About Optima Telekom

OT – Optima Telekom d.d. (hereinafter: Optima) is the first and largest alternative landline service provider in Croatia and the second landline telecommunications carrier in the Croatian market. In its eighth year of commercial operation, Optima is present in the Croatian market with a full range of telecommunications services. The current market potential of over six hundred thousand connections is connected by over 2,700 km of own optical network.

Optima's corporate culture supports innovation, loyalty, learning, enterprise and the desire to win in every employee, all recognized by our faithful users, now over **220.000** of them.

- Supervisory Board: Nada Martić – Chairperson, Ivan Martić – member and deputy Chair, Zrinka Vuković Berić – member, Duško Grabovac – member
- Board of Directors: Matija Martić – CEO, Goran Jovičić – member, Jadranka Suručić – member
- Business account: 2360000-1101848050, Zagrebačka banka d.d.
- Commercial Court of Zagreb
- Personal Identification Number: 36004425025
- Registration Number: 040035070
- Bureau of Statistics Number: 0820431
- Share capital amounts to: HRK 28,200,700.00
- Number of shares: 2,820,070, nominal value HRK 10.00 each

Main features of the Group

- EBITDA has improved by **2,0%** compared to 2011, and amounts to HRK **76.2** million in 2012, for the first time in Optima's corporate history covering net financial expenses;
- EBT amounts to HRK **-53.6** million, which is a better result than 2011 by HRK **13.1** million
- An increase of overall consolidated operating income by HRK **78.2** million, with a simultaneous increase of overall operating costs by HRK **76.1** million compared to 2011
- Telecommunications services revenue in 2012 have recorded a **16.4%** increase compared to the same period of the previous year.
- Internet services revenue has increased by **25.6%** compared to the same period of 2011, data services revenue has recorded a **13.3%** growth, while public voice service revenue has increased by **3.9%** and multimedia services revenue by **63.2%**.
- The number of LLU users has increased by **3.4%** (from 111,322 to 115,100 users)
- The number of collocations also increased by **3.8%**, which represents a total of 276 collocations at the end of 2012
- The number of potentially available connections via own infrastructure has been decreased by **1.9%** (from **674,492** connections to **661,362**), which represents **46%** of the active landline connections market, being a larger share compared to the previous year when the said share was **45%**

Croatian economy trends

Negative economy trends have been confirmed in 2012. In the first three quarters, the GDP was 1.8% lower compared to the same period of 2011. This represents the ongoing negative trend which, incited by the economic crisis, onset at the beginning of 2009.

Inflation is somewhat higher this year, in October 2012 it amounted to 4.8%, and on average for the first ten months 3.2%.

Despite everything, financial results of enterprises in the first nine months do not differ significantly from last year's results for the same period. Even though overall income has recorded a mild growth (0.7%), overall expenses have increased by 1.1%, with only a mild increase in the number of employees based on hours of work, while their net salaries were kept at last year's level. This indicates that the main reason for the increase of expenses is the increase of input costs, particularly the growth of energy costs. In 2012, the average investment value per entrepreneur continues to be two times lower than in the same period of 2008.

In November 2012 the registered unemployment rate amounted to 20.4%, also being the highest unemployment rate since the onset of the current economic crisis. This is over 347 thousand unemployed, with a tendency to increase further. At an inter-annual level, unemployment increased by 14.9% or 45 thousand people.

Influenced by the higher inflation rate in 2012, the actual decrease of average salaries is deepened, so that the average salary in October amounts to HRK 5,457 which is, compared to the same period of 2011, nominally 0.9% higher, but actually 2.2% lower. Along with the already increased VAT rate and the price increase of public and communal services, the abolition of the zero VAT rate for certain goods is bound to add pressure to the standard of living.

At the end of November of 2012 there was a steep downfall of overall outstanding liabilities (HRK 43.7 billion) which is HRK 830 million less than one month earlier. This was a decrease of outstanding liabilities of legal entities with accounts overdrawn for over 360 days and with no employees. Their outstanding liabilities decreased by HRK 504 million, and their number by 1.9 thousand. Even though the liquidation of a part of non-existent companies without employees improved the trend statistically, this is not to suggest the beginning of solving the liquidity problems. Namely, business entities continue to get their accounts overdrawn, which indicates an increase in the value of liabilities outstanding under 30 days.

Telecommunications services income and business segments

Telecommunications services income increased by **16.4%** in 2012 and amounts to HRK **543.6** million. Compared to the growth achieved in 2010/2011 which amounted to 7%, in 2012 we recorded a double digit growth.

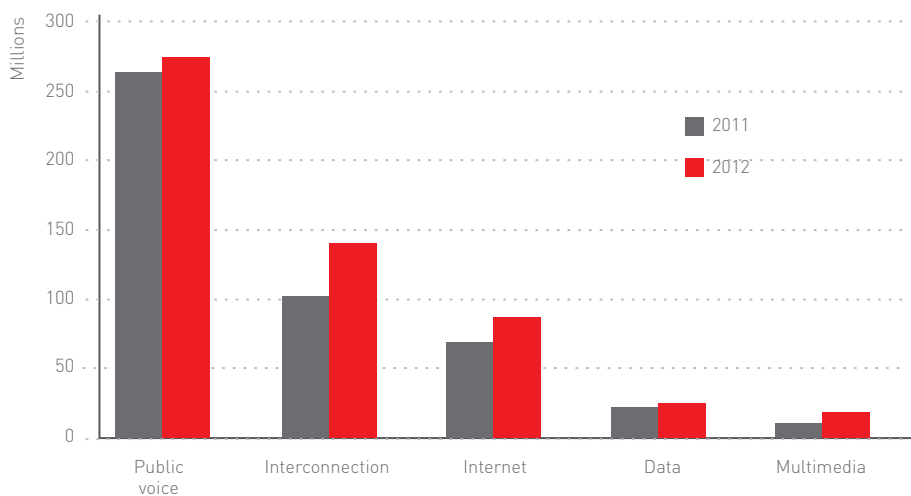

The overall income increase was primarily influenced by the increase of multimedia services income, which recorded a **63.2%** increase, while in absolutes the highest increase is in interconnections, where we had an increase of HRK **39.1** million.

Even though the public voice service in fixed networks market has continued to drop in the number of minutes, Optima has recorded a **3.9%** growth in this segment as well, with an income of HRK **274.5** million.

A more significant growth compared to 2010/2011 has been recorded in the Internet and data services income segment. In the Internet services income segment we have recorded an income of HRK **86.3** million, i.e. a **25.6%** growth, while in the data services segment we have recorded an increase of income to HRK **24.7** million, i.e. a **13.3%** growth.

The growth of multimedia and Internet services is a result of directing sales activities towards service packages containing Internet and other multimedia services (O2 and O3 packages).

TELECOMMUNICATIONS SERVICES INCOME

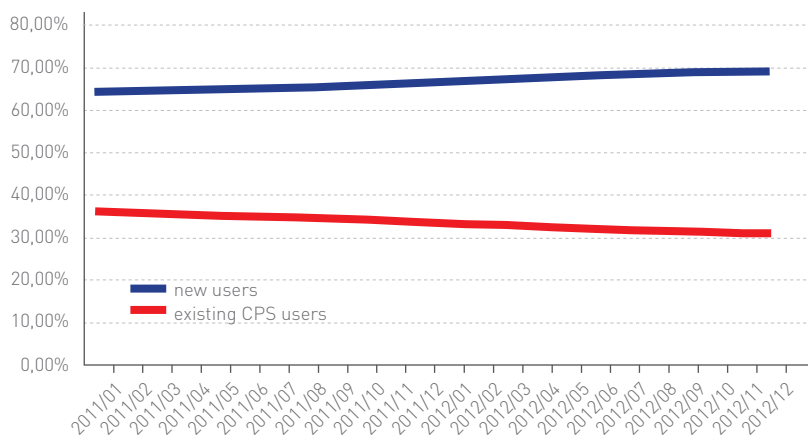

Residential users segment

The residential users services based on ULL, have followed three directions in 2012:

- signing up new users,
- additional services for existing users, primarily OptiDSL and OptiTV services (the so-called Upsell)
- transferring existing Optima users already using the CPS service (the so-called migration).

The result of such activities manifested itself through the increase of income from sales to residential users. Apart from the income increase, the result of such sales activities has resulted in the increase of the gross margin.

In 2012, **19,662** contracts for the full transfer to Optima's network have been concluded.

With such a trend, Optima is continuing the planned strategy of signing up new users to own network and migrating the existing CPS services users.

Based on data available to the public concerning numbers transferred (CADB) provided by the Croatian Agency for post and electronic communications (HAKOM) which records the status of each transaction during number transfer on a daily basis and has the information required to direct the calls towards the transferred number, it is clear that Optima is by far the most successful landline telecommunications carrier according to the migration of users to own network.

The overall data on telephone number transferability show a transfer of **196,680** numbers to Optima's network, which represents **26.8%** of the total of migrated landline numbers and one of the more significant indicators of acknowledgment of new carriers and the willingness of Croatian citizens to change their use of telecommunications, and by that the liberalization of the Croatian telecommunications market as a whole.

Source: HAKOM

The corporate segment

The corporate segment income represents a little over **15.6%** of overall income.

The number of corporate users has been increased by **2.5%**. There has been an increase in the key users segment, but also in the lower market segments, whereby Optima has increased its presence in all market segments.

As well as in previous years, in 2012 we fulfilled one of our strategic objectives pertaining to the user base growth in the lower market segments (SoHo and SME).

In 2012 Optima telekom participated in over 80 public tenders, bidding to provide telecommunications services.

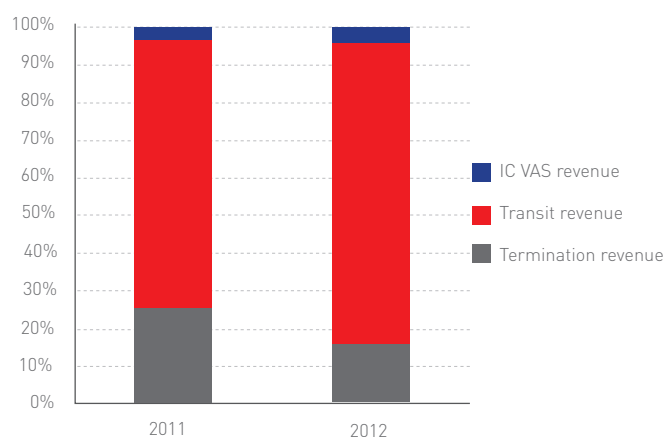

In 2012 Optima continues to be present in tourism, trade, transport and higher education.

Wholesale

Optima has concluded Interconnection Agreements (the so-called interconnections) with 28 international carriers, 3 national mobile networks carriers and 20 national landline networks carriers.

This number of agreements has ensured us an interconnection income of HRK **140.7** million in 2013, which represents a **38.4%** increase.

Through market consolidation in 2012 the smaller wholesale customers disappeared, but despite such market circumstances, growth has been ensured through increased cooperation with several existing customers and the successful realization of several project according to the IRU15 model.

Earnings before interest, taxation and depreciation – EBITDA

In 2012 EBITDA has improved by **2%** compared to 2011 and amounts to HRK **76.2** million.

The reason for only a slight increase of EBITDA lies in the rise of prices of energy and other costs that increased in 2012, influencing also the increase of inflation in the Croatian market, all beyond Optima's control.

The improvement of EBITDA results year after year is based on:

- continuing strategic business operations and investing into own infrastructure
- diligent cost management and optimization on all levels of the Group
- regulated prices impact
- increase of service profitability through the increase of internet services

Earnings before taxation – EBT

The EBT achieved in 2012 amounts to HRK **-53.6** million, which is a better result by **19.6%** compared to 2011, and given that depreciation is strictly an accounting category and amounts to HRK 55.7 million, it can be said that a positive cash flow has been achieved in business operations in 2012.

Capital investments in 2012

Capital investments in 2012 amounted to HRK 53.3 million, out of which HRK **42.5** million has been invested into the development of the access optical network, broadening the collocations network, user equipment for providing the IPTV service and connection equipment for corporate users. HRK **4.3** million have been invested into the core network, mostly used to extend the core network to the 10G technology and to expand the user center.

	2012. (HRK)	share %
General investments	2.766.082	5%
Capital technical investments	50.520.655	95%
ACCESS Network	42.532.724	80%
CORE Network	4.331.713	8%
Telecommunications center	3.656.218	7%
TOTAL	53.286.737	

Infrastructural development

Being the largest alternative carrier in Croatia, Optima is trying to have its own infrastructure reach every user. For this reason, the construction of own collocations plays an important part in differentiating Optima for other telecom carriers – we have the ability to provide unique services for our users.

By the end of 2012 Optima has erected **276** collocations and connected them to its own infrastructural network, causing the number of available connections to go over 660,000, which is over 46% of all connections in Croatia.

In the years to come, the strategy of development will put emphasis on powerful broadening of the local optical network, which will provide access to users throughout Croatia. Therefore, the erection of new collocations is planned, as well as the broadening of existing collocations to enable access for a number of new users.

Optima's collocations in Croatia

Optical network

Along with the erection of new collocations, infrastructural development necessarily requires the construction of own optical network.

During the fourth quarter of 2012, construction was completed on the inter-city segment of Optima's northern optical backbone at the route Zagreb – Varaždin – Koprivnica. By constructing the aforesaid inter-city optical routes, we have connected Varaždin, Ludbreg and Koprivnica to our own optical network and enabled the connection of all cities and towns along the route to the optical network. One should particularly mention Sv. Ivan Zelina and Novi Marof due to their size, but there are a lot of smaller towns as well. By connecting the aforementioned cities to the optical network, we achieved significant savings by canceling the feed leases.

Along with the aforesaid completed capital investment, city optical network capacities have been expanded in the preceding period, due to the high degree of use of optical network in Zagreb and Rijeka. The overall length of constructed optical feeds on the access network is somewhat smaller compared to the same period of 2011, considering that significant growth has been achieved in the realization of optical routes, inter-city routes in particular. The aforesaid resulted in what is almost a seven-fold growth in the construction of optical infrastructure compared to the same period of 2011.

In numbers, we are dealing with 181 km of new optical network, i.e. 31 new feeds and 12 optical route segments. Comparing overall lengths, this is a significant growth of optical network of 7.1%, compared to the construction level determined at the end of the third quarter of 2012 (2,727 km compared to the 2,546 km realized by the end of the third trimester of 2012).

The largest quantity of feeds and routes has been realized in Region North (173.2 km), followed by Region South (3.5 km), Region West (3.3 km) and Region East (1 km).

OPTICAL NETWORK IN KILOMETERS

Affiliates

Optima Group also includes Optima Direct d.o.o., Optima telekom d.o.o. Koper, Optima telekom for real estate management and consulting d.o.o. which is at a standstill.

Optima Direct d.o.o. is a company owned by Optima 100%. After its inclusion in the Group in 2007, its impact on business operations continues to grow, particularly after the migration and reorganization of business processes into Optima Direct.

Within its scope of activities, Optima Direct also performs vital operative functions for Optima's residential segment. These functions pertain to the processes of:

1. Customer care
2. Residential (field) sales
3. Services towards third parties

Contact center operations are organized at two separate locations in Zagreb and Osijek. Except for the usual activities within the contact center domain, Optima Direct employees also act as the background office for Optima. Residential sales is one of the key features of Optima Direct's business activities, which has a direct positive impact on Optima's business. Optima Direct has 156 employees organized regionally in 4 centers (Zagreb, Osijek, Rijeka, Split) and 4 offices (Zadar, Buje, Varaždin, Sisak), all synchronized with Optima's needs and plans. By developing this segment in particular, a continuous inflow of new contracts has been ensured and the dependency on the unreliable market of indirect partners has been decreased.

It should be emphasized that Optima Direct is continuously engaged in the development of processes and applications useful not only to Optima, but also to other business partners of Optima Direct. Professional and educated Optima Direct employees guarantee a full range of contact center services in the Croatian market. The strategy and objectives of Optima Direct fit into the long term strategy of development of the Group. Optima remains with its business development strategy in its affiliate it adopted back in 2007, when the potential for the development of two significant participants in the telecom market was first noticed.

One of the basic reasons to migrate a part of the employees into the affiliate was the development of BPO¹, which was recognized as the potential model to expand the company's operations and optimize costs at Group level. In this way, the following services are offered to a broader market: Contact center (info desk, help desk), Telemarketing, Telesales, Direct mailing, Door2door sales.

¹ BPO – Business Process Outsourcing-a growing trend of transferring business functions to outsourced service providers in order to reduce operating costs

During the first half-year period, Optima Direct drafted and implemented the Excess Employees Provision Plan due to the reorganization of business operations which included 33 employees. There have been changes in the Company's Management as well, Ivan Drčec, who had previously held the position of director of Region North at Optima Telekom, was appointed as the sole member of the Board of Directors.

Regulatory environment

The Croatian Agency for Post and Electronic Communications (hereinafter: HAKOM) has continued to regulate the electronic communications market throughout the last quarter of 2012, so that the process of amending the Hrvatski Telekom d.d. Standard Offer for the wholesale broadband internet access service (hereinafter: bitstream access) has been completed, primarily by amending the terms, deadlines and prices for providing bitstream access at OLT level based on of FTTH solutions, as well as the conditions for providing the said service by way of VDSL technology.

HAKOM temporarily suspended the shut down process of 18 local operators and the transfer to IMS technology, so that all the wholesale terms for the change of technology would be transparently determined before the final shut down of local operators, given that this change will have a significant impact on the business of all carriers. With a view to enable the end users to keep track of their costs more simply and transparently, HAKOM introduced an information system called "e-Tariffs System" which gathers, simulates and displays data on the prices for services on the market.

Concerning the more important events in 2012, it is evident that HAKOM has had a very important impact on the state of the electronic communications market.

Within the market regulation, the regulation of the retail broadband internet access market has been carried out, as well as the closely connected market of television broadcasting subject to payment. Based on the EU framework, these markets are not subject to pre-regulation. After the market analysis was completed, carriers possessing a significant market share have been named and imposed regulatory obligations, with the purpose of allowing for efficient and equal competition for all market participants. It has been made clear that the regulation of broadband internet access retail is delayed, and that we can expect the results of the IPTV market regulation in the periods to come.

In order to implement the principle of cost-orientation of prices, after a long term analysis HAKOM determined the methodology of creating and applying cost models for both fixed and mobile networks as well as universal services. Even though the methods of "comparable values" (benchmark) and "retail price minus" (retail minus) were useful as transitory methods, the cost models should represent the final tool in the implementation of price supervision obligations. During the course of 2013 we anticipate the start of cost models application, which should have a more significant impact on the market, primarily in defining the wholesale service costs.

Corporate Governance

There were no changes in the Company's management bodies.

Statement of the Persons in Charge of Financial Statements

In accordance with Article 410 of the Capital Market Act, and in light of the HANFA opinion of 21.10.2010. pertaining to the publication of reports concerning the issuers included in the regulated market, the members of the Board of Directors, Mr. Matija Martić as the CEO, Mr. Goran Jovičić, as a member of the Board and Ms. Jadranka Suručić, as a member of the Board, jointly declare that, to the best of their knowledge, financial statements for the reporting period have been prepared in accordance with applicable standards of financial reporting and that they contain overall and true presentation of assets and liabilities, losses and profits, financial status and operation of the companies included in consolidation.

The interim unaudited annual financial report contains a true presentation of development, results and position of Optima Telekom and its subsidiaries, as well as a description of the most significant risks and uncertainties which the group is exposed to.

(signatures of Board members)

Matija Martić Goran Jovičić Jadranka Suručić

OT-Optima Telekom d.d.
ZAGREB

The Board of Directors has drafted and presented the report for the fourth quarter of 2012 within the Interim unaudited annual financial report. Therefore, there can be certain discrepancies compared to the audited annual report to be drawn up and published by the Company within the proscribed time-frame.

In line with the provisions of the Law on Financial Operations and Settlement before Bankruptcy (the Official Gazette 108/2012 i 11/2012) just before the publication of this Report the company has submitted a motion to initiate the Settlement before Bankruptcy Proceedings.

The Board of Directors would like to emphasize that the above report contains certain statements on future events relative to the financial status, electronic communications market trends, results of activities the company and the group are currently undertaking with the purpose of improving their position on the market. The said statements are based on the best of knowledge and expectations at present, but cannot represent any guarantee of their realization.

The Supervisory Board declares that it accepts the unaudited interim annual financial report in its entirety and confirms that during 2012 the Board of Directors acted in line with the relevant legislation and statutory powers.

Additional information and significant changes have been made available by the company at its website: www.optima.hr/investitori.hr

1. GENERAL INFORMATION

History and incorporation

The company Optima Telekom d.d. (hereinafter: the Company) was established in 1994 as Syskey d.o.o., while its principal operating activity and company name was changed to Optima Telekom d.o.o. on 22 April 2004.

The Company changed its legal status from a limited liability company to a joint stock company in July 2007. The Council of the Croatian Telecommunications Agency issued a licence for public voice service in fixed networks for the company on 19 November 2004, for a period of 30 years.

Principal Business Activities

The Company's principal business activity is the provision of telecommunications services to private and business users in the Croatian market. The Company began to provide its telecommunications services in May of 2005.

In its beginnings, Optima Telekom d.d. focused on business users, but soon after starting business operations, it began to aim for the private users market offering quality voice packages.

To its business users, Optima Telekom d.d. offers services of direct access, internet services, as well as voice telecommunication services through its own network and/or migrated previously chosen services. Along with that, the leading services which Optima Telekom d.d. provides to business users is the IP Centrex solution, among the first of this kind in the Croatian market and IP VPN Services. The existing capacities enable Optima Telekomu d.d. to provide services of collocation and hosting. To its large business clients, the Company also offers specifically designed solutions relying on its exceptional skills in the field of IT technology.

On 6 July 2006 OT-Optima Telekom d.d. acquired 100% of interest in Optima Grupa Holding d.o.o., which changed its name to Optima Direct d.o.o., on 23 September 2008.

The main business activities of Optima Direct d.o.o. are trading and providing various services which mainly relate to telecommunications sector.

In August 2008, the Parent Company increased the share capital of Optima Direct d.o.o. by HRK 15.888 i.e. the share capital was increased from HRK 3.328 to HRK 19.216.

As a sole member-founder, the Company established Optima Telekom d.o.o. Kopar, Slovenia, in 2007.

As a sole member-founder, the Company established Optima telekom za upravljanje nekretninama i savjetovanje d.o.o., on 16 Aug 2011, which currently is not operating

Investments in affiliated companies as on 31 Dec 2012:

3. FINANCIAL INSTRUMENTS

During the reporting period, the Company used most of its financial instruments to finance its operations. Financial instruments include loans, bills of exchange, cash and liquid assets and other various instruments, such as trade receivables and trade payables arising directly from ordinary business activities.

Currency Risk Management

Currency risk may be defined as risk of fluctuation of value of financial instruments due to changes in the exchange rates. The Company's major exposure relates to long-term borrowings denominated in a foreign currency and converted to Croatian Kunas at the exchange rate applicable on the balance sheet date. Gains and losses resulting from conversion are credited and charged to the income statement, but do not affect the cash flow.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the reporting date are given in the following table.

	Liabilities		Assets	
	31 Dec 2012	31 Dec 2011	31 Dec 2012	31 Dec 2011
	in 000 HRK	in 000 HRK	in 000 HRK	in 000 HRK
EUR	585.752	585.805		-23.459
USD	1.939	2.967		0
CHF				
GPB				
	587.691	588.772	0	-23.459

Foreign currency sensitivity analysis

The Company is mainly exposed to the fluctuations in the exchange rate of Croatian Kuna to Euro and US Dollar.

The following table details the Company's sensitivity to a 10% decrease of Croatian Kuna exchange rate in 2012 against the relevant foreign currency. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their conversion at the end of the period on the basis of percent change in foreign currency rates. The sensitivity analysis includes monetary assets and monetary liabilities in foreign currencies. A negative number below indicates decrease in profit and other equity where Croatian Kunas changes for above-mentioned percentage against the relevant currency. For a reverse proportional change of Croatian Kuna against the relevant currency, there would be an equal and opposite impact on the profit and other equity.

	Liabilities		Assets	
	31 Dec 2012 in 000 HRK	31 Dec 2011 in 000 HRK	31 Dec 2012 in 000 HRK	31 Dec 2011 in 000 HRK
EUR	58.575	58.580		-2.346
USD	194	297		0
CHF				
GPB				
	58.769	58.877	0	-2.346

Exposure to the currency exchange for 10% mainly relates to received loans, trade payables and receivables from affiliated companies indicated in Euros (EURO) and US Dollars (USD).

Interest Rate Risk

Long-term liabilities arising from credits and loans with variable interest rates amount to HRK 347,83 million, and therefore, the Company's exposure to the interest rate risk is significant.

Other assets and liabilities, including bonds issued, are not exposed to interest rate risk.

Credit Risk

Credit risk is the risk that the Company's customers will default on their contractual obligations causing possible financial loss to the Company. The Company has adopted procedures which are applied in dealing with customers and it requests and collects payment security instruments, where appropriate, in order to mitigate possible financial risks and losses resulting from a default in payment and fulfilment of contractual obligations.

Trade receivables are monitored continuously in order to determine their risk level and apply the appropriate procedures. Customers' credit ratings are also monitored on a continuous basis in order to establish the Company's credit exposure, which is reviewed at least once a year.

The Company operates with a large number of customers from various industries and of various sizes as well as with individuals who have a specific credit risk. The Company has developed procedures for each particular group of customers in order to ensure that the credit risk is addressed in the most appropriate way.

Liquidity Risk Management

The ultimate responsibility for liquidity risk management rests with the Management Board which is in charge of setting up the appropriate framework for liquidity risk management, all with the purpose of satisfying short-term, medium-term and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves and credit lines, by continuous comparison of planned and realized cash flows and by matching the maturity profiles of financial assets and liabilities.

Liquidity Risk and Interest Rate Risk Table Review

The following tables detail maturity of the Company's contractual liabilities indicated in the balance sheet at the end of the reporting period.

Tables have been created on the basis of undiscounted cash flows of financial liabilities on their due date. The tables include both interest and principal cash flows.

in 000 HRK	Up to one year	From 1 to 5 years	Over 5 years	Total
31 Dec 2012				
Non-interest bearing liabilities	203.833			203.833
Interest bearing liabilities	114.850	726.915	1.883	843.648
	318.683	726.915	1.883	1.047.481
31 Dec 2011				
Non-interest bearing liabilities	108.677			108.677
Interest bearing liabilities	120.063	795.850	2.243	918.156
	228.740	795.850	2.243	1.026.833

The majority of non-interest bearing liabilities of the Company maturing within one year account for trade payables in the amount of HRK 193.602 thousand for the period from January to December 2012 (HRK 97.928 thousand for the same period last year).

Interest bearing liabilities include short-term and long-term borrowings, bonds issued and financial lease.

The following tables detail maturity of the Company's financial assets indicated in the balance sheet at the end of the reporting period. Tables have been created on the basis of undiscounted cash flows of financial assets on their due date. The tables include both interest and principal cash flows.

in 000 HRK	Up to one year	From 1 to 5 years	Over 5 years	Total
31 Dec 2012				
Non-interest bearing liabilities	82.767			82.767
Interest bearing liabilities	32.694	15.199	5.279	53.172
	115.461	15.199	5.279	135.939
31 Dec 2011				
Non-interest bearing liabilities	84.976			84.976
Interest bearing liabilities	750	43.004	4.874	48.628
	85.726	43.004	4.874	133.604

The balance of cash and cash equivalents is indicated under non-interest bearing financial assets due to the low interest rate on these assets.
