

ERICSSON NIKOLA TESLA D.D.

Report on the Company's business situation and comments on the financial results for H1 2012

Highlights:

Sales revenue: MHRK 853.4

Gross margin: 12%

Operating profit: MHRK 61.2

Net profit: MHRK 80.1

Cash flow from operating activities: MHRK 172.3

Gordana Kovačević, the President of Ericsson Nikola Tesla commented on the Company's performance:

"The Company's focus on strategic projects, leadership in technology and partnership with customers has opened new business opportunities, primarily in export markets. The total sales revenue increased by 44.4% year-over-year as a result of the revenue growth in both the CIS and Ericsson markets. Sales in the domestic and regional markets witnessed a decrease, mainly due to the unfavorable economic trends, political instability in the markets of the region, but also due to cautious approach of customers to capital investments.

As of the CIS market, we signed contracts with the leading telecom operator in the Russian market, Rostelecom. The contracts cover a supply of the equipment for new mobile networks of the state-of-the-art technology and the network for various contents delivery to end users. These contracts are of the utmost importance for the Company and prove that the permanent market presence and listening to customer needs, in combination with leadership in technology and competent expert resources give positive results. This is the largest business achievement that Ericsson Nikola Tesla has made in the last several years. The contracts will be realized by the end of the year, thus enabling Rostelecom to become a converged operator being able to offer its users a wide range of converged services in the area of information and telecommunications in mobile and fixed networks throughout the Russian Federation.

Owing to investments into competencies and the advanced technological infrastructure, Ericsson Nikola Tesla's Research and Development Center continuously expands its product portfolio and

responsibilities at the global level. The revenues from research and development activities in the segment of advanced radio networks, platforms and fixed network servers, have witnessed continuous growth and represent a significant part of the total revenues.

In addition, I would like to underline that experts from the Service Delivery Center have been awarded new and comprehensive global responsibilities. The launching of the Global Competence Hub in Ericsson Nikola Tesla is a great credit to our employees, active in the segment of radio access networks (RAN). Their work and results through a regional service delivery center enabled them to be recognized as a team of exceptional competencies and professionalism.

Furthermore, we have achieved a considerable improvement in almost all key financial indicators. The operating profit has almost doubled year-over-year, and the net profit has increased by 116.8%. The strong cash flow from operating activities amounted to MHRK 172.3 and is a result of Company's focus on maintaining a high level of liquid assets. Thus, the total financial assets, including short-term financial assets, amounted to MHRK 543.5 at the end of H1.

Simultaneously, in compliance with the Corporation and the Company strategy, we stick to the planned activities regarding the organizational and process transformation. We are especially focused on the market analysis, following up the impact of macroeconomic development and political uncertainty on customer investments. Taking into account the increased data traffic due to the increased number of smartphone subscribers, operators' investments into hardware, software and services are necessary in order to ensure high network performance, Therefore, we develop new models of cooperation with partners and customers and continue to invest into competence development and encourage innovativeness".

Financial Summary:

- Sales revenue increased by 44.4% year-over-year, primarily due to the revenue growth in the Russian market, and total MHRK 853.4. The domestic market accounts for 15% and export accounts for 85% (export to Ericsson market accounts for 31%, and export to other countries accounts for 54%) of sales revenue.
- Sales revenue can be further analyzed by business segments as follows: Network infrastructure including network rollout services MHRK 494.8 (58% of the total sales revenue), Professional Services MHRK 236.9 (27.8% of the total sales revenue), and Multimedia solutions MHRK 121.7 (14.2% of the total sales revenue).

- Gross margin declined to 12% (H1 2011:12.6%). Despite the gross profit increase, the slight gross margin drop year-over-year reflected the product/service mix, and the continuous pressure on product/services prices.
- Distribution and administrative expenses decreased by 4% year-over-year, totaling MHRK 47.3. The Company seeks to optimize costs, and will continue with further activities during the next quarter.
- The operating profit amounts to MHRK 61.2 and is higher by MHRK 30 (97%) year-over-year, primarily reflecting the increased business volume.
- Net finance income totaled MHRK 18.9 (H1 2011: MHRK 5.9). A significantly higher level of finance income year-over-year primarily reflects the positive currency deviations and higher interest income while release of impairment reserves into finance income (discount amortization) was only slightly higher year-over-year.
- Net profit increased by 116.8% year-over-year amounting to MHRK 80.1. Return on sales (ROS) totaled 9.4% (H1 2011: 6.2%).
- Cash flow from operating activities totaled MHRK 172.3 (H1 2011: MHRK 70), resulting from intensive activities focused on collection of receivables. As at June 30, 2012, after the dividend payment totaling MHRK 225.7, total cash, including financial assets, amounted to MHRK 543.5 (32.3% of the total assets).
- The total assets increased by 41% compared to the end of 2011 and totaled MHRK 1,680.5 resulting from the increase of trade receivables and inventories due to ongoing Russian contracts. The equity ratio decreased to 42.1%, being the result of higher trade payables due to the increased business activities in the Russian market.
- As regards major transactions with related parties, sales of products and services totaled MHRK 277.7 (H1 2011: MHRK 245.5) while purchase of products and services totaled MHRK 736.5 (H1 2011: MHRK 214.5), being also the result of the ongoing Russian contracts.
- As at June 30, 2012, receivable balances outstanding with related parties amounted to MHRK 66.2 (end of 2011: MHRK 87.5) and payable balances outstanding was MHRK 577.5 (end of 2011: MHRK 50.7).
- Disclosure on credit risk exposure:

As at June 30, 2012, Ericsson Nikola Tesla's receivable balances outstanding totaled MHRK 698.5 (end of 2011: MHRK 461). The Company will continue to monitor the credit risk and try to

secure that all future credit arrangements with customers are managed with as low credit exposure as possible.

Business situation in major markets

In the domestic market, sales totaled MHRK 128, a year-over-year drop by 26% reflecting the lower operators' investments, primarily due to mobile service tax. Also, there was no significant commercial expansion of 4G networks. Furthermore, government investments into strategic ICT projects are being continuously postponed.

Vipnet and Ericsson Nikola Tesla jointly launched the first LTE network in Croatia that will bring further increase in data traffic rates and enhancement in users' experience of Internet use (i.e. the users will be able to experience data transfer at speeds up to ten times higher than they did by now on their laptops or mobile phones). During the Q2, a cooperation continued in the segment of expansion and modernization of 2G and 3G infrastructures, in the area of core network modernization where the new functionalities have been introduced and tested as well as in the segment of transmission system modernization.

The cooperation with Hrvatski Telekom (HT) continued on projects concerning the network transformation into the next generation network and the expansion of the broadband Internet access. In addition, the cooperation was agreed and the negotiations ended regarding a long-term contract on introduction of IP/MPLS backbone, which represents the basis of future HT operations as the converged operator and the way towards an all-IP environment. Furthermore, Ericsson was selected a partner in continuing activities on PSTN network modernization with an aim to migrate to a new architecture with more than 200,000 users already in 2012. As one step in an overall network modernization, we are just about to sign IAD agreement (Integrated Access Devices) for the distribution of the users' terminal equipment.

The situation concerning the tax to mobile services slowed down the investment of the mobile operator Tele2. Despite the mentioned circumstances, the cooperation with this operator continued both in further 2G and 3G infrastructure development and implementation of new technologies and functionalities, with the special attention given to increase of transmission rates and coverage by the mobile broadband Internet access service. The contract was signed for Serving General Packet Radio Services Support Node (SGSN) swap.

The major focus in ICT for industry and society segment was on upgrading the national ICT primary healthcare system and the realization of Cadastre and Land Database joint information system (JIS).

With HEP, the national electricity company, a two-year frame agreement was signed concerning modernization and expansion of communications network.

In export markets (except for Ericsson market), sales totaled MHRK 460.9, an increase by 134% year-over-year.

In the regional markets (Bosnia and Herzegovina, Montenegro and Kosovo), sales revenue totaled MHRK 65.8, a 43% decrease year-over-year, reflecting postponement of operators' investments in the region but also a different starting position concerning the orders booked (significantly lower orders backlog from 2011 compared to the previous year).

With HT Mostar, a contract was signed on the expansion of the current mobile network in its 2G and 3G part. Under this contract, Ericsson Nikola Tesla will deliver the latest generation equipment, as well as installation and integration services into HT Mostar network. The contract implementation will make the better coverage of Bosnia and Herzegovina territory, and the users will be enabled access to the current services with new functionalities in the shortest possible time.

In CIS market, sales revenue amounting to MHRK 386 increased by 5.8 times year-over-year, reflecting new business contracted in the Russian market.

Regarding large contracts made with Rostelecom, the leading Russian operator, Ericsson Nikola Tesla will deliver equipment of 2G and 3G mobile network generation, including also multi-standard radio base stations of RBS 6000 type for the channel and packet switched networks. The equipment to be delivered refers to the new Evolved Packet Core (EPC) network architecture and Operation Support Systems (OSS). The new Rostelecom network will cover more than 60% of the total of 143 million inhabitants of Russia, including also the largest Russian cities - Moscow, Sankt Peterburg, Novosibirsk, Yekaterinburg, etc. Rostelecom has also started the implementation of solutions based on Ericsson content distribution network (MDN). With that, Ericsson Nikola Tesla will deliver the equipment based on the latest generation of platforms for program support and equipment aimed for the content delivery both in mobile and fixed networks.

As of ICT solutions for the industry and society segment in export markets, Ericsson Nikola Tesla's product EMH (Ericsson Mobile Health) has been used in a number of trial operations worldwide with positive feedback.

In Ericsson market, the sales revenue totaled MHRK 264.6, an increase of 19% year-over-year.

The Research and Development Center continued with its activities on development of new functionalities by continuously expanding its line of products and responsibilities at the global level.

Within the fixed network segment, activities covering delivery of services to Telenor Norway, BH Telekom, Telecom Italia as well as to numerous operators in Great Britain are to be mentioned. As of broadband access segment, the cooperation has continued with Hrvatski Telekom (T-Com products and services in fixed network and broadband segment), Turk Telecom and Vodafone Portugal as well as with certain Russian customers.

In the core network segment, development of new functionalities for the latest MSS product (Mobile Softswitch) is at its final stage. Among them, there is a very advanced High Density Voice segment. Furthermore, there are several interesting functions at their initial stage, referring to Vo-LTE segment for the next MSC product.

The importance of platform development of radio network elements has increased. Special focus is on the development of hardware and software solution for LTE generation of EVO ET networks.

Along with the development of sophisticated functionalities, the R&D Center is at the forefront in implementation of advanced ways of working such as *Lean&Agile* method, both in Croatia and Ericsson community, as well as in the number and quality of innovative ideas.

Service Delivery Center experts have been engaged in numerous projects such as: GGSN activities for O2 Great Britain, LTE OMC/NMC activities for Vfe Germany, IPTV project for Telekom Austria, MSS consulting services and support services for KPN Switzerland, consulting services for KPN Belgium and KPN Netherlands, implementation of services for A1 Austria, radio access network optimization for Orange Austria, dimensioning and network optimization for TMO Slovakia, Maroc Telecom, ePlus Germany, Vivacell South Sudan, MTN IranCell and services related to LTE and WCDMA 900 software for Softbank Japan. In addition, we are engaged in projects covering network modernization for Vodafone Spain, MTN Nigeria, Etisalat group, Mobility Saudi Arabia, Orange France, Bouygues France, WIND Italy, TIM Italy, H3G Italy, Partner Israel and many others.

Within the company, a Global Competence Hub for radio access networks is to be launched. Thus, Ericsson Nikola Tesla experts have been awarded wider responsibilities within the given segment. This organization will support all 10 regions by delivering strategic competencies, thus adding the maximum value to strategic contracts with Ericsson customers. The global support to the new services development and introduction of new services will also be of great importance.

Other information

The Annual Shareholders' Meeting was held on June 5, 2012, where the decision was made on the ordinary dividend payment totaling HRK 20 per share, as well the extraordinary dividend payment totaling HRK 150 per share.

The dividend was paid on June 28, 2012 to all shareholders who on May 29, 2012 had Company's shares registered on their securities accounts in the Central Depository&Clearing Company.

The annual non-taxable portion of dividend income amounting to HRK 12,000 will be recognized in an annual income tax calculation, based on the annual income tax return form (Personal Tax Act, Art. 30, paragraph 11).
