Net result for the period	(4,926)	(3,327)	(1,599)	(48%)

^{*} EBITDA= EBIT + depreciation + value adjustments

Comparing to the corresponding period last year, significantly better operating result (EBIT) was realised during the first half of 2016. One of the reasons for this are significantly better sales margins realised on almost all goods. Comparing to the corresponding period income decrease is the result of both lower sales quantities and lower sales prices.

In the first half of 2015 one-off expenses incurred, as a result of production rationalisation, while in the first half of 2016 there were no similar costs.

Net financial result represents the difference between financial income and financial expenses, and comparing to the corresponding period in 2015 in the first half of 2016 net financial expense is almost 100% higher. Comparing to the corresponding period last year regular and penalty interest expense is HRK 1.3 million lower, while financial income is lower by HRK 7.3 million. Financial income decrease is noted in the part of re-invoiced expenses, net FX gains which were app. HRK 1 million higher in 2015, penalty interests earned from commercial activities and interest income on loans granted to subsidiaries, which is in 2016 lower, after the loan granted to Zdenačka farma was converted to equity.

Overview of the business operations for the first six months of 2016 per business segments

The Company monitors its business operations through four business segments:

- 1. Flour
- 2. Sowing material (wholesale of: fertilizers, protective materials and seeds)
- 3. Trading (wholesale of grains, oil crops and bakery products)
- 4. Other (rendering services of storage, drying and reception of grains and oil crops at the reception stations, cattle breeding, other)

Sales income per business segments is shown by the following chart:

Flour

Decrease of flour sales income is the result of the decreased quantity of the flour sold, and lower sales prices. Average sales price of flour in the first half of 2016 was approximetely 4% lower than the average sales price of flour in the corresponding period last year, while the difference between the average sales price of wheat flour and the purchase price of wheat used in production (spread) was 9% higher.

Comparing to the corresponding period last year, average value of the basic raw material (wheat) used in production was lower in 2016.

Within the other operating costs it is important to single out one-off costs which emerged during 2015, like rent costs (rent costs of mills Belje and Vinkovci in the amount of HRK 0.7 million) and severance payments paid out to the employees of mills Belje and Vinkovci in the amount of HRK 2 million. In 2016 no such costs incurred.

Sowing material

Sales decrease of sowing material in 2016 is the result of the following:

- Prices of grains and oil crops are lower, what lead producers to strive to lower the sowing expenses by using less fertilizers and protective materials
- Autumn harvest season 2015/2016 was increased, thereby less agricultural area was left for the spring harvest.

Despite the sales decrease, margins realized from the sales of sowing material were higher than in the corresponding period.

Trading

Trading segment's business operations have seasonal character. The most significant sales income is realized in the second half of the year. Corn acquired at the end of 2014 was sold in the first quarter of 2015. At the end of 2015 there were no significant quantities of grains and oil crops on stock that would be sold during 2016.

Other

Sales income in the Other segment is comprised of re-invoiced transportation and fuel costs, income from rendering the service of goods reception at the reception stations, income from storage and drying goods, and income from sale of cattle. Income from reception, storage and drying are impacted by outstanding seasonality, i.e. they are largely realized in the last quarter of the year, while costs are largely fixed. It is important to note that silo is used for internal usage of Flour and Trading segments as well.

Employees

In the first six months period of 2016 the Company employed 166 employees based on man-hour basis (in the first six months period of 2015: 165 employees).

Redemption of treasury shares

Based on the General Assembly decision of 9 June 2016 the Company has transferred a portion of the profit earned in 2015 in the amount of HRK 800 thousand into the equity reserves for treasury shares.

Up to the publication of the Management Board report, the Company was not engaged in any activities relating to the redemption of own shares.

Environment

Regarding the environmental protection, the Company has implemented comprehensive and systematic solutions and established environment-friendly production processes.

Other

Supervisory Board has approved Company's financial statements for the first six months period of 2016.
