⁽¹⁾ EDITA = EDIT + Depreciation + Impairment + Provisions ⁽²⁾ Excludes special items items related to assel impairment, stock evaluation, deferred taxes, provision, severance payments and special items income. The H1 2011 EBIT was negatively influenced by HRK 175 million special items relating to provisions and value adjustments.

⁽⁹⁾INA Group net income attributable to equily holder. (9) In converting HRK figures into US Dollars, the following average CNB (HNB) rates were used for: Q1 2011: 5.4119 HRK/USD; Q2 2010: 5.6857 HRK/USD, Q2 2011 – 5.1325 kn/USD; H1 2010: 5.4734 HRK/USD; H1 2011: 5.2733.

INA d.d., in the first six months of 2011, has significantly improved its overall results compared to the same period last year, achieving 56% higher EBITDA which amounted to HRK 4,200 million and HRK 2,828 million operating profit excluding special items. Results were mainly influenced with higher crude oil prices coupled with increased average daily hydrocarbon production in Upstream, while Downstream segment generated still negative but improved result. In addition, management's focus on efficiency improvement resulted in significant cost saving through reduction of operating expenses.

In H1 2011, net profit of INA d.d. was significantly better than in the same period last year, reaching HRK 2,447 mln compared to HRK 852 mln net profit realised in H1 2010 as a result of already mentioned trends and unrealised forex gains on the revaluation of credit facilities.

INA d.d. CAPEX in the first half of 2011 reached HRK 548 million (against HRK 1,500 million in the same period last year) as a result of different work program which reduced CAPEX, but have not jeopardized execution of the main investing projects. Exploration and Production accounted for the majority of CAPEX with HRK 296 million spent, primarily on development operations, Refining and Marketing spent HRK 202 million, with majority invested in refinery modernisation, while HRK 41 million was spent on retail operations.

Overall operations

INA d.d. Exploration and Production

Exploration and Production H1 2011 operating profit, excluding special items, significantly improved to the amount of HRK 3,585 million which is an increase of HRK 1,052 million compared to H1 2010 figure mostly as a result of coupled effect of 18% higher hydrocarbon production and 34% better average realized hydrocarbon price. Increase in operating profit was additionally backed with realized efficiency improvement measures resulting with 5% lower unit opex. Reported H1 2011 operating profit amounted to HRK 3,540 million and was negatively influenced by HRK 45 million special items.

INA d.d. Refining and Marketing

In the first six months of 2011, Refining and Marketing generated an operating loss (excluding special items) of HRK 471 million, a decrease of HRK 224 million on H1 2010 loss. 8% higher sales volumes (mostly EURO V products) with stronger presence on B&H market where higher sales of gasoil and bitumen were achieved, together with optimized crude oil procurement, realized efficiency improvement measures and favorable FX changes had a positive impact on the result. On the other hand, lower average crack spread by 48% and unfavorable product yield due to planned and unplanned shut downs and discontinuities in operation. Certain complications arose during the start-up of the hydrocracker complex at Rijeka refinery that influenced our Q1 2011 results negatively, but starting from May 2011 it operates continuously. Reported H1 2011 operating loss amounted to HRK 554 million including HRK 83 million negative special items.

INA d.d. Retail segment

Retail segment recorded an operating loss (excluding special items) of HRK 11 million in H1 2010, HRK 26 million lower result than in the same period of 2010. Higher margin in the first six months of 2011 could not compensate for the changed methodology of assets impairment1 which had a positive impact in H1 2010. The reported operating loss for H1 2011 amounted to HRK 28 million and was negatively influenced by HRK 17 million special items.

INA d.d. Corporate Functions

In H1 2011, Corporate Functions of INA d.d. generated an operating loss (excluding special items) of HRK 275 million, which was HRK 75 million better result compared to H1 2010 loss. Decreased loss occurred as an effect of reversal of impairments related to unused holidays and provisions for other expected liabilities. The H1 2011 performance was negatively influenced by HRK 30 million special items and reported operating loss amounted to HRK 305 million.

Overall operations

In H1 2011, INA d.d. generated HRK 13,109 million of net sales revenues or 31% higher compared to the same period last year, primarily as a combined effect of higher revenues from refined product sales (higher prices and higher volumes) and higher sales of Syrian natural gas and crude oil (higher prices and higher volumes). Additional positive effect came from introduction of new EURO V products.

Costs of raw materials and consumables rose by 46% over H1 2010 and amounted to HRK 7,925 million, mainly because of 36% increase in crude oil average purchase price (the average price of Brent FOB Med rose by 44% on the world market) and the 2% higher refining of imported crude. The value of finished goods and work in progress inventories rose by HRK 848 million compared to the opening balance, while as at 30 June 2010 it was higher by HRK 474 million. The cost of goods sold decreased by 20% and amounted to HRK 811 million mainly as a result of soled natural gas inventories to Prirodni plin d.o.o. in Q1 2010, which was partially offset with higher purchase of imported oil products. Other material costs in the amount of HRK 689 million, increased by 3% due to higher transportation costs and higher rental fee warehouse costs. The costs of services decreased by HRK 414 million to HRK 512 million due to lower financial costs related to operations. Depreciation rose by 41% to HRK 1,039 million because of assets put in use upon completion of projects. Adjustments and provisions of HRK 508 million were HRK 271 million higher because of higher receivables impairments and higher provisions for litigation and unused holiday.

Total staff costs decreased by 4% compared to H1 2010, mainly due to lower headcount as a result of Workforce Restructuring Programme launched at the end of 2010. The headcount as at 30 June 2011 was 9,029, which represents a 9% decrease compared to the 9,974 employees as at 30 June 2010.

Financial activities in H1 2011 recorded a profit of HRK 399 million, a HRK 1,122 million increase on the H1 2010 loss. The profit tax for the first six months of 2011 amounted to HRK 605 million compared to HRK 147 calculated for the same period last year.

Balance sheet

Total assets, as at 30 June 2011, amounted to HRK 30,890 million which is an increase of 2% compared to 31 December 2010. Non-current tangible and intangible assets decreased by 4%, primarily due to increased depreciation because of assets put in use upon completion of projects capital investments.

Net trade debtors amounted to HRK 2,966 million and decreased by 27%, compared to 31 December 2010, as a result of lower intercompany trade debtors.

Total INA d.d. liabilities as at 30 June 2011 amounted to HRK 17,056 million and they were 4% lower than on 31 December 2010, primarily as an effect of lower trade payables, while INA d.d. indebtedness increased by 5% to the amount of HRK 8,365 million compared to HRK 7,986 million as at 31 December 2010. Trade creditors amounted to HRK 2,613 million and were by HRK 2,054 million lower primarily due to lower intercompany payables. Liabilities for taxes and contributions increased by HRK 385 million, to the amount of HRK 1,035 million, due to higher corporate tax as a result of increased profitability.

INA d.d. total net debt amounted to HRK 8,185 million compared to HRK 7,726 million as at 31 December 2010 while the net gearing² decreased from 38.1% to 37.2% as at 31 December 2010.

Cash flow

In the first six months of 2011, INA d.d. operating cash-flow before working capital changes amounted to HRK 3,917 million and increased by HRK 1,472 million in comparison with H1 2010 mostly because of increased EBITDA. The changes in working capital decreased the operating cash flow by HRK 3,116 million, mostly as a result of lower trade creditors by HRK 1,415 million and higher value of inventories by HRK 1,611 million.

The estimates are based on the information available at the date of preparing financial statements and actual amounts may differ from those estimated. Estimates and assumptions are revised on a continuous basis. Amendments of accounting estimates are recognised in the period influenced by such amendments (if only that period is influenced), or in future periods if both the current period and future periods are influenced.

Receivables collection procedure

12 July 2011 the procedure for enforced collection of the total overdue receivables in the amount of more than 68 million HRK from company DIOKI was initiated related to the delivered ethane from INA, d.d. and delivered natural gas from Prirodni plin, d.o.o. As the next step, INA is considering delivery suspension of ethane and natural gas. INA has shown maximum flexibility in the effort to achieve mutual agreement with the company with which INA has a long partnership relation and has continued with regular deliveries of natural gas and ethane to DIOKI, despite DIOKI's high liabilities in the last two years. Intensive talks have been initiated during which Dioki hasn't offered an acceptable solution. DIOKI has also not paid its debt until day. This is therefore a necessary business move in the order to protect INA's business operations.
