## MANAGEMENT REPORT FOR THE PERIOD 01.01-30.06/2018

ULJANIK PLOVIDBA d.d. (the Company) with its registered office in Pula, Carrarina 6, Personal identification number (OIB): 49693360447 and Tax number: 3292754, is a joint stock company registered at the Commercial Court in Pazin. The share capital of the Company amounts to 232,000,000 HRK, and is divided into 580,000 ordinary shares. The Company's shares are listed on the Official Market of the Zagreb Stock Exchange, under the symbol ULPL-R-A, and represent one of the CROBEX index components. The consolidated financial statements of the Group ULJANIK PLOVIDBA for the period 1 January to 30 June 2018 represent financial statements of the Company and its subsidiaries. The principal activity of the Company is an international maritime transport in the dry cargo sector with Supramax bulk carriers and transportation of petroleum products, chemicals and oil with MR tankers.

At the end of the reporting period the fleet consists of four MR tankers and two Supramax bulk carriers with an average age of 6 years. In addition, the company performs management services for third party customers for several vessels.

Bodies of the Company are the General Assembly, the Supervisory Board and Management Board. The members of the Supervisory Board are: Amra Pende, the president, Anton Brajković and Robert Banko, the members. The Management Board represents Dragutin Pavletić, the director of the Company. During the first half of 2018 there were no changes of members of the Supervisory Board, nor of the Management Board.

The consolidated financial statements have been presented in HRK and prepared in accordance with International Financial Reporting Standards.

The business activity of the Company and its foreign subsidiaries in the first half of 2018 was regular, with full employment of vessels and high functioning management system. Unfortunately, instability associated with the implementation of customs barriers and additional charges has directly affected the global exchange of goods and reduction of transport activities especially in the US, China, Canada and EU countries. In the current period trends in dry cargo sector have been characterized by continued growth in freight rates and values of the vessels, as a reflection of increased activity in all major world economies, and hence increased transport of goods. The realized freight rates in Supramax sector are significantly higher than average freight rates realized in 2017, with further increase in value, as a result of a small number of delivered/contracted new buildings. Continuation of economic activity in China is the main generator of bulk cargo operations. Expectations for this and the next year are extremely favourable in this sector, so a prediction of further increase in freight rates and values of ships is realistic, despite the influence of customs barriers mentioned above.

In the petroleum products, oils and chemicals transportation sector the first half of the year was characterized by continuation of decrease in freight rates, primarily due to the delivery of a larger number of newly built tankers in the last year as well in the beginning of this year. The recovery of the market in tanker transportation is expected in this year as a result of increased demand and a fall in the number of newly constructed / newly contracted tankers, the first indications of which are already visible on the world market through increased interest of large transport users namely for long-term arrangements. It is an encouraging fact that a very low number of contracts for the construction of MR tankers have been concluded in this year, that there has been a further shift of delivery deadlines of the new buildings and also, that have increased ship scrapping activities for this type of vessels.

In the first half of 2018 the Company:

- a) achieved a consolidated EBITDA for the Group of 41.0 mil HRK,
- b) generated consolidated net profit of 2,168,957 HRK compared to the net loss of 592,672 HRK in the previous comparative period ,
- c) realized a reduction in operating income as a direct consequence of operating with a smaller number of vessels in the fleet but also an increase in total revenues due to significant financial income realized in the first half of 2018,
- d) reduced operating costs of the vessels by continuing the rationalization policy that was introduced in previous years,
- e) achieved constant employment of vessels with the continuation of the Company's fleet high efficiency trend,
- f) retained the proper solvency and liquidity,
- g) decreased its overall credit exposure and fulfilled all its loan payment obligations.  
In the first half of 2018 the Company repaid its loan obligations in a total of 14,127,408 USD,
- h) conclusion of a long-term syndicated loan agreement with PBZ / HBOR for a total amount of 54 million USD refinancing loan commitments for m/t Champion Istra and Verige
- i) sale of the oldest vessel from bulk fleet, m/v Levan, with full write-off of the ship and settlement of all its loan obligations,
- j) proceeded with full implementation of the safety and quality system on the vessels and in the office, with continuous increase in the quality and expertise of the employees and maintenance of a high level of professionalism
- k) maintained high efficiency of vessels' management including the third party management,
- l) fully collected contracted freights from the Charterers of all vessels with their full performance.

A review of the functions in the Company is given below:

## **1. COMMERCIAL ASPECT**

The consolidated operating revenues for the reporting period of 87,055 thousand HRK compared to 98,852 thousand HRK in the same period of 2017 a result of a smaller number of vessels in the fleet. Fixing of all bulk carriers to periods with freights directly related to the movement of the relevant index, the effects of continuing trend of specialization of transport in the tanker sector as well as the effects of measures for additional cost reduction in the observed period, have created the assumptions for a positive financial result and will have a positive impact on the total realized income and operating results in the forthcoming period.
