the cost can be measured reliably. All other repairs and maintenance costs are expensed when incurred. If an investment property becomes owner-occupied, it is reclassified to property and equipment, and its carrying amount at the date of reclassification becomes its deemed cost to be subsequently depreciated.

2.15. Investments in subsidiaries and associates

Subsidiaries are companies in which the Company controls the adoption and implementation of financial and operating policies.

Associates are companies in which the Company has significant influence but not control over the adoption and implementation of financial and operating policies.

Investments in subsidiaries and associates are presented in separate financial statements using the cost method.

2.16. Financial instruments

/i/ Classification and recognition

The Group classifies its financial instruments into the following categories: financial assets at fair value through profit or loss, loans and receivables, available-for-sale financial assets, held-to-maturity investments and other financial liabilities. The classification depends on the purpose for which the financial assets and liabilities were acquired.

The Management Board determines the classification of financial assets and financial liabilities at initial recognition and, where appropriate, re-evaluates this designation at each reporting date.

Financial assets and financial liabilities at fair value through profit or loss

Financial assets and financial liabilities at fair value through profit or loss are those that are classified as assets and liabilities held for trading or those that the Group initially classified as at fair value through profit or loss.

Trading assets and liabilities are those assets and liabilities that the Group acquires or incurs principally for the purpose of selling or repurchasing in the near term, or holds as a part of a portfolio that is managed together for short-term profit or position taking.

The Group designates financial assets and liabilities at fair value through profit or loss on inception when either:

- the assets and liabilities are managed, evaluated and reported internally on a fair value basis;
- the designation eliminates or significantly reduces an accounting mismatch which would otherwise arise; or
- the asset or liability contains an embedded derivative that significantly modifies the cash flows that would otherwise be required under the contract.

Financial assets at fair value through profit or loss is included in debt and equity securities, investments funds and other financial assets held for trading. Derivatives are classified as assets held for trading. The Group does not use hedge accounting.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than those:

- that the entity intends to sell immediately or in a short period of time and that will be classified as
 financial assets held for trading, and that which the Management classifies at initial recognition as
 assets at fair value through profit or loss;
- that the entity, upon initial recognition, classifies as available for sale; or
- for which it is unlikely that the entity will recover the larger portion of the initial investment value, except in the case of credit rating deterioration, and which will be classified as available for sale.

Loans and receivables are created when the Group approves financial resources to clients without the intention to trade in such receivables, and they include deposits with credit institutions, loans secured mostly by mortgages and loans given to the insured parties from mathematical provisions for life insurance, secured by life insurance policies.

Accounting of receivables arising from insurance contracts is disclosed in Note 2.17. "Receivables".

Held-to-maturity financial assets

Held-to-maturity financial assets are non-derivative financial assets with fixed or determinable payments and fixed maturity that an entity has the positive intention and ability to hold to maturity. Held-to-maturity investments include state and corporate bonds with fixed income.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. Financial assets designated as available for sale are intended to be held for an indefinite period of time, but may be sold in response to needs for liquidity or changes in interest rates, foreign exchange rates, or equity prices.

Other financial liabilities

Other financial liabilities include all financial liabilities that are not classified in the category at fair value through profit or loss. At the reporting date, the Group had no financial obligations, except for unit-linked products. Liabilities arising from insurance contracts are accounted for in Note 2.21 - "Technical Provisions".

/ii/ Recognition and derecognition

Regular purchases and sales of financial assets at fair value through profit or loss, held-to-maturity investments and available-for-sale financial assets are recognised on the trading date, that is, the date on which the Group commits to purchasing or selling the instrument. Loans and receivables as well as financial liabilities are initially recognized on the date of occurrence, that is, on the day they are advanced to borrowers or received from lenders.

The Group derecognises financial assets (in full or in part) when the contractual rights to receive cash flows from the financial asset have expired or when it loses control over the contractual rights to such financial assets. This occurs when the Group essentially transfers all equity risks and benefits to another business entity, or when the rights are exercised, surrendered or expired.

The Group ceases to recognise financial liabilities only when they cease to exist, that is, when they are met, cancelled or expired, or when they are transferred. Should the terms of financial liabilities substantially change, the Group shall cease to recognise that particular liability and at the same time recognise a new financial liability, with new terms.

Initial and subsequent measurement

Financial assets and liabilities are recognised initially at their fair value plus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

After initial recognition, the Group measures financial instruments at fair value through profit or loss, and available-for-sale financial assets at their fair value, without any deduction for selling costs.

For financial instruments traded in active markets, the determination of fair values of financial assets and financial liabilities is based on quoted market prices. This includes listed equity securities and quoted debt instruments on official stock exchanges.

For all other financial instruments, fair value is determined using valuation techniques. In these techniques, fair values are estimated from observable financial information based on which value is determined using the discounted cash flow method and/or the method of comparable companies and transactions.

In cases where the fair value of unlisted equity instruments cannot be determined reliably, the instruments are carried at cost.

Loans and receivables and held-to-maturity investments are measured at amortised cost net of impairment. Financial liabilities not classified at fair value through profit or loss are measured at amortised cost. Premiums and discounts, including initial transaction costs, are included in the carrying amount of the associated instrument and amortized using the effective interest rate of that instrument.

Gains and losses

Gains and losses arising from a change in the fair value of financial assets or financial liabilities at fair value through profit or loss are recognised in profit or loss.

Gains and losses arising from changes in the fair value of available-for-sale monetary assets are recognised directly in other comprehensive income. Impairment losses, foreign exchange gains and losses, interest income and amortisation of premium or discount using the effective interest method on available-for-sale monetary assets are recognised in profit or loss. Foreign exchange differences resulting from revaluation of non-monetary financial assets denominated in or linked to foreign currency that are classified as available for sale are recognised within other comprehensive income, along with all other changes in their fair value, whereas income earned from dividends is recognised through profit or loss. Upon sale or other derecognition of available-for-sale financial assets, all cumulative gains or losses are transferred from other comprehensive income to profit or loss.

Gains and losses on financial instruments carried at amortised cost may also arise, and are recognised in profit or loss, when a financial instrument is derecognized or when its value is impaired.

Apart from gains and losses arising from the change in fair value of available-for-sale financial assets which are recognized in other comprehensive income, as described above, all other gains and losses and interest are recognized in profit or loss in line items "Finance income" and "Finance costs".

Fair value measurement principles

The fair value of financial assets and liabilities at fair value through profit or loss and financial assets available for sale is their quoted market price at the reporting date without any deduction for estimated future costs to sell. If the financial assets market (including the unlisted securities market) is not active, or if, for any other reason the fair value cannot be reliably measured on the basis of the market price, the Group determines the fair value based on observed prices (prices of similar or identical items), and when this is not available, it applies various estimation techniques that use all relevant information and inputs that can help in estimating the fair value. This includes the use of prices attained in recent transactions between informed and willing parties, reference to other essentially similar instruments, discounted cash flow analysis and option pricing models, making maximum use of market information and relying as little as possible on the specific characteristics of the entity.

Where discounted cash flow techniques are used, estimated future cash flows are based on the Management Board's best estimates and the discount rate is the market rate effective at the reporting date and used for financial instruments with similar conditions. Where a pricing model is used, the market related rates effective at the reporting date are used.

/iii/ Impairment of financial assets

At each reporting date the Group assesses whether there is objective evidence that financial assets not carried at fair value through profit or loss are impaired. Financial assets are impaired when objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset, and that the loss event has an impact on the future cash flows of the asset that can be estimated reliably.

The Group takes into account the evidence of impairment for both a specific asset and at group level. All individually significant financial assets are assessed for impairment. All individually significant financial assets where impairment has not been identified are included in the basis for assessing impairment at group level for impairment that has occurred but has yet to be identified. Assets that are not individually significant are assessed for impairment by grouping together financial assets (presented at amortised cost) on the basis of similar risks.

Objective evidence of impairment of financial assets (including equity securities) includes default or delinquency by a borrower, restructuring of loans or advances by the Group on terms that the Group would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, , or other available data relating to a group of assets, such as adverse changes in the payment status of borrowers or issuers within the group, or economic conditions that are connected with defaults within the group.

For the purposes of assessing impairment at group level, the Group relies on historical experience in terms of loss rates, periods of loss recognition, adjusted for the purposes of the Management Board's assessment as to whether current economic and credit conditions are such that the actual losses may be higher or lower than before. Loss rates and the expected recognition period are reviewed regularly.

Impairment losses on assets carried at amortised cost are measured as the difference between the carrying amount of the financial assets and the present value of estimated cash flows discounted at the assets' original effective interest rate. Losses are recognised through profit or loss and reflected in impairment provisions. Interest on impaired assets is recognised as discount amortisation and at collection of payment. In the case of equity investments classified as available for sale, a significant or prolonged decline in the fair value of the investment below its cost is considered as an indicator of impairment. If any such evidence exists for available-for-sale financial assets, the cumulative loss, calculated as the difference between the cost and current fair value, less any loss from impairment of that financial asset that was previously recognised in profit or loss, is transferred from other comprehensive income and recognised in profit or loss. Impairment losses recognised in profit or loss on equity securities cannot be subsequently reversed through profit or loss, but all value increases until the final sale are recognised in other comprehensive income.

If a subsequent event results in the decrease in the amount of impairment loss for financial assets that are presented at amortised cost and for debt securities available for sale, the previously recognised impairment loss is reversed and recognised through profit or loss. Changes in the amount of impairment related to the time value of money are recognised as a component of interest income.

/iv/ Specific instruments

Debt securities

Debt securities are classified as held-to-maturity investments or financial assets at fair value through profit or loss, or as financial assets available for sale, depending on the purpose for which the debt security has been acquired.

Loans and advances to banks

Deposits with banks are classified as loans and receivables and valued at amortised cost less impairment losses.

CROATIA osiguranje d.d., Zagreb Notes to the financial statements for the year 2017

Equity securities

Equity securities are classified as assets at fair value through profit or loss or as available-for-sale financial assets and measured at fair value, unless it is impossible to reliably establish the fair value (as described above) when they are measured at cost.

Loans and receivables from policyholders

Loans and receivables from policyholders are presented at amortised cost less impairment to reflect the estimated recoverable amounts.

Investments in funds

Investments in open-end investment funds are classified as financial assets at fair value through profit or loss or as financial assets available for sale and they are measured at current fair value.

Investments for the account and risk of life insurance policyholders

Investments for the account and risk of life insurance policyholders include investments in unit-linked products and are classified as financial assets at fair value through profit or loss.

Receivables from insurance and other receivables

Receivables from direct insurance and other receivables are recognised initially at fair value and subsequently at amortised cost less value impairment.

Trade and other payables

Trade and other payables are recognised initially at fair value and subsequently at amortised cost.

Derivative financial instruments

As part of its regular operations, the Group concludes contracts on derivative financial instruments for the purpose of managing currency risk and therefore these financial instruments are classified as Financial assets or liabilities held for trading - derivatives. Derivatives of the Group include foreign exchange forward contracts.

Derivatives are recorded in the off-balance sheet records at the nominal amount of financial instruments and are measured at fair value. Increase / decrease in fair value is recognized as an asset if their fair value is positive and liabilities if their fair value is negative and changes in fair value of derivatives are included in profit or loss i.e. in financial income and expenses.

Embedded derivatives within insurance contracts and investment contracts

Sometimes, a derivative may be a component of a hybrid (combined) financial instrument or insurance contract that includes both the derivative and host contract with the effect that some of the cash flows of the combined instrument vary in a similar way to a stand-alone derivative. Such derivatives are known as embedded derivatives.

Embedded derivatives are separated from their host contract, measured at fair value and changes in their fair value included in profit or loss if they meet the following conditions:

- the economic characteristics and risks of embedded derivatives are not closely connected with the economic characteristics and risks of the host contract,
- a separate instrument with the same characteristics as those of the embedded derivative would satisfy the definition of a derivative,
- the hybrid instrument is not measured at fair value and changes in its fair value are not recognised in profit or loss.

Embedded derivatives that meet the definition of an insurance contract need not be separated from the host contract. Furthermore, the Group has used the exemption provided in IFRS 4, 'Insurance Contracts':

- it does not separate or measure at fair value the option of the policyholder to repurchase the insurance contract at a fixed price (or the amount based on the fixed amount and interest rate), even if the price is different from the book value of the insurance liability in the host contract,
- it does not separate or measure at fair value the option of the policyholder to repurchase the contract with discretionary participation features.

Offsetting of financial instruments

Financial assets and liabilities are offset and presented in the financial statement on a net basis when there is a legally enforceable right to offset the recognised amounts and an intention to settle on a net basis, or the acquisition of assets and settlement of liabilities take place simultaneously.

2.17. Receivables

/i/ Insurance receivables include receivables from insured parties based on non-life insurance premiums. Receivables based on non-life insurance premiums comprise receivables for written, but not yet invoiced premium and receivables for invoiced, but not paid premium.

Recognition of insurance premium is described in Note 2.8. – "Gross written premiums".

/ii/ Receivables for invoiced but unpaid premiums are presented at nominal value, and an adjustment is made for the value of doubtful and uncollectible receivables. Impairment is recognised for all unpaid receivables the due date of which was 180 days prior to the balance sheet date. Impairment can be decreased for receivables which are used as basis for payment of claim to the debtor (provision for claims).

/iii/ Receivables under the right to recourse are recognised for all recourse cases from an out-of-court procedure arising from receivables from another insurance company and recourses for which a financial settlement was concluded with the counterparty. Impairment of recourse receivables is made for all receivables where 180 days passed from the due date. The determined impairment can be decreased by recourse receivables that are likely to be collected. Recognition of income from recourses is deferred due to uncertainty of collection. Income from recourses is deferred for recourses which are not settled in cash with the exception of recourses from other insurance companies which are recognised in profit or loss immediately.

/iv/ Other receivables pertain to receivables arising from interest on loans and deposits, receivables arising from advance payments, receivables arising from received payment instruments, etc.

2.18. Cash and cash equivalents and short-term deposits

Cash consists of balances with banks. Cash equivalents are short-term, high-liquidity investments that can be converted at any time into known amounts of cash and are not exposed to significant changes in value. The carrying amounts of cash and cash equivalents generally approximate their fair value.

For the purposes of reporting on cash flows, cash and cash equivalents refer to cash with banks and in hand, as well as deposits with original maturity up to three months.

2.19. Income tax

The tax expense represents the sum of the tax currently payable and deferred tax.

Current tax

The current tax liability is based on taxable profit for the year. Taxable profit differs from profit as reported in the statement of comprehensive income because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates enacted or substantively enacted at the end of the reporting period.

Deferred tax

Deferred tax is recognised on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognized on the basis of revaluation of land and buildings and of financial assets available for sale.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The calculation of deferred tax liabilities and assets reflects the amount at which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities. Deferred tax assets and liabilities are not discounted and are classified as non-current assets and/or liabilities.

Current and deferred income tax for the period

Current and deferred tax is recognised as an expense or income in profit or loss, except when they relate to items credited or debited to OCI in which case the deferred tax is also recognised in comprehensive income.

2.20. Capital

In its financial records the Group records capital categorized as follows: subscribed capital, fair value reserve, statutory reserves, legal reserves, other reserves, retained profit and current year profit/(loss).

- /i/ Subscribed capital represents the indivisible share capital of the Company, paid in full.
- /li/ Revaluation reserve

The revaluation reserve includes profits from the revaluation of properties, net of taxes. The revaluation reserve is transferred directly to retained profit in proportion to the depreciation of the asset.

The revaluation reserve of available-for-sale financial assets includes unrealised gains and losses from changes in fair value of available-for-sale financial assets, net of impairment and deferred tax.

/iii/ Allocations to statutory reserves, legal reserves, other reserves and retained profit are regulated by the Decisions of the Company's General Assembly.

/iv/ The current year income is presented according to the balance as at 31 December and it is transferred to the upcoming fiscal year. The utilization or allocation of profit is determined by the Decision of the Company's General Assembly.

2.21. Technical provisions

Technical provisions presented in the financial statements pertain to unearned premiums, mathematical reserve for life insurance, provisions for claims, fluctuation provisions and other insurance-technical provisions. They are formed in accordance with the Ordinance on minimum standards, methods of calculating and guidelines for calculating technical provisions in insurance in line with the Company's accounting and internal regulations. All technical provisions have been granted a positive opinion of the appointed certified actuary of the Company.

/i/ Unearned premiums

The Group calculates unearned premiums for those types of insurance where the insurance coverage lasts even after the end of the reporting period, since the insurance year and the reporting period do not overlap. The basis for calculation of gross unearned premium of non-life insurance is the accrued (written) premium, while the basis for the calculation of gross unearned premium of supplemental insurance with life insurance is the collected premium.

Unearned premiums are calculated according to the *pro rata temporis* method, except for the types of loan insurance where a decrease of insurance cover throughout the contract term is taken into consideration. The reinsurance share of the gross written premium is determined depending on the reinsurance contract and the method used for the calculation of the corresponding gross written premium.

/ii/ Mathematical life insurance provision

Mathematical life insurance provisions are calculated individually for every insurance contract by using the prospective net method in accordance with legal regulations and Ordinances of HANFA.

/iii/ Claims provisions

Claims provisions contain provisions for reported claims, provisions for incurred but not reported claims, provisions for costs of processing claims.

Provisions for reported claims are determined by individual assessment. Actuarial methods are applied upon determining provisions for the costs of processing claims and for incurred but unreported claims.

The reinsurance share in provisions for claims incurred is determined in accordance with reinsurance contracts.

/iv/ Provisions for unexpired risks

Provisions for unexpired risks are created where the expected value of claims and costs pertaining to unexpired periods of policies, which are valid on the reporting date, exceeds the provisions for unearned premiums pertaining to such policies. Provisions for unexpired risks are calculated separately for individual types of insurance, i.e. homogeneous risk groups.

/v/ Provision for bonuses and discounts

The provision for bonuses and discounts is established according to the provisions of insurance contracts and the Ordinance on minimum standards, methods of calculating and guidelines for calculating technical provisions in insurance in line with accounting regulations.

2.22. Technical life insurance provisions where the policy holder bears the investment risk

Since the Group issues life insurance policies where the policy holder bears the investment risk, adequate separate provisions are created for every such insurance contract.

2.23. Reinsurance

The Group cedes premiums to reinsurance in the regular course of business for the purpose of limiting its net loss potential through risk diversification. Reinsurance contracts do not relieve the Group from its direct obligations to policyholders.

Premiums ceded and recoverable amounts are presented through profit or loss on a gross basis. Only the contracts that give rise to a significant transfer of insurance risk are accounted for as reinsurance contracts. Amounts recoverable under such contracts are recognised in the same year as the corresponding claim. Contracts, through which significant insurance risk (financial reinsurance) is not transferred, are recorded as deposits. During 2017 and 2016, the Group did not conclude any such contracts.

Reinsurance assets include amounts receivable from reinsurance companies for ceded insurance liabilities. Receivables from reinsurers are estimated in a manner consistent with the provisions for unpaid claims and claims paid by reinsured policies. Reinsurance assets include the actual or estimated receivables from reinsurers in respect of technical provisions. Reinsurance assets relating to technical provisions are created on the basis of the terms of reinsurance contracts and measured on the same basis as the corresponding reinsured liabilities.

Reinsurance receivables are assessed for value impairment at each reporting date.

2.24. Liabilities and related assets under liability adequacy test

IFRS 4 provides for the implementation of mandatory liability adequacy test under the insurance contract. At each reporting date the Group estimates whether its reported insurance liabilities are adequate, using current estimates of future cash flows for all its insurance contracts. Should the above assessment show that the book value of insurance liabilities is insufficient in relation to the estimated future cash flows, the shortage is charged to profit or loss. Estimates of future cash flows are based on realistic actuarial assumptions, taking into account current experience of the occurrence of claims.

2.25. Other liabilities

- /i/ Liabilities arising from direct insurance pertain to liabilities under claims.
- /i/ Liabilities arising from direct reinsurance pertain to liabilities under reinsurance premium.
- /iii/ Other liabilities pertain to liabilities toward domestic suppliers, liabilities for advances received, liabilities to employees, commission liabilities etc.
- /vi/ The Company makes monthly payments to the guarantee fund of the Croatian Insurance Bureau for the settlement of claims for damages caused by uninsured and unknown vehicles. The monthly fee is determined according to the premium market share of each insurer, expressed in percentage. The guarantee funds of the Croatian Insurance Bureau are utilised to settle claims for damages caused by uninsured and unknown vehicles.

2.26. Employee benefits and pension plans

Pension obligations

For defined contribution plans, the Group pays contributions to state-owned pension and health insurance funds, in accordance with legal requirements or individual choice. The Group has no further payment obligations once the contributions have been paid. The contributions are recognised as an expense in profit or loss as they accrue.

Short-term employee benefits

Short-term employee benefits are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid under the short-term cash bonus or profit-sharing plans if the Branch has a present legal obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Other employee benefits

Liabilities based on other long-term employee benefits, such as jubilee awards and termination benefits at retirement, are recorded as the net present value of the liability for defined benefits at the balance sheet date. The discounted future cash flow method is used for the calculation of the present value of the liability.

Termination benefits

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognises termination benefits at the earlier of the following dates:

- (a) when the Group can no longer withdraw the offer of those benefits; and
- (b) when the entity recognises costs for a restructuring that is within the scope of IAS 37 and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer.

2.27. Provisions

Provisions are recognised when the Group has a present obligation as a result of a past event; it is more likely than not that an outflow of resources will be required to settle the obligation; and the amount can be reliably estimated. Provisions are reviewed at each balance sheet date and adjusted to reflect the best current estimate.

Provisions are determined for costs of legal disputes and costs of employee benefits for the number of years of service and retirement (regular jubilee awards and termination benefits) and stimulation termination benefits as part of the redundancy plan.

Provisions for employee benefits for long-term employment and retirement (regular jubilee awards and severance payments) are determined in such a manner that in each year of work, the present value of the proportional part of the expected amount of regular jubilee rewards and severance pay depends on the total time remaining until the jubilee award is paid, less expected employee turnover. The discount rate applied is the yield on the respective bonds.

2.28. Impairment of non-financial assets

The net book value of the Group's assets, other than financial assets (see Note 2.16 - "Financial instruments") and income tax (see Note 2.19 - "Income tax"), are reviewed at each reporting date to determine whether there is any indication of value impairment. If any such indication exists, the asset's recoverable amount of the asset is estimated. For intangible assets with no finite useful life (the Group had no such assets on the date of reporting) and intangible assets not yet in use, the recoverable amount is estimated at each reporting date.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. A cash-generating unit is the smallest identifiable asset group that generates cash flows that are largely independent from other assets and groups. Impairment losses are recognised in profit or loss. Exceptionally, the impairment of property measured by using the revaluation model is debited to fair value reserves, if any, and the remaining amount of the impairment after these reserves have been exhausted is recognised in profit or loss for the period.

The recoverable amount of an asset and cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

The value impairment loss recognised in prior periods is assessed on each reporting date in order to establish whether the loss has decreased or no longer exists. Impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

2.29. Contingent liabilities and assets

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or a present obligation that arises from past events but is not recognised because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or the amount of the obligation cannot be measured with sufficient reliability

Contingent liabilities are recognised as a provision in the financial statements when it is more likely than not that there will be a cash outflow. Other contingent liabilities are only disclosed in the notes to the financial statements.

Contingent assets are not recognised in the financial statements, rather they are recognized when an inflow of economic benefits is nearly certain.

2.30. Events after the balance sheet date

Events after the balance sheet date, which provide additional information on the Group's position at the balance sheet date (adjusting events), are reflected in the financial statements. Events that are not adjusting events are disclosed in the notes to the financial statements, if material.

2.31. Earnings per share

Earnings per share are calculated as profit of the period attributable to Company shareholders decreased by dividends of preference shares divided by the weighted average of ordinary shares (without treasury shares).

2.32. Classification of contracts

Contracts through which the Group undertakes significant underwriting risk on behalf of the other party (policyholder) by accepting to indemnify the policyholder or another insurance beneficiary, if a particular future event occurs (insured event) which has a negative effect on the policyholder or other insurance beneficiary, are classified as insurance contracts. The underwriting risk differs from financial risk.

Financial risk is the risk of possible future change in one or more of the defined interest rates, prices of securities, prices of assets, foreign exchange rates, price or rate indexes, credit rating or credit indexes or other variables, provided that when it comes to a non-financial variable, this variable is not specific to one of the contractual parties. Insurance contracts can also transfer financial risk to some extent.

Contracts where the transfer of risk from the policyholder to the Group is not significant are classified as investment contracts.

Both insurance and investment contracts may contain discretionary participation features. A contract with a discretionary participation feature is a contractual right held by a policyholder to receive as a supplement to guaranteed minimum payments, additional payments that are likely to be a significant portion of the total contractual payments, and whose amount or timing is contractually at the discretion of the issuer and that are contractually based on:

- the performance of a specified pool of contracts or a specified type of contract,
- realised and/or unrealised investment returns on a specified pool of assets held by the issuer or
- the profit or loss of the company that issues the contracts.

The discretionary element of those contracts is accounted for as a liability within the mathematical provision. The provision for discretionary bonus within the mathematical provision may comprise amounts arising in relation to participating policies, for which the allocation of funds has not been determined at the reporting date. When the allocation of funds is determined, appropriate transfers are made out of this fund.

At the reporting date the amount of provisions for discretionary allocation of profit for the Company amounts to HRK 28,453 thousand (2016: HRK 33,480 thousand), and for the Group of HRK 30,407 thousand (2016: HRK 35,382 thousand).

2.33. Segment reporting

A segment is an integral part of the Company that carries out business activities from which it can earn income or have expenses incurred, including income and expenses relating to transactions with other constituents of the Company, whose business results are regularly reviewed by the chief operating decision maker. The review is carried out in order to make decisions about resources to be allocated to a particular segment and to assess its performance, and for which there is separate financial information. Segments of the Group and the Company include the life insurance and non-life insurance segments.

Distribution of costs between life and non-life insurance segments

Investment income, realized and unrealized profits and losses, expenses and compensations arising from non-life insurance, are distributed to the non-life segment.

Investment income, realised and unrealised profits and losses, expenses and compensations related to life insurance are included directly in the life insurance segment.

Income and expenses from investments, realized and unrealized profits and losses, expenses and compensations arising from the investment of capital and reserves are distributed to life and non-life segments depending on the allocation of the related assets or shares in the Group's provisions.

Throughout the year, a significant amount of direct administrative costs are directly debited to life and non-life insurance segments. The Group allocates administrative costs that cannot be allocated directly to life or non-life insurance on the basis of an analysis of the time spent by the administration employee on life-insurance and non-life insurance matters. The allocation of stated costs within a particular segment to the corresponding type of insurance is made on the basis of the share in the gross premium policy of the appropriate type of insurance. Commissions are recorded separately to the life and non-life insurance segments.

Allocation of capital, reserves and assets

Property and equipment, intangible assets and investment property are allocated to the non-life segment, unless directly related to life. Financial investments are allocated in accordance with sources of funding. Provisions are allocated according to the source of related financial assets while legal and other provisions are allocated to each segment based on the results of the related segment. Other receivables and liabilities are allocated to those segments from which they arise.

2.34. Main sources of uncertainty related to assessments and key accounting estimates in applying the Group's accounting policies

/i/ Impairment losses on loans and receivables

The need for impairment of assets booked by amortised cost is evaluated as described in Note 2.16./iii/ impairment of financial assets. The provision for impairment of a certain receivable is based on the Management's best estimate of the current value of expected future cash flows.

In their evaluation of such cash flows, the Management assesses the debtor's financial position and estimated fair value of insurance instruments. Any asset which has undergone impairment is evaluated separately and the function of credit risk helps to independently approve a recovery strategy and assessment of realizable cash flows.

The gross amount of loans and receivables, and the rate of recognised impairment loss at the end of the year are as follows:

| | Company | Company | Group | Group |
|--------------------------|--------------|--------------|--------------|--------------|
| | 31 Dec. 2017 | 31 Dec. 2016 | 31 Dec. 2017 | 31 Dec. 2016 |
| Gross exposure (HRK'000) | 772,163 | 494,667 | 464,682 | 517,616 |
| Impairment rate (%) | 34% | 24% | 56% | 44% |
| | | | | |

The change in the impairment rate by 1 pp on the gross amount of the above loans and receivables would lead to an increase/reversal of impairment in the amount of HRK 7,772 thousand (31 December 2016: HRK 4,947 thousand) for the Company and HRK 4,647 thousand (2016: HRK 5,176 thousand) for the Group.

/ii/ Uncertainty of estimates pertaining to the forming of reserves

The most significant assessments in terms of the Group's financial statements pertain to the forming of reserves. In the forming of reserves the Group applies regulations issued by HANFA (Croatian Financial Services Supervisory Agency). The Group's staff includes certified actuaries. The Management believes that the current level of technical provisions is sufficient.

The Group forms reserves for unexpired risks arising from non-life insurance where it is expected that the claims and administrative expenses likely to arise upon the expiry of the financial year for contracts concluded before that date will exceed the unearned premium from such contracts.

Expected cash flows relating to claims and expenses are estimated on the basis of experience of the previous contract term and adjusted for significant individual losses which are not expected to recur. The liability adequacy test was performed on all types of insurance. The Management believes that the current amount of provisions is sufficient.

Insurance risk management is described in detail in Note 2.35, while the reserves for insurance contracts are analysed in Note 2.21. The sensitivity analysis of technical provisions is presented in Note 2.35.

2.35. Insurance risk management

Underwriting risk pertains to the risk that may arise if actual payment of claims and compensations exceed the net book amount of insurance liabilities due to coincidence, error and/or change in circumstances. Underwriting risk includes the risk of the occurrence of a loss event, risk of determining the amount of premium (setting the tariff), the risk of forming provisions and the risk of reinsurance.

Premium risk is present at the moment of issuing the policy, before the insured event occurs. There is a risk that the costs and losses which may occur might be greater than the premiums received. The provision risk represents the risk of having the absolute amount of technical provisions wrongly assessed or of having the actual losses vary around the statistical mean value. Non-life insurance sales risk also includes the risk of disaster which arises from highly extraordinary events which are not sufficiently covered by the premium risk or provision risk. Life insurance sales risk includes biometrical risk (which involves mortality, longevity, risk of becoming ill or disabled) and the risk of withdrawal. The risk of withdrawal represents a higher or lower rate of withdrawal from policies, interruptions, changes in capitalization (cessation of payments of premium) and surrender.

The Group manages its underwriting risk through underwriting limits, approval procedures for transactions that involve new products or that exceed set limits, through tariff determination, product design and management of reinsurance. The underwriting strategy aims at diversity which will ensure a balanced portfolio and which is based on a large portfolio of similar risks for several years, which reduces the variability of results. As a rule, all non-life insurance contracts are concluded on a yearly basis and the policyholders have the right to decline renewal of contract or to change the contract terms upon renewal. The Group transfers a portion of the risk to reinsurance in order to control its exposure to losses and protect capital resources. The Group purchases a combination of proportional and non-proportional reinsurance contracts to reduce the net exposure to a particular risk depending on the type of insurance.

Underwriting risk in the Group is monitored by the actuaries within the scope of their tasks and the Risk Management Department, in agreement with them, takes the indicators in order to include the risks in the risk management process at the overall Group level.

A report on the adequacy of provisions, insurance premium and retention is submitted by the appointed certified actuary.

Concentration of insurance risk

A key aspect of underwriting risk is that the Group is exposed to is the degree of underwriting risk concentration which determines the extent to which a particular event or a series of events may affect the Group's liabilities. Such concentrations may arise from a single insurance contract or through a number of related contracts which may result in significant commitments. An important aspect of the insurance risk concentration is that it may arise from the accumulation of risk through different types of insurance.

Concentration risk may arise from events that are not frequent but with considerable consequences such as natural disasters, in situations where the Group is exposed to unexpected changes in trends, for example unexpected changes in human mortality or in policyholder behaviour; or where significant litigation or regulatory risks could cause a large single loss, or have a pervasive effect on a large number of contracts. The risks underwritten by the Group are primarily located in the Republic of Croatia.

The concentration of insurance risk before and after reinsurance in relation to the type of accepted insurance risk is shown below with reference to the carrying value of claims and benefits (gross and net of reinsurance) arising under the insurance contract:

| Company | | 31 Dec. 2017 | | | 31 Dec. 2016 | |

The Management believes that the non-life insurance has no significant exposure to any client group insured by social, professional, generation or similar criteria. The greatest likelihood of significant losses could arise from catastrophic events, such as floods, hail, storms or earthquake damage. The techniques and assumptions that the Group uses to calculate these risks include:

- Measurement of geographical accumulations,
- Assessment of probable maximum losses,
- Excess of loss reinsurance.

The table below presents reinsurance coverage and retention of the Company by type of insured event as at 31 December:

| - | | | | |
|-------------------------------|----------------------|--------------|----------------------|--------------|
| _ | 31 Dec. 2017 | 31 Dec. 2017 | 31 Dec. 2016 | 31 Dec. 2016 |

Non-life insurance

The basic indicator of underwriting risk is the claims (loss) ratio. The following tables present claims ratios, cost ratios and combined ratios as well as the claims ratio net of reinsurance.

Comparison of claims ratio and costs for 2017 and 2016:

| | Company | Company | Group | Group |
|--------------------|--------------|--------------|--------------|--------------|
| Non-life insurance | 31 Dec. 2017 | 31 Dec. 2016 | 31 Dec. 2017 | 31 Dec. 2016 |
| Claims ratio | 56.24% | 58.19% | 54.55% | 53.93% |
| Cost ratio | 37.15% | 37.21% | 43.04% | 42.12% |
| Combined ratio | 93.39% | 95.40% | 97.59% | 96.05% |
| Claims ratio, net | 58.99% | 63.07% | 56.57% | 55.81% |

Note: The fair value estimation is set out in Note 25.8. Analysis of claim (loss) ratios, cost ratios and combined ratios

Life insurance

The primary risks in life insurance are interest rate risk and biometrical risks. Interest rate risk is processed through market risks, and biometrical risks are monitored on the basis of actuarial analyses.

Analysis of mathematical provisions according to guaranteed interest rate for the Company is as follows:

| Interest included in the tariff | Mathematical provisions* | | Mathematical provisions* | |
|---------------------------------|--------------------------|-------|--------------------------|-------|
| is in the range of | as at 31 Dec. 2017 | Share | as at 31 Dec. 2016 | Share |
| | in HRK'000 | % | in HRK'000 | % |
| [1, 3] | 983,422 | 42% | 888,457 | 38% |
| [3, 4] | 897,565 | 39% | 954,825 | 41% |
| [4, 5] | 434,999 | 19% | 504,156 | 21% |
| [5, 6] | 2,437 | 0% | 2,590 | 0% |
| | 2,318,423 | 100% | 2,350,028 | 100% |

^{*} The mathematical provision is the mathematical provision for agreed sums and mathematical provision for additional sums.

The analysis of mathematical provisions for the Group according to guaranteed interest rate is as follows:

| Interest included in the | Mathematical provisions* | | Mathematical provisions* | |
|---------------------------|-----------------------------|-------|--------------------------|-------|
| tariff is in the range of | as at 31 Dec. 2017 | Share | as at 31 Dec. 2016 | Share |
| | in HRK'000 | % | in HRK'000 | % |
| [1, 3] | 1,127,172 | 42% | 943,621 | 36% |
| [3, 4] | 1,121,655 | 42% | 1,183,252 | 45% |
| [4, 5] | 436,536 | 16% | 505,503 | 19% |
| [5, 6] | 2,438 | 0% | 2,590 | 0% |
| | 2,687,801 | 100% | 2,634,966 | 100% |

^{*} The mathematical provision is the mathematical provision for agreed sums and mathematical provision for additional sums.

The table above shows the mathematical provision according to guaranteed interest rates. The yield on life insurance investment is presented in the following table and it is sufficient to cover the required interest for the life insurance portfolio.

Yield on mathematical provision

| Company | 2017 | 2016 | 2015 |
|---|------------|------------|------------|
| | in HRK'000 | in HRK'000 | in HRK'000 |
| Average balance of mathematical provision | 2,334,225 | 2,308,194 | 2,169,108 |
| Yield on investment in mathematical provision | 128,590 | 94,062 | 100,904 |
| Annual yield on mathematical provision | 5.51% | 4.08% | 4.65% |
| Average annual yield on mathematical provision for the past 3 years | 4.75% | 4.81% | 5.45% |
| Group | 2017 | 2016 | 2015 |
| | in HRK'000 | in HRK'000 | in HRK'000 |
| Average balance of mathematical provision | 2,742,420 | 2,570,256 | 2,393,188 |
| Yield on investment in mathematical provision | 143,867 | 103,833 | 111,382 |
| Annual yield on mathematical provision | 5.25% | 4.04% | 4.65% |
| Average annual yield on mathematical provision for the past 3 years | 4.65% | 4.79% | 5.38% |

The sensitivity of the present value of future profits to changes in significant variables

Profit or loss and insurance liabilities are mainly sensitive to changes in mortality, rates costs and the discount rate used for the purposes of the liability adequacy test.

The Group assessed the impact of changes in key variables that may have a material effect on the present value of future profits (PVFP) at the end of the year. For each period, the projection is the calculated profit (vector profit), and PVFP is calculated as the present value of profits with a discount rate risk.

The table below shows the sensitivity analysis for life insurance.

| | Company | Company | Group | Group |
|---------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| | 2017 | 2016 | 2017 | 2016 |
| | in HRK'000 | in HRK'000 | in HRK'000 | in HRK'000 |
| | Change in liabilities | Change in liabilities | Change in liabilities | Change in liabilities |
| Interest rate -0.5% | 76,916 | 91,526 | 76,305 | 98,326 |
| Mortality +10% | 3,137 | 3,566 | 2,223 | 3,800 |
| Expenses +10% | 20,940 | 27,565 | 19,405 | 29,166 |

For life assurance contracts that cover policyholder's death, there is no significant geographical concentration of risk, although the concentration of the amount at risk may impact the ratio of insurance payment on the portfolio level. Amounts at risk for life assurance are as follows:

| Company | 2017 | | 2016 | |
|---------------------------------------|------------|--------|------------|--------|
| Insurance type | in HRK'000 | % | in HRK'000 | % |
| Life assurance - traditional products | 3.184.286 | 94,21 | 3.240.941 | 97,38 |
| Unit-linked life assurance products | 195.808 | 5,79 | 87.329 | 2,62 |
| As at 31 December | 3.380.094 | 100,00 | 3.328.270 | 100,00 |
| | | | | |
| Group | 2017 | | 2016 | |
| Insurance type | in HRK'000 | % | in HRK'000 | % |
| Life assurance - traditional products | 5,221,099 | 96.36 | 4,947,260 | 98.26 |
| Unit-linked life assurance products | 196,989 | 3.64 | 87,456 | 1.74 |
| As at 31 December | 5,418,088 | 100.00 | 5,034,716 | 100.00 |

Tables for long-term insurance contracts are presented below, and provide an overview of the concentration of risk through nine groups of contracts grouped by sum insured per policy.

| | Company | , | Group Total sum insured before | | |
|------------------------|------------------------|--------------------------------------|--------------------------------|--------|--|
| | | | | | |
| Sum insured per policy | Total sum insured befo | Total sum insured before reinsurance | | ce | |

| 250.001 - 500.000 | 236,774 | 4.3 | 261,948 | 3.5% | |
| > 500.001 | 133,618 | 2.5 | 145,646 | 2.0% | |
| As at 31 December 2016 | 5,502,394 | 100.00 | 7,444,595 | 100.0% | |

The Group applies the calculation of the present value of future profits or PVFP for the purposes of managing insurance risk sensitivity. The base run refers to the calculation of liabilities using assumptions for the best estimate calculation. The base run represents the calculation by applying the assumptions set out in Note 2.36 during the liability adequacy test. For each policy income from premiums and investments is calculated, and costs are calculated on the basis of administrative costs and claims expenses.

Changes in variables represent reasonable possible changes which, had they occurred, have led to significant changes in insurance liabilities at the reporting date. The reasonably possible changes represent neither expected changes in variables nor worst case scenarios. Changes in each variable were analysed, whereby all other assumptions remained unchanged, and changes in value of the underlying assets were ignored.

The sensitivity to changes in mortality was calculated by reduction in mortality for pension products by 10% and an increase in mortality for other products by 10%, while the sensitivity to changes in costs was calculated by increasing the costs of portfolio maintenance by 10%.

The PVFP results show that changes in interest rates have the most significant effect on profit or loss and the amount of technical provisions.

Non-life insurance

In non-life insurance variables which would have the greatest impact on insurance liabilities relate to legal claims from auto insurance liability. Obligations relating to judicial damages are sensitive to legal, judicial, political, economic and social trends. The Management Board believes that it is not practicable to quantify the sensitivity of non-life insurance to changes in these variables.

2.36. Principal assumptions that have the greatest effect on recognised insurance assets, liabilities, income and expenses

/i/ Non-life insurance

On the balance sheet date provisions are created for the estimated final cost of settling all claims resulting from events occurred by that date, whether reported or not, together with relevant costs of processing such claims, decreased by amounts already paid. The liability for reported but unsettled claims is estimated separately for every individual claim, taking into consideration the circumstances, available information from the claims adjuster and historical evidence of amounts of similar claims. Individual claims are regularly examined and provisions are regularly updated when new information is available. The assessment of provision for incurred, but unreported losses (IBNR) are generally subject to a greater degree of uncertainty than the provision for reported losses. IBNR provisions are estimated by the Company's actuaries.

Depending on the feature of each insurance type, the Group's portfolio and the form and quality of available data, IBNR provisions are formed using the most appropriate model which is based on deterministic or stochastic methods whose basis is the claims triangle. In order to describe as best as possible future claims development, the selected model may contain one or a combination of several methods.

IBNR provisions are formed according to the lines of business, i.e. homogeneous risk groups.

For long-tail claims, the level of provision greatly depends on the assessment of claims development for which there is historical data until the final development. The residual factor of claims development is prudently assessed by using mathematical methods of curves which serve as projections of observed factors or which are based on actuarial assessment.

The actual method which is used depends on the year of claim occurrence and the observed historical development of claims. To the extent that these methods use historical claim rates, the past pattern of claim rates is assumed to recur in the future. There are reasons for partial fulfilment of the above so the methods should be modified. Possible reasons may be:

- economic, political and social trends (which cause a different level of inflation than expected);
- changes in the combination of the types of insurance contracts which are acquired;
- random variations, including the effect of major losses.

IBNR provisions are initially estimated in gross amount and a special calculation is performed in order to assess the reinsurance portion.

Discounting

Except for rental claims, non-life insurance provisions are not discounted. The provisions for liability insurance which are payable in annuities are determined as the current value of future liabilities based on a risk-free interest rate curve (EIOPA_RFR last issued in 2017), the annual rate of adjustment of the rent and the Mortality Tables for the Republic of Croatia for the period from 2010 - 2012.

/ii/ Life insurance

Mathematical provisions are calculated by the net prospective method using rational actuarial assumptions, in accordance with the guidelines issued by HANFA. The guaranteed technical interest rate in insurance policies ranges from 1 % to 6 %, depending on the original (historic) tariff.

In the case of death and survival, policyholders are entitled to a share in the Company's profit realised by life insurance funds management. Shares in profit are calculated once a year, at the earliest at the end of the first or second year of the insurance term, depending on the tariff. The amount of the share in the profit is determined by the Management Board.

The Company uses mortality tables for Croatia for the period 2010 to 2012 for the calculation of mathematical reserves. For the purpose of the calculation of mathematical reserves for insurance contracts concluded before 2010, an interest rate of 3.25% or 3% was used (the maximum rate prescribed by HANFA is 3.3%), for insurance contracts concluded in 2010 the interest rate used was 3% and 2.75% (the maximum rate prescribed by HANFA is 3%), for insurance contracts concluded after 2010 until 30 June 2016, the interest rate used was 2.75%, 2.25%, 1.7%, 1.5% and 1% (the maximum rate prescribed by HANFA is 2.75%) and for insurance contracts concluded after 01/07/2016, the interest rate used was 1.7%, 1.5% and 1% (the maximum rate prescribed by HANFA is 1.75% for contracts with a currency clause and 2% for contracts in HRK).

Profit or loss and equity sensitivity to changes in significant variables

Profit or loss and insurance liabilities are mainly sensitive to changes in the rate of investment and the rate of costs estimated for the calculation of the liability adequacy.

Terms and conditions of insurance contracts that have a significant effect on the amount, duration, and uncertainty of future cash flows

The Group offers different types of non-life insurance, mainly motor vehicles, property, liability insurance, marine insurance, transport insurance, and accident insurance. The main source of uncertainty affecting the amount and timing of future cash flows arises from the uncertainty of the occurrence of future insured events as well as the uncertainty associated with their amounts. The amount payable under individual claims is limited by the insured amount as established in the insurance policy.

Other significant sources of uncertainty related to non-life insurance result from legislation that entitles policyholders to report a claim before the statute of limitation, which occurs three years from the first notification of the claim, but not later than five years from the beginning of the year after the year of occurrence. This stipulation is particularly important in cases of permanent disability under accident insurance, due to difficulties in estimating the period between the occurrence of the accident and the confirmation of permanent consequences thereof.

The portfolio of non-life insurance does not include products that warrant unlimited coverage, while the maximum amount for which the insurer may be held liable per each policy due to the occurrence of one loss event is always limited by the contractually agreed insured sum. The exception to this rule is motor vehicles liability insurance in the Green Card Insurance System member states that have unlimited coverage. Since legal provisions in motor vehicles liability insurance prescribe the application of insured sums in the state where the damage occurred, this risk cannot be completely avoided, but it can be transferred through appropriate reinsurance contracts.

2.37. Financial risk management

The Group's primary objective in financial and underwriting risk management is to maintain a level of capital which is adequate for the scope and types of insurance it transacts, and with due consideration of the risks it is exposed to. The Management recognizes the importance of having of an efficient and effective risk management system.

Competent regulatory bodies control the Company's and Group solvency in order to ensure that there is coverage for liabilities arising from possible economic changes or natural disasters.

The Group actively manages its assets by using an approach which balances quality, diversification, harmonization of assets and liabilities, liquidity and return on investments. Management examines and approves portfolios, determines the limits and supervises the process of managing assets and liabilities. Due attention is also given to the compliance with the rules established by the Insurance Act.

Transactions with financial instruments result in the Group assuming financial risks. These risks include market risk, credit risk and liquidity risk. Each of these risks is described below, together with a summary of the methods used by the Group to manage such risks.

Market risk

Market risk includes currency risk, interest rate risk and price risk. Market risk is the fluctuation risk of future cash flows fair value of financial instruments resulting from changes in market prices.

Currency risk - the risk of fluctuation of fair value or cash flows under financial instruments resulting from changes in foreign currency exchange rates.

The Group is exposed to the risk of exchange rate fluctuations through its transactions in foreign currencies, mostly in euros. The Company is exposed to currency risk through its investments in debt securities, deposits, loans and other investments, and through premiums, claims and technical provisions under insurance policies with a currency clause. The Group manages foreign exchange risk by attempting to reduce the difference between assets and liabilities denominated in foreign currency or with a currency clause. Investments for covering mathematical provisions are mostly denominated in Euro, since most of the mathematical provisions are also denominated in Euro. An analysis of the sensitivity of financial assets to the exchange rate fluctuations is given below:

b) Interest rate risk

Interest rate risk is the risk of fluctuation in fair value or cash flows under financial instruments resulting from changes in market interest rates. The Group is exposed to interest rate risk on the basis of financial instruments whose value is sensitive to interest rate changes.

Interest rate changes do not affect the level of technical non-life provisions, while the mathematical life reserve is discounted using the technical rate of interest of a particular product or the maximum interest rate stipulated by HANFA, which cannot be higher than the weighted average yield on mathematical reserve assets in the last three years.

The Group monitors this exposure through periodic reviews of its asset and liability positions. The Group intends to harmonize future earnings from such assets with liabilities under insurance by purchasing state bonds. However, considering the relatively short duration of such bonds and longer period of duration of liabilities under life insurance, the Group is exposed to interest rate risk.

An analysis of the sensitivity of financial assets to a change in market interest rates is given below:

| | | 2017 | 2016 | | | |
|--|---------------------|-------------------|----------------------------------|--------------------------------|--|--|
| | Impact on Impact on | | Impact on profit/loss before tax | Impact on comprehensive income | | |
| | in HRK'000 | in HRK'000 | in HRK'000 | in HRK'000 | | |
| Company | | | | | | |
| Change in interest rate by +/- 100 bps | - | (180,748)/180,748 | - | (82,350)/82,350 | | |
| Group | | | | | | |
| Change in interest rate by +/- 100 bps | (3,136)/3,136 | (186,337)/186,337 | (2,655)/2,655 | (94,037)/94,037 | | |

c) Other price risks

The equity securities risk is caused by the fluctuation of fair value or cash flows in connection with financial instruments resulting from changes in market prices (which are not the result of interest rate risk or foreign exchange risk), whether this involves changes caused by factors relatable to an individual financial instrument or its issuer or if there are other factors which effect all similar financial instruments being traded in the market.

The marketable equity securities portfolio, which is presented in the balance sheet at fair value, exposes the Group to this risk. The Group's portfolio comprises securities of various issuers, and the concentration risk in any individual company is monitored and limited by legal requirements and the adopted limits.

The Group assesses, or measures, and controls the exposure to market risk by monitoring exposure to investment, establishing the limits and powers of investment, and through a series of statistical and other quantitative risk measures.

The comprehensive system of market risk management is prescribed by a series of internal acts of the Group and the Market Risk Management Policy as an umbrella document.

Credit risk

Credit risk is the risk that one contractual party to a financial instrument might cause the other party to suffer financial losses as a result of failure to fulfil its obligations.

The Group is exposed to credit risk through the following financial assets:

- reinsurance share in claims provisions
- receivables from reinsurance under settled claims
- receivables from policyholders
- deposits and given loans
- debt securities (bonds and commercial bills)
- receivables from insurance brokers and other receivables
- cash at bank

This risk is defined as the potential decrease in market value resulting from adverse changes in the debtor's ability to repay the debt.

The Group manages this risk by a rigorous up-front analysis of credit risk and exposure monitoring, regular reviews carried out by the Management and regular meetings held to monitor the credit risk development. The Management has adopted a Credit Risk Management Policy and continuously monitors exposure to credit risk. Assessments of creditworthiness of all policyholders are made, and collaterals are collected prior to payment of granted loans or renewal of such loans. Collaterals are in accordance with the Insurance Act.

^{*} Loans and receivables with no rating relate to loans to related parties, domestic companies with no rating and retail loans that are insured.

^{**}Other banks of reputable banking groups in the EU relate to local banks that have no rating, but their parent companies which are EU banks have the following ratings for 2017: BBB, BBB+, BBB-, A (2016: BBB-, BBB, BB+).

Liquidity risk

Liquidity risk is the risk that a sudden and unexpected withdrawal of liabilities might require the Group to liquidate assets in a short time and at a low price. Liquidity risk arises from the Group's financial activities and management of positions. It includes both the risk of being unable to fund assets at appropriate maturities and rates and the risk of being unable to liquidate an asset at a reasonable price and in an appropriate timeframe. The Group has a portfolio of liquid assets as a part of liquidity risk management strategy, which ensures continuation of business and satisfies legal requirements.

Legal claims for damages have been met in a timely manner. The Finance Department monitors the inflows and outflows on a daily basis, and develops monthly plans as well as scenarios of deteriorated liquidity. Liquidity risk is taken into account in the assessment of matching assets and liabilities.

The following table shows the amounts of contracted discounted cash flows for financial assets and, for insurance liabilities, the estimated maturity of the amounts recognized in the statement of financial position.

Fair value

Fair value is the amount that should be received for an asset sold or paid to settle a liability in an arm's length transaction between market participants at the value measurement date. Fair value is based on quoted market prices, where available. If market prices are not available, fair value is estimated by using discounted cash flow models or other appropriate pricing techniques. Changes in assumptions on which the estimates are based, including discount rates and estimated future cash flows, significantly affect the estimates. Therefore, at this point the estimated fair value cannot be achieved from the sale of a financial instrument. The fair value of investments at amortised cost is presented below:

| | | 31 Dec. 2017 | | 3 | 31 Dec. 2016 | | | |
|-----------------|-------------------|--------------|------------|----------------|--------------|------------|--|--|

Methods of assessment or assumptions in determining fair value

For measuring the fair value the Group takes into account the IFRS fair value hierarchy rules that reflect the significance of inputs used in the assessment process. Each instrument is assessed individually and in detail. The levels of the fair value hierarchy are determined on the basis of the lowest level and the input data that are important for determining the fair value of the instrument.

The table below analyses financial instruments carried at fair value using the valuation method. Different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

The Company's assets measured at fair value as at 31 December 2017 are presented as follows:

| | Level 1 in HRK'000 | Level 2 in HRK'000 | Level 3 in HRK'000 | Total in HRK'000 |
|---|-----------------------|-----------------------|-----------------------|----------------------------|

| Debt securities | - | - | - | - |
| Investment funds | 368,619 | - | - | 368,619 |
| Financial assets at fair value through profit or loss | 381,050 | - | - | 381,050 |
| Total assets at fair value | 2,371,220 | 41,625 | 1,052,527 | 3,465,372 |

The Company has adopted IFRS 13, pursuant to which it is required to disclose the fair value hierarchy of financial assets that are not measured at fair value as well as a description of valuation techniques and inputs used.

Loans and receivables (including bank deposits) have been reported at amortised cost, less impairment. Although they have been obtained on the basis of a fixed interest rate, the Management Board believes that, due to their specific features, the book value of these instruments is not significantly different from their fair value, under the assumption that all payments arising from exposures without impaired value will be collected as agreed and without taking into account any future losses.

Financial liabilities are recorded at amortised cost. Although they have been agreed on the basis of a fixed interest rate, the Management Board believes that, due to the repayment of majority of liabilities within few days after the balance sheet date, the carrying value of these instruments is not significantly different from their fair value.

The fair value of loans is estimated on the basis of inputs that are not commercially available rates and would therefore be classified as level 3 in the fair value hierarchy. Investments with available market prices that are classified in the portfolio of held-to-maturity investments would be classified as level 1. The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

The fair value of held-to-maturity investments is based on the available market prices and is classified as level 1 in accordance with IFRS 13.

The Group's assets measured at fair value as at 31 December 2017 are presented as follows:

| | Level 1 in HRK'000 | Level 2 in HRK'000 | Level 3 in HRK'000 | Total in HRK'000 |

| | | | | |

Fair value of properties

An independent valuation of the Company's investment property was conducted by external valuers in order to determine the fair value as at 31 December 2017 and 31 December 2016.

Estimates of fair value for real estate activities were carried out by external valuers in 2014, whereas in 2017 the Group reviewed whether there were any impairment indications and recognized impairment of the property for activities where there was a significant difference in its net book value relative to the recoverable amount.

Valuation techniques used for determining fair value on Level 3

The fair value of investment property is derived primarily by applying a sales comparison and income approach, and sometimes lacking information on market parameters by applying the cost method, depending on a particular property.

The fair value of the property for own use for was carried out primarily by applying the income method.

The most significant inputs in the valuations were prices or rental income per square meter, generated based on comparable properties in the immediate vicinity and then adjusted by differences in key characteristics.

Information on fair value measurement of investment property which included significant parameters that are not available on the market (level 3)

| Description | Fair value as at 31 December 2017 | Fair value as at 31 December 2016 | Valuation technique(s) | Unavailable parameters | Range of unavaila | able parameters |
|-------------|--|--|----------------------------|----------------------------|-------------------|-----------------|
| | | | Income | Capitalization | | |
| | | | approach | rate | 6.5%-10% | 6.5%-10% |
| Company | 414.022 | 440 520 | | Building unit price per m2 | | |
| Company | 414,923 | 448,528 | Cost approach | (HRK) | 61-6,981 | 45-5,200 |
| | | Sales comparison | Average price per m2 (HRK) | 1-24,731 | 2 15 402 | |
| | | | approach | · · · · · | 1-24,731 | 3-15,402 |
| | | | Income approach | Capitalization rate | 6.5%-11% | 6.5%-11% |
| Other Group | | | | Discount rate | 10%-11% | 10% |
| companies | 488,464 | 335,631 | Cost approach | Building unit price (HRK) | 5,453-5,723 | 6,330 |
| | | | Sales | Building unit | | |
| | | | comparison | price per m2 | | |
| | | | approach | (HRK) | 469-8,555 | 1,096-24,700 |
| Total | 903,386 | 784,159 | | | | |

A significant increase (decrease) in the average price per m2, with other variables held constant, would have an impact on a significant increase (decrease) in the fair value of investment property. A significant increase (decrease) in the discount rate, with other variables held constant, would have an impact on a significant decrease (increase) in the fair value of investment property.

There is no significant interaction between invisible inputs used in estimates that would have a significant effect on fair value.

2.38. Capital management

The Company's objectives when managing capital are:

- Ensuring the Company's going concern;
- Compliance with Croatian and EU laws and subordinate legislation, regulations and instructions of the regulatory body governing capital management;
- Maintaining a high level of capitalization and consequently financial stability, thus providing an adequate level of security to the insurers and the insured party;
- Achieving efficient and optimal capital allocation as well as maximizing return on capital;
- Ensuring continuous compliance of the Company's and the Group's business strategy with risk
 appetite and targeted levels of capital adequacy;
- Providing a high level of capitalization or sufficient surplus capital for further investment in the development and growth of the Company and the Group.

The Company and the Group are subject to the statutory and subordinate regulations of the Republic of Croatia and the EU governing capital management, which also define the minimum levels of capital that the Company and the Group must maintain (regulatory framework Sovereignty 2 applied since 2016). The above-mentioned regulatory framework defines the rules governing the method of calculation and reporting on capital adequacy. In particular, it stipulates that the Company and the Group must at all times maintain acceptable own funds (available capital) in such a manner as to cover the Minimum Capital Requirement (the so-called MCR), as well as the Solvency Capital Requirement SCR).

The Company and the Group comply with the legal and subordinate regulations governing the capital adequacy, as follows:

| | Regulatory requirement | Company | Compan | |
|--------------|------------------------|---------------|----------------|--|
| | | 31 Dec. 2017* | 31 Dec. 2016** | |
| SCR ratio*** | >100% | 261% | 236% | |
| MCR ratio*** | >100% | 905% | 827% | |

| | Regulatory requirement | Group | Group | |
|--------------|------------------------|---------------|----------------|--|
| | | 31 Dec. 2017* | 31 Dec. 2016** | |
| SCR ratio*** | >100% | 215% | 194% | |
| MCR ratio*** | >100% | 631% | 541% | |

^{*} Temporary data for the last reference date for which the data is available at the time of this Report are presented. The Company and the Group will disclose the final data for 31 December 2017 as part of the Solvency and Financial Condition Report, which will be published on the Company's website no later than 6 May 2018 for the Company, or by 17 June 2018 for the Group.

The Company and the Group regularly monitor capital adequacy and conduct stress tests of capital and its adequacy in order to prevent the possibility of capital shortages in time.

^{**} Data presented for 31 December 2016 the data are published in the Solvency and Financial Condition Report of CROATIA osiguranje for 2016 and the Solvency and Financial Condition Report of CROATIA osiguranje Group for 2016.

^{***} The SCR ratio is defined as the ratio of the amount of total eligible own funds to cover the required solvency capital (SCR) and the amount of solvent capital required. The MCR ratio is defined as the ratio of the amount of total eligible own funds to cover the Minimum Capital Requirement (MCR) and the amount of minimum required capital.

3. Segment reporting

The Company's statement of comprehensive income by segments for the year is as follows:

The measurement of the assets and liabilities segment and the revenues and result segment is based on the accounting policies set out in the notes on accounting policies. Based on the internal management reports, the key performance measure for measurment of profitability of each segment and insurance type identified by the Group is gross written premium and profit before tax.

The Group's main segments are non-life and life. The Group is performing insurance business in segments of non-life and life insurance. Among other important activities, the Group also carries out the operations of managing pension funds, technical examinations and providing medical services of clinics within the segment of non-life.

Segment results, assets and liabilities include items directly attributable to the segment as well as those that are allocated on a reasonable basis.

The main products offered by the reportable segments include:

Non-life:

- Accident insurance
- Health insurance
- Road motor vehicle insurance
- Railroad rolling stock insurance
- Aircraft insurance
- Vessel insurance
- Goods-in-transit insurance
- Insurance against fire and natural disasters
- Other types of property insurance
- Motor liability insurance
- Aircraft liability insurance
- Vessel liability insurance
- Other types of liability insurance
- Loan insurance/credit insurance
- Surety insurance
- Various financial loss insurance
- Travel insurance

Life:

- Life insurance
- Annuity insurance
- Additional insurance with life insurance
- Life or annuity insurance where the policyholder bears the investment risk

13. Income tax

Income tax is calculated in accordance with legal regulations on the tax base, which represents the difference between the realised income and expenditures in the accounting period for which the tax base is determined. The initial tax base was increased by tax non-deductible expenditure and decreased by income in accordance with the tax regulations in effect in the countries of Group members.

| | Company | Company | Group | Group |
|-------------------------------------|------------|------------|------------|------------|
| | 2017 | 2016 | 2017 | 2016 |
| | in HRK'000 | in HRK'000 | in HRK'000 | in HRK'000 |
| | · | | | _ |
| Net deferred tax expense (Note 21) | 13,850 | 25,317 | 13,930 | 26,613 |
| Current tax expense | 19,732 | 16,875 | 35,981 | 55,340 |
| Net income tax expense for the year | 33,582 | 42,192 | 49,911 | 81,953 |

The reconciliation between income tax and the profit before tax reported in the income statement is set out below:

| | Company | Company | Group | Group |
|--|------------|------------|------------|------------|
| | 2017 | 2016 | 2017 | 2016 |
| | in HRK'000 | in HRK'000 | in HRK'000 | in HRK'000 |
| Profit before tax | 184,525 | 93,720 | 303,502 | 257,163 |
| Income tax at 18% (2016: 20%) | 33,214 | 18,744 | 54,630 | 51,433 |
| Non-deductible expenses | 23,958 | 45,092 | 28,192 | 50,742 |
| Tax incentives and income not subject to tax | (23,590) | (21,644) | (32,911) | (20,222) |
| Tax expense for the year | 33,582 | 42,192 | 49,911 | 81,953 |
| Effective interest rate | 18.20% | 45.02% | 16.45% | 31.87% |

As at 31 December 2017, the Company has no tax losses that can be carried forward for covering the Company's future profits. The remaining Group companies have no significant tax losses that can be carried forward to cover future profits.

In accordance with local regulations, the Tax Administration may at any time inspect the Company's books and records within 3 years following the year in which the tax liability is reported and may impose additional tax liabilities and penalties. The Company's Management Board is not aware of any circumstances, which may give rise to a potential material liability in this respect.

14. Earnings per share

| | Group | Group |
|--|-------------|------------|
| | 2017 | 2016 |
| | in HRK'000 | in HRK'000 |
| Profit for the year attributable to the Company's shareholders | 253,103 | 175,835 |
| Dividends of preference shares | (980) | (980) |
| Profit for the year - ordinary shares | 252,123 | 174,855 |
| | | |
| Weighted average of ordinary shares | 420,947 | 420,947 |
| Earnings per share attributable to the Company's shareholders | | |
| Basic and diluted loss per share in HRK | 598.94 | 415.38 |
| | | |

For the purpose of calculating earnings per share, earnings are calculated as the profit for the period attributable to the Company's shareholders less dividends of preference shares. The number of ordinary shares is the weighted average number of ordinary shares in circulation during the year. The weighted average number of ordinary shares used for the calculation of basic earnings per share was 420,947 (2016: 420,947). In addition, since there is no effect of options, convertible bonds or similar effects, the weighted average number of ordinary shares used to calculate diluted earnings per share was the same as the one used to calculate basic earnings per share.

The Group measures investment property in accordance with IAS 40 - "Investment Property", by applying the fair value model. Accordingly, the Group recognises profit or loss arising from changes in the fair value of investment property as profit or loss for the period in which it occurred, based on the appraisal by independent appraisers.

/i/ In 2017, the company CROATIA osiguranje d.d. has merged with its two direct subsidiaries:

- Based on the Merger Agreement, the decision of the General Assembly and the Commercial Court
 Decision, and following the prior approval of the Croatian Financial Services Supervisory Agency, the
 company CROTIA Lloyd d.d. was merged with the company CROTIA osiguranje d.d. as of 3 April 2017.
- Furthermore, based on the Merger Agreement, the decision of the General Assembly and the Commercial Court Decision, and following the prior approval of the Croatian Financial Services Supervisory Agency, the company CROATIA zdravstveno osiguranje d.d. was merged with the company CROATIA osiguranje d.d. as of 3 July 2017.

CROATIA osiguranje d.d. is the entity that has survived the merger. This is a business combination transaction under common controls as all merging companies are businesses in the meaning of IFRS 3, are controlled by the same party and the control is not transitory. No consideration was transferred for this merger as CROATIA osiguranje d.d. holds 100% interest in both subsidiaries.

The transaction is a business combination under common control and was accounted for using the predecessor value method (in accordance with the policy stated in Note 2.5 Consolidation). The carrying amounts of assets and liabilities of CROATIA zdravstveno osiguranje d.d. and Croatia Lloyd d.d. from the consolidated financial statements of CROATIA osiguranje d.d. were used to account for this transaction. The difference between the carrying amount of the investment in subsidiaries (recognised before the merger at cost in the separate FS of CROATIA osiguranje d.d.) and the carrying amount of the net assets of the acquired companies is recognised in equity (in Retained earnings).

The merger was accounted for prospectively from the date of the transaction. The comparatives are not restated, thus the comparatives present only the assets, liabilities, income, expenses of the acquirer CROATIA osiguranje d.d., whereas assets, liabilities, income, expenses of the acquirees (CROATIA zdravstveno osiguranje d.d. and CROATIA Lloyd d.d.) are incorporated only from the date of the merger (3 April 2017 and 7 July 207 for CROATIA Lloyd and CROATIA zdravstveno osiguranje, respectively).

/iii/ At 18 October 2017, the Company acquired 100% of shares with voting rights of the company BNP Paribas Cardif osiguranje d.d. The principal activity of the acquired company is non-life insurance and as part of its portfolio offers services of asset insurance, loan insurance and insurance of various financial losses. By acquiring shares in BNP Paribas Cardif osiguranje d.d., the Company strengthened its business and market position on the Croatian market in accordance with the business strategy of market growth.

Details on the fair value of identifiable assets and liabilities of BNP Paribas Cardif osiguranje d.d. at the acquisition date, gain on bargain purchase and the purchase consideration are shown below:

| | in HRK'000 |
|--|------------|
| Assets | |
| Intangible assets | 109 |
| Deferred acquisition costs | 1,107 |
| Property and equipment | 127 |
| Available-for-sale investments | 140,804 |
| Reinsurance share in technical provisions | 203 |
| Receivables from direct insurance business | 3,483 |
| Other receivables | 1,056 |
| Cash at bank and cash in hand | 10,947 |
| Liabilities | |
| Unearned premiums, gross amount | (4,410) |
| Mathematical provisions, gross amount | (59,085) |
| Claims provisions, gross amount | (10,105) |
| Provisions for bonuses and discounts, gross amount | (15) |
| Deferred and current tax liability | (1,128) |
| Liabilities from direct insurance business | (1,342) |
| Other liabilities | (1,472) |
| Other accrued expenses and deferred income | (4,726) |
| Total net assets at fair value | 75,554 |
| Gain on bargain purchase | (20,554) |
| Purchase consideration | 55,000 |
| Cash flow on acquisition: | in HRK'000 |
| Cash and cash equivalents acquired | 10,947 |
| Purchase consideration paid in cash | (55,000) |
| Cash flow on acquisition | (44,053) |

Within the Company's strategy and efforts to strengthen the insurance business, the Company has acquired the 100% stake in BNP Paribas Cardif Insurance d.d. The purchase of the acquired company resulted in a gain on bargain purchase, since the fair value of the acquired assets and liabilities exceeds the purchase consideration. The gain on bargain purchase in the amount of HRK 20,554 thousand is recognised in the consolidated statement of comprehensive income within *Finance income*.

In the consolidated income statement of the Group, in the period from 1 October to 31 December 2017, BNP Paribas Cardif osiguranje d.d. contributed HRK 4,825 thousand in revenue and HRK 8,792 thousand in profit before tax. If BNP Paribas Cardif Insurance d.d. has been consolidated on January 1, 2017, the consolidated profit and loss statement would show higher revenues by HRK 19,196 thousand and profit before tax by HRK 19,608 thousand.

In November 2017, BNP Paribas Cardif osiguranje d.d. changed its name to CROATIA osiguranje kredita d.d.

Also, in 2017, the Company acquired 100% of shares with voting rights in the company Auto Maksimir Vozila d.o.o. whose principal activity is insurance representation.

The purchase consideration amounted to HRK 100 thousand and approximately equals the fair value of the acquired company.

During 2017, the Company made a capital contribution to the company Histria Construct d.o.o. in the amount of HRK 200 thousand.

In December 2017, the Company established the company CO Zdravlje d.o.o. by paying registered share capital in the amount of HRK 18 million. The Company's principal activity is providing consultancy and similar services.

CROATIA osiguranje d.d., Zagreb Notes to the financial statements for the year 2017

/iii/ During the year ended 31 December 2017, the Group purchased the remaining portion of the non-controlling interest, i.e. 26% in the subsidiary Poliklinika Ars Medica, Pula. The repurchase of the non-controlling interest had no effect on the change in control in the subsidiary.

The impact of the change in ownership percentage on the equity attributable to the Company's shareholders during the year is as follows:

| | in HRK'000 |
|---|------------|
| Carrying amount of non-controlling interests acquired | 1,317 |
| Consideration paid | (2,000) |
| Excess of consideration paid recognised in equity | (683) |

The Group also purchased an additional 0.6% share in the subsidiary Croatia osigruanje d.d., Mostar in the amount of HRK 136 thousand.

/iv/ During the year ended 31 December 2017, the Group sold its 25.6% share in the associate Brioni d.d., Pula.

The carrying amount of the assets and liabilities of Brioni d.d. at the reporting date preceding the sale was as follows:

| | in HRK'000 |
|-----------------------------------|------------|
| Current assets | 19,448 |
| Non-current assets | 26,154 |
| Current liabilities | (9,664) |
| Non-current liabilities | (10,637) |
| Net assets of associate | 25,301 |
| Attributable to the Group - 25.6% | 6,469 |

Effect of sale on the financial position and profit of the Company and the Group in 2017:

| | Company | Group |
|--|------------|------------|
| | in HRK'000 | in HRK'000 |
| Sales price (consideration received in cash) | 11,074 | 11,074 |
| Investment cost of the Company/Net assets of associate attributable to the Group at the date of sale | (4,259) | (6,469) |
| Gain on sale | 6,815 | 4,605 |

/v/ During the year ended 31 December 2017, the Company sold its 28.34% share in the associate Autoprijevoz d.d. to the company Croatia-Tehnički pregledi d.o.o.

The share was purchased by the company Croatia-Tehnički pregledi d.o.o. which performs the same operating activity as the company being sold. The purpose of the sale is intra-group restructuring for the purpose of better coordination and management of the Group's activities. The sales price is defined on the basis of an independent assessment of the Autoprijevoz d.d. and amounted to HRK 473 thousand, and the Company realised a gain on sale in the amount of HRK 473 thousand.

During 2017, the company Croatia-Tehnički pregledi d.o.o. also purchased a 50.95% share in Autoprijevoz d.d. from a third party in the amount of HRK 854 thousand, whereby the company Autprijevoz d.d. became a subsidiary at the Group level with a total share of 79.29%.

/vi/ In 2017, a lower value was determined as a result of the fair value estimation, and therefore the investments in the following subsidiaries were impaired: Croatia osiguranje d.d., Mostar by an amount of HRK 13,144 thousand, Croatia osiguranje - neživot a.d., Skopje, by an amount of HRK 6,099 thousand and Histria Construct by an amount of HRK 200 thousand. Additionally, investment in associates and participation in joint ventures were impaired in total amount of HRK 1,704 thousand (Note 12.1). Impairment is determined by calculating the recoverable amount of cash flows of an individual subsidiary as a cash-generating unit.

| Vinculated life insurance policies | 29,783 | 3,268 | 85 | 33,136 | 44,889 | 4,139 | 213 | 49,241 | |
| Mortgages and real estate fiduciaries | 8,463 | 161,327 | 220,264 | 390,054 | 196,973 | 39,317 | 182,813 | 419,103 | |
| Other collaterals | 192 | 6 | 41,294 | 41,492 | 669 | 3,067 | 45,535 | 49,271 | |
| | 38,438 | 164,601 | 261,643 | 464,682 | 242,531 | 46,523 | 228,561 | 517,615 | |

The quality of loans mainly depends on the quality of the collateral. The best security instrument is considered the vinculated life insurance policy issued by the Group. Vinculated life insurance policies almost fully cover the loan exposure.

For loans neither past due nor impaired, which are secured by mortgages, mortgages are considered a secondary source of repayment only and do not impact the carrying amount of the loan. However, loans and receivables past due but not impaired would be fully impaired if there were no collaterals.

| Total cash and cash equivalents | 48,374 | 66,199 | 164,781 | 160,006 |

24. Capital and reserves

24.1. Subscribed share capital

The Company's share capital with a nominal value of HRK 601,576 thousand (31 December 2016: HRK 601,576 thousand) is divided among 429,697 shares with a nominal value of HRK 1,400, which have been paid entirely in cash, entered into the register of the Commercial Court in Zagreb.

The shares are marked as follows:

- 307,598 ordinary shares with ticker CROS-R-A;
- 113,349 ordinary shares of the 2nd issue with ticker CROS-R-A;
- 8,750 preference shares with ticker CROS-P-A.

Preference shares provide their holders with the following rights:

- voting rights equal to the holders of ordinary shares;
- dividend payment in the amount of 8% annually on the revalued value of shares, for the year in which an appropriate profit was realised;
- cumulative dividend payment is guaranteed provided that the Company's result enables the payment;
- cumulative dividend payment if the Company's result enables the payment of a higher dividend to all shareholders than the dividend from the previous point, as well as for the years when the liability cannot be settled due to insufficient profit.

The ownership structure as at 31 December 2017 and 31 December 2016 was as follows:

| | | 31 Dec. 2017 | | | 31 Dec. 2016 | |
|----------------------------|-----------|---------------------------------------|--------|-----------|----------------|---------|
| Shareholder | Number | Nominal amount | Equity | Number | Nominal amount | Equity |
| | of shares | of shares in HRK'000 share % of share | | of shares | in HRK'000 | share % |
| ADRIS grupa d.d. | 263,419 | 368,787 | 61.3 | 263,419 | 368,787 | 61.3 |
| CERP/RH | 131,587 | 184,222 | 30.6 | 131,587 | 184,222 | 30.6 |
| Raiffeisenbank Austria d.d | | | | | | |
| custodian account | 19,473 | 27,262 | 4.5 | 19,464 | 27,250 | 4.5 |
| Other shareholders | 15,218 | 21,305 | 3.6 | 15,227 | 21,317 | 3.6 |
| | 429,697 | 601,576 | 100.0 | 429,697 | 601,576 | 100 |

The total majority shareholder percentage as at 31 December 2017 consists of the own share of 61.3% increased by another custodian account owned by the majority shareholder of 4.8%. The percentage of ownership of the majority shareholder did not change compared to 31 December 2016.

24.2. Reserves

| | Company | Company | Group | Group |
|--------------------|--------------|--------------|--------------|--------------|
| | 31 Dec. 2017 | 31 Dec. 2016 | 31 Dec. 2017 | 31 Dec. 2016 |
| | in HRK'000 | in HRK'000 | in HRK'000 | in HRK'000 |
| Legal reserves | 28,490 | 25,915 | 28,490 | 25,915 |
| Statutory reserves | 147,220 | 147,220 | 147,220 | 147,220 |
| Other reserves | 224,740 | 224,739 | 224,740 | 224,739 |
| | 400,450 | 397,874 | 400,450 | 397,874 |

Pursuant to the Companies Act, 5% of profit for the year is allocated to the legal reserve until total legal reserve reaches 5% of the share capital.

Statutory reserves and other reserves were established by distributing profit from previous years.

24.3. Revaulation reserve

The revaluation reserve is presented as follows:

| | Company | Company | Group | Group |
|---|--------------|--------------|--------------|--------------|
| | 31 Dec. 2017 | 31 Dec. 2016 | 31 Dec. 2017 | 31 Dec. 2016 |

| Motor liability insurance | 49.79% | 38.68% | 88.47% | 51.58% | 36.82% | 88.40% |
| Aircraft liability insurance | 63.13% | 30.68% | 93.81% | -38.74% | 31.80% | -6.94% |
| Vessel liability insurance Other types of liability | 6.02% | 42.40% | 36.38% | 21.61% | 40.67% | 62.28% |
| insurance Loan insurance/credit | 68.91% | 35.16% | 104.07% | 71.23% | 36.08% | 107.31% |
| insurance | -54.23% | 47.57% | -6.66% | -13.73% | 38.42% | 24.69% |
| Surety insurance Miscellaneous financial loss | 12.72% | 39.32% | 52.04% | -60.36% | 27.85% | -32.51% |
| insurance | 83.73% | 49.11% | 132.84% | 22.40% | 32.27% | 54.67% |
| Travel insurance | 35.13% | 45.90% | 81.03% | 37.68% | 50.34% | 88.02% |
| Total non-life insurance | 56.24% | 37.15% | 93.39% | 58.19% | 37.21% | 95.40% |

The above ratios are calculated in accordance with the Ordinance on the form and contents of financial and additional statements of insurance and reinsurance companies (Official Gazette No. 37/16) and Instructions for completing the financial and supplementary reports of insurance or reinsurance companies by the Croatian Financial Services Supervisory Agency.

The claims ratio, cost ratio and combined ratio by types of non-life insurance are calculated as follows:

- Claims ratio = (Settled claims, gross amount + Change in provisions for claims, gross amount + Change in other technical provisions, gross amount) / (Gross premium written + Impairment of value and charged value of premium + Change in gross provisions of unearned premiums) * (-100)
- Cost ratio = (Operating expenses (business-related expenses), net + Other insurance-technical income, net of reinsurance + Other technical costs, net of reinsurance) / (Gross premium written + Impairment of value and charged value of premium + Change in gross provisions of unearned premiums) *(-100)
- Combined ratio = claims ratio + cost ratio.

Movements in annual return on mathematical provision

Pursuant to the Ordinance on minimum standards, methods of calculating and guidelines for calculating technical provisions according to accounting regulations (Official Gazette No. 10/16), the maximum interest rate for the calculation of mathematical provision is: 3.3% for insurance contracts concluded before 2010, 3% for insurance contracts concluded during 2010, 2.75% for insurance contracts concluded from 1 January 2011 until 30 June 2016 and 1.75% or 2% for insurance contracts concluded after 1 July 2016 in which the obligations of the insurer and the contractor of insurance are contracted with or without a currency clause, where the interest rate shall not be higher than the average return that the Company realised through investment of mathematical provision in the last three years.

The average return is calculated as a weighted average return from the mathematical provision in the last three years, where the weights represent the average value of mathematical provision during the year.

The average return is calculated as the sum of returns multiplied by the average value of the mathematical provision for the last three full financial years (in annual financial statements, including the year for which mathematical provision is calculated) and then divided by the sum of the average values of the mathematical provision.

The following table shows the movements in the annual return realised from investment of assets covering mathematical provisions for 2017, 2016 and 2015:

| _ | 2015 | 2016 | 2017 |
|--|------------|------------|------------|
| | in HRK'000 | in HRK'000 | in HRK'000 |
| Average balance of mathematical provisions | 2,169,108 | 2,308,194 | 2,334,225 |
| Return on investments from mathematical provisions | 100,904 | 94,062 | 128,590 |
| Rate of annual return on mathematical provisions | 4.65% | 4.08% | 5.51% |
| Average return on mathematical provisions for the past 3 | | | |
| years | 5.45% | 4.81% | 4.75% |

| At 31 December 2017 | - | 48,009 | 38,741 | 27,232 | 113,982 |

/i/ The following assumptions were used for the calculation:

- The employment termination rate for the Company is 5.34% (2016: 5.34%), while for the Group the average is 4.91% (2016: 4.53%)
- An annual salary increase is not expected;
- The present value of the liability is calculated using the discount rate of 1.52% (2016: 2.36%) for the Company and 1.52%-2.75% for the Group (2016: 2.36%-6.15%).

30. Related party transactions

The Company considers that it has an immediate related party relationship with its ultimate parent, the company ADRIS grupa d.d. and the Republic of Croatia (CERP) and companies with majority state ownership, companies under control, under common control or under influence of key management personnel and their close family members in accordance with the definitions contained in International Accounting Standard 24 "Related Party Disclosures" (IAS 24). The Group considers the members of the Management Board and Supervisory Board and directors of departments as key management.

Key related party transactions

The Company pays income tax in the Republic of Croatia, as described in Note 13. The Company also pays personal income tax as described in Notes 9 and 10.2. With regard to taxes, the Company has no outstanding liabilities towards the Republic of Croatia. The Company invests in securities of the Republic of Croatia and other state-owned companies as listed in the table below with interest rates ranging from 1.75% to 6.75% and with maturities of 2018-2032.

The Company has given loans to the related company Croatia-tehnički pregled d.o.o. in the total value of HRK 238.4 million at an interest rate of 7% or 5%, to the company Core 1 d.o.o. in the amount of HRK 97.9 million at an interest rate of 5.14% and to the company Croatia osiguranje d.d., non-life insurance company, Skopje in the amount of HRK 6 million at an interest rate of 8.2% for the purpose of additional investments.

Other relationships with subsidiaries, joint ventures and associates within the Group and other companies that have a significant impact on the Company's financial statements as well as publicly owned companies are presented in the following tables for 2017 and 2016:

Transactions and balances with the parent company and other related entities of the Company and the Group for 2017:

/i/ Key management compensation

| | Company | Company | Group | Group |
|-----------------------------|--------------|--------------|--------------|--------------|
| | 31 Dec. 2017 | 31 Dec. 2016 | 31 Dec. 2017 | 31 Dec. 2016 |
| | in HRK'000 | in HRK'000 | in HRK'000 | in HRK'000 |
| Key management compensation | 40,085 | 38,433 | 56,160 | 55,761 |
| Termination benefits | 3,118 | | 3,118 | |

The key management personnel of the Group are members of the Management Board and Supervisory Board and directors of departments.

Key management compensation includes gross salary, life insurance premiums, benefits in kind, bonuses, termination benefits and compensation of the Supervisory Board.

31. Contingent liabilities

The Group has contingent liabilities in terms of issued collection instruments in the course of its business operations. It is unlikely that significant obligations could result from the above.

On account of its principal activity, the Group is subject to legal disputes initiated by injured parties. Provisions for legal disputes arising from claims incurred were provided for within claims provisions. The Management Board believes that these provisions are sufficient.

32. Commitments

As at 31 December 2017, the Company's contractual liabilities for future investments amount to HRK 3,700 thousand based on binding bids for investments in venture capital funds (31 December 2016: HRK 4,132 thousand).

33. Audit of financial statements

The auditors of the Group's financial statements have provided services in 2017 in the amount of HRK 2,167 thousand plus value added tax (2016: HRK 2,104 thousand plus value added tax). The Company was provided services in the amount of HRK 1,065 thousand plus value added tax (2016: HRK 1,118 thousand plus value added tax). Services in 2017 and 2016 relate to the costs of the statutory audit of annual financial statements and related audit services.

34. Events after the balance sheet date

On 21 March 2018, the Company signed a merger agreement with CROATIA osiguranje kredita d.d., a fully owned subsidiary. The merger agreement will gain validity upon obtaining the approval by the Croatian Financial Services Supervisory Agency.

Supplementary statements prescribed by the Ordinance of the Croatian Financial Services Supervisory Agency

Pursuant to the Ordinance on the form and content of financial statements and additional reports of insurance and reinsurance companies (Official Gazette 37/16) which was issued by the Croatian Financial Services Supervisory Agency on the basis of the Insurance Act and the Accounting Act, below we present the financial statements of the company CROATIA osiguranje d.d., Zagreb in the form required by the stated Ordinance.

The reconciliation between the financial statements, presented below on pages 157 to 172 as prescribed by the Ordinance on the structure and content of the financial statements of insurance and reinsurance Companies, and the annual financial statements prepared in accordance with the IFRS reporting framework is presented on pages 173 to 181 entitled "Reconciliation of the financial statements and supplementary statements for the Croatian Financial Services Supervisory Agency".

Statement of cash flows

The statement of cash flows has been prepared in accordance with the Ordinance on the structure and content of financial statements of insurance and reinsurance companies ("the Ordinance"), and its preparation is described in detail in the Instructions for completing financial statements of insurance and reinsurance companies, but its presentation differs from the statement of cash flows in the financial statements.

The main differences in presentation are described below:

- 1. Differences in the positions of increase or decrease in assets and liabilities in the statement of cash flows in the statutory financial statements and the statement of cash flows under the Ordinance arise due to differences in the relevant positions of assets and liabilities due to the different presentation in the financial statements compared to the Ordinance. These differences are presented in the adjustments of the statement of financial position (balance sheet).
- 2. Cash and cash equivalents at the beginning and end of the period presented in the statutory financial statements include deposits with contractual maturity up to 3 months as opposed to cash and cash equivalents at the beginning and end of the period presented in the statement of cash flows under the Ordinance.

Statement of changes in equity

In the statements under the Ordinance, profit/loss for the current year is presented in the eponymous column and in the subsequent period, upon adoption of the Decision of the General Assembly and the Supervisory Board, profit/loss is transferred through Other non-owner changes in equity to Retained earnings, while in the statutory financial statements it is presented under Retained earnings.
