In the first quarter of 2020, a more favorable operating result was achieved compared to the same period last year. The increase in revenue and better EBITDA value are the result of higher flour sales in January and February 2020. The increase in flour sales in March 2020 was partly due to higher demand for food products due to the pandemic caused by the COVID-19 virus.

Net financial result represents the difference between financial revenues and financial expenses. Financial expenses consist mostly of interest on the financial debt which is part of the pre-bankruptcy settlement.

In the first quarter of 2020, the Company generated revenues higher by 34% compared to the same period last year. The reason for this is better cheese sales in the first months of the year.

The prices of basic raw materials for production in 2020 increased compared to the previous year, while the sales prices realized in the observed period do not follow the growth of raw material prices to the same extent. This caused a decrease in margins in 2020 compared to the comparable period. In addition to the above, the cost of employees increased compared to the previous year.

The unfavorable financial result was due to the significantly higher cost of negative exchange rate differences in 2020.
