## Business and Financial Overview

## Introduction

**I. 1** 

On November 3, 2014, the Company's General Meeting adopted the Decision on increasing the Company's share capital through the issuance of common shares, investment of rights – converting a part of the pre-bankruptcy creditors' claims into share capital, with the exclusion of existing shareholders' priority rights, from the amount of HRK 632,659,190.00 by an amount not exceeding HRK 2,910,110.00, to the maximum amount of HRK 636,569,300.00, through the issuance of a maximum of 291,011 new registered common shares, having the nominal value of HRK 10.00 each.

The pre-bankruptcy creditors who submitted a written statement (subscription form) within the subscription deadline and concluded the agreement on investing rights (claims) into the Company's share capital, have invested claims adding up to HRK 2,908,890.00. The share capital increase from the amount of HRK 632,569,150.00 by the amount of HRK 2,908,890.00 to the amount of HRK 635,568,080.00 has been registered by virtue of the Commercial Court of Zagreb decision, docket no. Tt-15/1314-2, dated February 26, 2015.

After HANFA had rendered its decision Class: up/I-451-04/14-11/03, Cons. No. 326-01-770-772-15-11 on March 27, 2015 approving the registration document, the note on the security and the summary of the prospectus which, taken together, form a prospectus composed of separate documents for the admission of a total of 60,736,738 common registered dematerialized shares, having the nominal value of HRK 10.00 each and the total nominal value of HRK 607,367,380.00 to the regulated market; the cocc has published a notification on conversion of common shares ticker OPTE-R-B into OPTE-R-A on April 7, 2015. Upon execution of Securities conversion, 63.556.808 securities ticker opte-R-A, ISIN: HROPTERAOOO1, each nominal value of 10.00 HRK will be included in the Depository and Clearing and Settlement of CDCC. Pursuant to its Decision Class: UP/I-451-01/15-01/71, Cons. No. 536-15-2 of April 1, 2015, Zagrebačka Burza d.d. allowed the admission of 60,736,738 common shares, each having the nominal amount of HRK 10.00, ticker: OPTE-R-A, ISIN: HROPTERAOOO1, into the official market of the Zagreb Stock Exchange.

Thereby, the Company has completed the admission of common shares issued in the pre-bankruptcy settlement proceedings.

Furthermore, based on the Decision on issuance of 7 year Optima bonds in the amount of HRK 250,000,000.00 dated November 17, 2006, on February 1, 2007 the Company issued a security note. However, given that the Company underwent pre-bankruptcy proceedings in the meantime, the bonds fell due and the Zagreb Stock Exchange suspended trading in these bonds and cancelled their admission as of February 1, 2014.

In the preceding period, the Company complied with its obligations and issued the Prospectus composed of separate documents for the readmission of the bonds and Zagrebačka burza d.d. approved their admission into the official market of the Zagreb Stock Exchange. Namely, on 31 July 2015 HANFA rendered the decision Class: up/I-976-02/15-01/08, Cons. no. 326-01-770-772-15-5 approving the Security Note and prospectus summary which, along with the Registration Document approved by the Agency's decision of 27 March 2015, Class: up/l-451-04/14-11/03, Cons. no. 326-01-770-772-15-11, comprise the prospectus composed of separate documents for the admission of dematerialized registered bonds, ticker OPTE-O-142A, having the nominal value of HRK 1.00 each and the total nominal value of HRK 250,000,000.00, with an annual interest of 5.25%, falling due in 2022. On 3 August 2015 the Company filed an application to the Zagreb Stock Exchange, and on the same day the Stock Exchange rendered the decision Class: up/I-451-01/15-01/139, Cons. No. 536-15-2, approving the admission of HRK 250,000,000.00 worth of bonds, ticker OPTE-O-142A, ISIN: HROPTEO142A5 into the official market of the Zagreb Stock Exchange, and 6 August 2015 has been determined as the first day of security trading.

# Statement by the Chairman of the Board

We have achieved valuable results in this quarter as well. The increase of EBITDA results before special items and the decrease of operating costs has been a continuous process in 2015 and has laid the foundation for further strengthening of Optima's position in the market.

On the other hand, by adjusting our offer, improving the quality of our services and improving the processes that have a direct impact on customer satisfaction, we are working on strengthening our competitiveness and reaching out towards our customers. All of this brings results, so month after month we are faced with a growing inflow of new customers and a decreasing outflow of existing customers.

Taking into account the enhanced marketing activities, as well as investments into the formation and strengthening of Optima's brand, the results are simply inevitable and my expectations for the upcoming period remain positive.

Zoran Kežman, predsjednik uprave

## **Market Overview**

#### **I.** 3

#### **Fixed Telephony Market**

In the fixed telephony market in Croatia there is a negative trend in the use of the service. According to available data, the total outgoing traffic (in minutes) of all fixed public communications network operators in the second quarter of 2015 was 11.23% less compared to the same period of the previous year, with a retail income drop of 3.06%.

This negative trend in the fixed telephony market has been present for a while now and is predicted to continue in the future.

#### **Broadband Access Market**

At the same time, in the second quarter of

2015 the slight growing trend in the use of broadband internet access via fixed networks continued. Compared to the first quarter of 2015, in the second quarter of 2015 the number of broadband access connections via fixed networks increased by 1.16% with an increase in income of 0.75%.

#### **IPTV Market**

The internet protocol based television (IPTV) market has shown a slight drop, where the total number of connections are 0.90% lower in the second quarter of 2015, compared to the first quarter of 2015.

### **Economic Environment**

I. 4

The GDP increase rate was slightly higher than expected in the second quarter of this year, amounting to 1.2%. In this way, along with the 0.5% in the first quarter, the GDP increase in the first half-year period amounted to 0.8%. GDP trends have been characterized by the ongoing goods and services value increase with special emphasis on the export of goods, i.e. the ongoing increase of foreign demand. In the export of goods and services there has been a positive trend for nine quarters in a row now, starting from the second quarter of 2013. This has been facilitated by Croatia's accession to the European Union and the gradual recovery of the European economy. However, the same period, up until the first quarter of this year, had been characterized with the ongoing decrease of domestic demand, primarily personal consumption and gross investments into fixed capital.

During July and August there has been a slight appreciation of the Croatian Kuna towards the Euro. To be precise, in July there was a mild depreciation of the Kuna, even though

around the middle of the month there was a slight appreciation. The strengthening of the Croatian Kuna has been induced by an increased demand for the currency, which came about as a result of the issuance of new state bonds in the domestic market. However, this had only short-term effects and the exchange rate soon returned to the values from the beginning of the month. In August there was a much stronger appreciation of the Kuna, induced by foreign currency inflow from tourism, so the HEK exchange rate was 0.6% higher at the end of the month than at its beginning.

After the stagnation of retail prices in the interannual comparison during May and June, in July there was a yearly drop again (-0.4%), which continued their mild oscillations around zero which has been present for all of last year and the preceding period of this year. The domestic deflatory pressures have been generated from a state of low demand and increased competition due to the complete liberalization of trade as a consequence of EU accession, while the external ones come from

world market of goods and adjusted through exchange rate fluctuations.

The downward trend in unemployment brought about by the main tourist season has lost its edge slightly in July. Namely, the unemployment figures decreased by only 2.1 thousand people compared to June and were 257 994 people, while the registered unemployment rate of 15.9% was only 0.2 percentiles lower than a month before. The annual salary increase trend which started somewhere in the middle of last year gained momentum in June – net salaries increased by 4.5% and gross salaries by 2.3%. Considering that, at an annual level, there was no increase in the retail prices index in June, both nominal and real salaries have increased by the same percentage. This is a relatively high increase in salaries which, in its real segment, has not been recorded since December of 2008 (net salary) or June of 2009 (gross salary).

Anticipating the entry into force of the new Bankruptcy Act, the value of outstanding debts of business entities continues to move slowly. After a mild increase in May, in June and July there was a mild decrease (3.4% total), whereby the value of outstanding payment titles dropped to HRK 27.1 billion, thus being at its lowest level since the end of 2009. The major part of this amount, i.e. HRK 23.7 billion (87.6% of the total value of all outstanding payment titles) represents the debt of business entities whose accounts have been overdrawn over 360 days, while HRK 19.2 billion is owed by companies without a single employee (there are 31.3 thousand of those - two thirds of insolvent companies).

## I.5 Regulatory Environment

In this reporting period, the Croatian Regulatory Authority for Network Industries (hereinafter: HAKOM) has continued to regulate the electronic communications market by complying with its obligation to carry out the process of determining relevant markets subject to ex-ante regulation within two years from Croatia's accession to the European Union. In this way, HAKOM has rendered final decisions in all relevant market analyses.

What remains to be the most significant novelty for the company is the introduction of regulation and charging according to the A number in the in the call termination on individual network market. Namely, instead of the previous price regulation for all calls transferred from the network of one of the national operators or operators from the EU/EEA, now the obligation of price control imposed on the Company in the said market applies to the service of termination of voice calls originating from A numbers belonging to one of the national or EU/EEA operators, irrespective of the network the call is originating from. The

foregoing change has had a positive financial impact on the Company's business, which is expected to continue in the upcoming reporting periods.

наком has rendered a final decision on the deregulation of the retail broadband access market whereby it set aside item 2 of the Interim Decision of 3 July 2014, thus abolishing the regulatory obligations imposed on the Company in the said market. However, by the simultaneous rendering of final decisions in the wholesale (physical) network infrastructure access at a fixed location market and the wholesale central access provided at a fixed location for mass-market products market наком has imposed on Optima, being a subsidiary of HT, respective regulatory obligations of price control and cost accounting, as it did on HT in the said markets. In reality, this means that the Company is obliged to carry out the margin squeeze test for the retail price of internet access service and the related IPTV service, irrespective of whether these are provided independently or as a part of a package

containing other electronic communications services as well.

The changes relating to the previous regulatory obligations of the Company are set out below:

- the obligation to supervise promotional offers and any limitations on promotional activities have been abolished
- the ban on giving unfair advantages to certain end customers has abolished
- the deadline to launch new packages containing the internet and/or IPTV service has been shortened.

The Company anticipates the said changes to have a positive impact on its business by increasing the freedom in creating offers, a swifter response to promotional offers of market competitors and engaging certain customer groups through tailor-made offers.

In view of all said, and bearing in mind that back in November of 2014 HAKOM rendered a final decision in the access to the public communications network at a fixed location market analysis, setting aside item 1 of the Interim Decision of 3 July 2013, Optima's status as an operator with significant market power, as provided in HAKOM's Interim Decision of 3 July 2014, has been entirely abolished.

In this reporting period, pursuant to наком decision of 18 December 2013 (CLASS: UP/I-344-01/13-05/24, cons. no. 376-11/13-10), HT started the process of changing the monthly charge for the wholesale unbundled access to the local loop service (hereinafter: ULL service). Namely, наком's decision of 18 December 2013 imposed a cap for the monthly charge for the ULL service on HT in the amount of HRK 57.30. It has been stated that the monthly charge may not lead to a margin squeeze at retail level, i.e. the spread between overall wholesale and retail costs and HT's retail prices cannot push other operators out of the market. The decision also says that considering that the current monthly charge for the ULL service is нкк 43.61, while the cap is нкк 57.30, if HT wishes to change the monthly charge for this service, it is obliged to provide наком with all necessary information along with its motion to revise the Standard Offer for the ULL Service, so that HAKOM could carry out the margin squeeze test. Considering that after the said decision had been rendered, HT failed to submit the motion to revise and adjust the monthly charge for the ULL service, the monthly charge of HRK 43.61 still applies. Given that the monthly charge for the ULL service is calculated into the price of wholesale broadband access service when the end customer makes basic access to the network via the entrant operator (hereinafter: NBSA service), changing the monthly charge for the ULL service will reflect on the price of the NBSA service, both being HT's wholesale services used by Optima in order to provide retail services to its end customers. In the upcoming reporting period, наком shall render a final decision on the foregoing revision of wholesale prices which will affect the Company's business in the future.

NOTE: 1

#### a. Residential Sales Segment

Significant savings achieved through the operational restructuring program, enabled the Optima investment in marketing and sales activities, focused on reducing the customer outflows and increase on inflow of new customers. As a result, remarkable success has been achieved during the third quarter in the residential segment, in terms of stopping and stabilizing the negative development of customer base from previous years.

Despite a slight 0.2% growth of the residential customer base in the fixed public communications network, revenue has dropped by 5.3%

compared to the previous quarter, the second quarter of 2015. The revenue drop is a result of the decrease in the number of minutes in the national fixed network and certain promotional benefits.

Broadband internet access revenue has increased by 4.5% compared to the second quarter of 2015 with an almost identical customer number as on the end of the second quarter of 2015, which is also a significant change compared to the development of Internet customers in previous periods. The increase in revenue is a result of better sales of service packages offering higher internet speeds.

The data provided differs from previous data published in the Company's financial reports for Q4 2014 and Q1 2015, solely in respect to the customer base data. This is a consequence of circumstances that occurred after the publication of financial reports but had affected reporting.

Namely, in the structure of providing services to end customers there was a change regarding the used wholesale service. Therefore, instead of the previous practice of performing services using the ULL or WLR+CPS+BSA wholesale services, new services are performed by using the ULL or NBSA wholesale service. In cases when the PVS is performed via ULL or via the wholesale WLR+CPS or WLR+CPS+BSA service, the income from PVS access is included in the category of income from PVS. However, in cases when the voice service is performed using the wholesale NBSA service, the access income is allocated and reported in the Internet income category, given that the whole service (both the voice service and the Internet service) has been provided through broadband Internet access. Regardless of the wholesale service used, the income deriving from voice minutes is always reported as PVS income.

Customer growth is noticed in IPTV customer base in the residential segment with a 2.1% decline in revenue. The revenue drop is a result of intensified promotional activities.

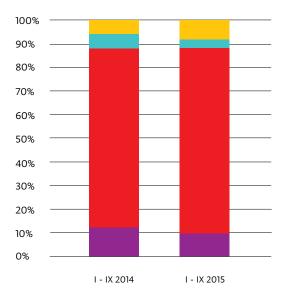

#### **b.** Business Sales Segment

In the business segment, similar as in the residential segment, in the third quarter 2015 were recorded positive development in terms of customer base compared with previous periods. Users of PVC, Internet and data services are increasing, while the IPTV customers remaining almost identical as at the end of the second quarter 2015.

The revenues in business segment in the third quarter is about 0.5% higher compared to the second quarter of 2015.

A 1.0% revenue increase can be found in internet access services with a simultaneous 1.8% increase in the number of connections, which is a result of growing customer needs and a more attractive offer of a more advanced services with higher access speeds.

#### **Interconnection Income Structure**

Data Source: Company's business records

- Data services
- Transit income
- Termination income
- VAS income

The number of active connections of public voice service customers in the business segment has grown by 0.7%, while revenue dropped by 2.0% compared to the second quarter of this year. This is a result of decrease in the number of minutes in the national fixed network, pressures regarding the minute price and the quantity of minutes included in the base monthly fee for the public voice service.

Data services revenue increased by 8.1% due to a 5.8% increase in the number of connections, primarily induced by the activation of connections by two key customers based on previously concluded agreements.

#### c. Wholesale Segment

In the first three quarters of 2015, the wholesale revenues has increased by 9.8% compared to the same period of the previous year. The wholesale voice service (transit) increased by 15.1%. Such and increased has been caused by regulatory changes, i.e. the deregulation of interconnection charges for international calls originating outside the EU/EEA. The positive effects of this are expected to continue in the upcoming periods. At the same time, the wholesale data services revenue drop has declined and remained at 17.3% compared to the same period of the previous year. The trend to slow down the decrease is also present in the termination revenue that has been 35.6% lower in the relevant period, compared to the same period of the previous year. Considering that termination revenue is almost 20% higher in the third quarter of 2015 than in the third quarter of 2014, which is also a consequence of the deregulation of interconnection charges for international calls originating outside the EU/EEA, a further decrease of the downward trend in termination revenue is expected in the upcoming period.

In the first three quarters of 2015, vas service sales revenue increased by 53.0% compared to the same period of the previous year, as a result of the volume increase of the largest business partner.

#### d. Infrastructure, Optical Fiber Network and Internal Services Development

#### **Voice Networks**

In the first nine months of 2015, investments have been made into the voice network by obtaining additional licenses for NGN Switchboards due to the customer base growth. An element of the voice network NGN system, SBC (Session Border Controller), has been procured It will be enabled for IP connecting of class IV IMS and NGN networks of other operators by the end of the year. This will allow for significant savings in the maintenance of existing class IV voice network systems.

A new, internally developed class V NGN switchboard, used for providing voice services to residential customers, has been deployed. This allows for additional savings in the process of obtaining licenses for NGN switchboards.

#### **Data Networks**

At the level of portable DWDM (Dense Wavelength Division Multiplexing) network, the Rijeka-Ljubljana-Zagreb (Vienna) system construction has been completed in the first 9 months of the year. This reduces the Company's operating costs and opens new wholesale possibilities between Rijeka-Ljubljana-Zagreb and Rijeka-Ljubljana-Vienna.

In the towns of: Vrbovec, Zabok, Čepin, Cavtat, Samobor, Đurđevac, Beli Manastir, Imotski, Metković and Ploče new MPLS (Multiprotocol Label Switching) routing tables have been installed for the purpose of upgrading the MPLS core network capacity and raising the quality level, i.e. the accessibility of the network. A physical optimization of the IP/MPLS routing tables is underway in other cities, with a view to increase reliability. The optimization has been completed in 46 MPLS nodes out of a total of 60.

Capacities have been increased in order to satisfy the growing needs, so the core network capacity between zg-st has been enhanced to 2x10Gbps, while the internet upstream capacity went from 4x10Gbps to a total of 6x10Gbps. Within the data center, new firewall systems with 10Gb/s interface have been installed, instead of the old systems having a 1Gb/s interface.

## Network Infrastructure and Optical Fiber Network

Infrastructural development, i.e. the construction of the individual optical fiber network over the course of the first nine months of 2015 consisted primarily of the regular construction of optical feeds to our new end customers.

In numbers, we are talking about 49.3 km of new optical fiber network, consisting of 185 new optical feeds. The comparison of overall lengths shows a 1.67% enlargement of the fiber optic network compared to construction level established at the end of 2014 (3,006.5 km compared to the 2,957.2 km achieved by the end of 2014).

Most feeds and cable routes have been built in the Northern Region (21.3 km), followed by region West (13 km), and then regions South (11.3 km) and East (3.7 km).

#### **Technical Services**

In the technical services segment, hard-copy work orders have been abolished. Being ecologically aware, Optima has switched to electronic assignment distribution only. This has increased internal efficiency and contributed towards preserving the environment.

#### **Internal Application Development**

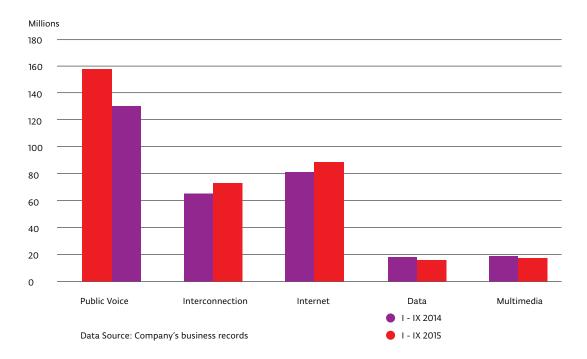

During the first nine months of 2015 the Paperless web system has been developed, i.e. a single entry for contracts concluded over the telephone (internal and partner telemarketing) and signed contracts (internal and partner D2D channel), as well as all the processes related to the provisioning agreement which cut down the average waiting period to service activation compared to the beginning of the year.

## Financial Results of the Group

#### **Telecommunication Services Revenue**

#### a. Consolidated Revenue

Total revenue at the end of the third quarter of 2015 dropped by 4.4% compared to the same period of the previous year.

The revenue decrease is primarily due to the decrease in the number of public voice service users. The Company has also achieved a 9.0% increase in revenue from internet services and an 13.3% interconnection income increase, while the multimedia services income dropped by 8.5%.

Public voice service has shown a declining tendency at a global scale, i.e. the quantity of minutes realized in the public voice service is continuously following a declining trend, showing in the 17.5% decrease in revenue from the public voice service.

## b. Earnings before Interest,Taxation and Depreciation –EBITDA

The consolidated EBITDA is 19.8% higher compared to the same period of 2014. Special items aside, the EBITDA excluding special items amounts to HRK 78.0 million, which represents an 18.5% increase compared to the same period of the previous year.

The implementation of cost restructuring has also had an impact on the EBITDA margin which, alongside the 8.4% revenue drop, went up from 18.0% at the end of the third quarter of 2014, to 23.3% at the end of the third quarter of 2015, which represents a 5.3 percentile increase.

Observing the third quarter of 2015 alone, the EBITDA excluding special items increased by 21.8% compared to the third quarter of 2014. In absolute values, it increased from HRK 23.4 million from 2014 to HRK 28.5 million in the third quarter of 2015.

#### c. Net Profit / (Loss)

Special income from the previous year aside, and taking into account rise in the USD exchange rate and the increase of financial costs relating to the pre-bankruptcy settlement, the net financial result before special items is up by HRK 6.3 million compared to the first three quarters of 2014.

The net result before special items of the third quarter of 2015 is HRK 6.0 million higher compared to the third quarter of 2014.

## d. Capital Investments in the first nine months of 2015

Consolidated capital investments in the first three quarters of 2015 amounted to HRK 30.8 million. Out of this, HRK 7.3 million has been invested in the development of access fiber optic network, expanding the collocations network, user equipment for providing the IPTV and internet service, as well as the equ-

ipment to connect new business customers. HRK 9.3 million has been invested into the core network, which was used for the most part to further expand the core network to the 10G technology, while HRK 14.2 million have been invested in expanding the range of customer services.

|                               | 30.09.2015 (HRK) | share % |
|-------------------------------|------------------|---------|
| General Investments           | 87.071           | 0%      |
| Capital Technical Investments | 30.744.411       | 100%    |
| ACCESS Network                | 7.268.301        | 24%     |
| CORE Network                  | 9.252.920        | 30%     |
| Telecommunications Center     | 14.223.191       | 46%     |
| TOTAL                         | 30.831.482       | 100%    |

#### e. Risk Management

#### **Currency Risk Management**

The currency risk is the risk that the value of financial instruments will change due to exchange rate changes. The Company's highest exposure to currency risk arises out of long-term loans, denominated in foreign currencies and recalculated into HRK applying the relevant exchange rates as per the balance sheet date. Any exchange rate divergences shall be attributed to operating costs or recorded in the profit and loss account, but do not influence the cash flow.

#### **Interest Risk**

The Company's exposure to interest risk is not significant, given that the Company's liabilities have not been agreed subject to variable interest rates.

The remaining assets and liabilities, including issued bonds, are not exposed to interest risk.

#### **Credit Risk**

The credit risk is the risk of non-payment or default in compliance with contractual obligations by the Company's buyers, which affects the Company's potential financial loss. The Company has adopted procedures it applies in transactions with customers and gathers pay-

ment securities whenever possible, as a means of protection against potential financial risks and losses due to default in payment and in other contractual obligations. Customer receivables are monitored continuously in order to determine their risk level and implement the appropriate procedures. The creditworthiness of the Company's customers is monitored continuously, and the credit exposure towards the same is reviewed at least once a year. The Company trades with a large number of customers from different business structures and sizes, and with physical persons who have a specific credit risk. The Company has developed procedures for each individual customer group in order to ensure appropriate credit risk management.

#### **Liquidity Risk Management**

The Board of Directors holds the responsibility for liquidity risk management and sets the appropriate framework for liquidity risk management, with a view to manage short-term, mid-term and long-term financing and liquidity requirements. The Company manages the liquidity risk by maintaining adequate reserves and credit lines, continuously comparing the planned and achieved cash flow and monitoring the receivables and liabilities due dates.

#### 1. GENERAL INFORMATION

#### Principal Business Activities

The Company's principal business activity is the provision of telecommunications services to private and business users in the Croatian market. The Company began to provide its telecommunications services in May of 2005.

In its beginnings, Optima Telekom d.d. focused on business users, but soon after starting business operations, it began to aim for the private users market offering quality voice packages.

To its business users, Optima Telekom d.d. offers services of direct access, internet services, as well as voice telecommunication services through its own network and/or migrated previously chosen services. Along with that, the leading services which Optima Telekom d.d. provides to business users is the IP Centrex solution, among the first of this kind in the Croatian market and IP VPN Services. The existing capacities enable Optima Telekomu d.d.to provide services of collocation and hosting. To its large business clients, the Company also offers specifically designed solutions relying on its exceptional skills in the field of IT technology.

|   | 41.773.702 |
|   |            |

#### 3. FINANCIAL INSTRUMENTS

During the reporting period, the Company used most of its financial instruments to finance its operations. Financial instruments include loans, bills of exchange, cash and liquid assets and other various instruments, such as trade receivables and trade payables arising directly from ordinary business activities.

#### **Currency Risk Management**

Currency risk may be defined as risk of fluctuation of value of financial instruments due to changes in the exchange rates. The Company's major exposure relates to long-term borrowings denominated in a foreign currency and converted to Croatian Kunas at the exchange rate applicable on the balance sheet date. Gains and losses resulting from conversion are credited and charged to the income statement, but do not affect the cash flow.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the reporting date are given in the following table.

|                          | Liabilities         Asse           30 Sep 2015         30 Sep 2014         30 Sep 2015           in 000 HRK         in 000 HRK         in 000 HRK |                | Assets                        |              |  |

|                          |   |                | <b>30 Sep 2014</b> in 000 HRK |              |  |
| EUR<br>USD<br>CHF<br>GPB | 234.807<br>424  | 252.306<br>211 | -17.332<br>0                  | -15.323<br>0 |  |
| _                        | 235.231   | 252.516        | -17.332                       | -15.323      |  |

#### Foreign currency sensitivity analysis

The Company is mainly exposed to the fluctuations in the exchange rate of Croatian Kuna to Euro and US Dollar.

The following table details the Company's sensitivity to a 10% decrease of Croatian Kuna exchange rate in 2014 against the relevant foreign currency. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their conversion at the end of the period on the basis of percent change in foreign currency rates. The sensitivity analysis includes monetary assets and monetary liabilities in foreign currencies. A negative number below indicates decrease in profit and other equity where Croatian Kunas changes for above-mentioned percentage against the relevant currency. For a reverse proportional change of Croatian Kuna against the relevant currency, there would be an equal and opposite impact on the profit and other equity.

|      | Liabili                   | ities       | Assets      |                           |  |
|------|---------------------------|-------------|-------------|---------------------------|--|
|      | 30 Sep 2015<br>in 000 HRK | 30 Sep 2014 | 30 Sep 2015 | 30 Sep 2014<br>in 000 HRK |  |
|      | IN UUU HKK                | in 000 HRK  | in 000 HRK  | IN UUU HKK                |  |
| EUR  | 23.481                    | 25.231      | -1.733      | -1.532                    |  |
| USD  | 42                        | 21          | 0           | 0                         |  |
| CHF  |                           |             |             |                           |  |
| GPB_ |                           |             |             |                           |  |
|      | 23.523                    | 25.252      | -1.733      | -1.532                    |  |

Exposure to the currency exchange for 10% mainly relates to received loans, trade payables and receivables from affiliated companies indicated in Euros (EURO) and US Dollars (USD).

#### Interest Rate Risk

The Company's exposure to interest rate risk is not significant, since the Company has no liabilities at variable interest rates

Other assets and liabilities, including bonds issued, are not exposed to to interest rate risk

#### Credit Risk

Credit risk is the risk that the Company's customers will default on their contractual obligations causing possible financial loss to the Company. The Company has adopted procedures which are applied in dealing with customers and it requests and collects payment security instruments, where appropriate, in order to mitigate possible financial risks and losses resulting from a default in payment and fulfilment of contractual obligations.

Trade receivables are monitored continuously in order to determine their risk level and apply the appropriate procedures. Customers' credit ratings are also monitored on a continuous basis in order to establish the Company's credit exposure, which is reviewed at least once a year.

The Company operates with a large number of customers from various industries and of various sizes as well as with individuals who have a specific credit risk. The Company has developed procedures for each particular group of customers in order to ensure that the credit risk is addressed in the most appropriate way.

#### Liquidity Risk Management

The ultimate responsibility for liquidity risk management rests with the Management Board which is in charge of setting up the appropriate framework for liquidity risk management, all with the purpose of satisfying short-term, medium-term and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves and credit lines, by continuous comparison of planned and realized cash flows and by matching the maturity profiles of financial assets and liabilities.

Liquidity Risk and Interest Rate Risk Table Review

The following tables detail maturity of the Company's contractual liabilities indicated in the balance sheet at the end of the reporting period.

Tables have been created on the basis of undiscounted cash flows of financial liabilities on their due date. The tables include both interest and principal cash flows.

| in 000 HRK                       | Up to one year | From 1 to 5<br>years | Over 5 years | Total   |
|----------------------------------|----------------|----------------------|--------------|---------|
| 30 Sep 2015                      |                |                      |              |         |
| Non-interest bearing liabilities | 110.446        | 41.566               | 12.824       | 164.836 |
| Interest bearing liabilities     | 26.865         | 195.543              | 219.482      | 441.890 |
|                                  | 137.311        | 237.109              | 232.306      | 606.726 |
| 30 Sep 2014                      |                |                      |              |         |
| Non-interest bearing liabilities | 89.307         |                      |              | 89.307  |
| Interest bearing liabilities     | 1.992          | 228.800              | 164.052      | 394.845 |
|                                  | 91.299         | 228.800              | 164.052      | 484.151 |

The majority of non-interest bearing liabilities of the Company maturing within one year account are related to trade payables.

Interest bearing liabilities include short-term and long-term borrowings, bonds issued and financial lease.

The following tables detail maturity of the Company's financial assets indicated in the balance sheet at the end of the reporting period.

Tables have been created on the basis of undiscounted cash flows of financial assets on their due date. The tables include both interest and principal cash flows.

| in 000 HRK                       | Up to one year | From 1 to 5<br>years | Over 5 years | Total   |
|----------------------------------|----------------|----------------------|--------------|---------|
| 30 Sep 2015                      |                |                      |              |         |
| Non-interest bearing liabilities | 127.358        |                      |              | 127.358 |
| Interest bearing liabilities     | 16.307         | 506                  | 3.839        | 20.652  |
|                                  | 143.666        | 506                  | 3.839        | 148.011 |
| 30 Sep 2014                      |                |                      |              |         |
| Non-interest bearing liabilities | 124.895        |                      |              | 124.895 |
| Interest bearing liabilities     | 2.685          | 158                  | 3.479        | 6.321   |
| -                                | 127,580        | 158                  | 3,479        | 131,217 |

The balance of cash and cash equivalents is indicated under non-interest bearing financial assets due to the low interest rate on these assets.
