

Varaždin, July 31st, 2020

In accordance with the provisions of the Capital Market Act, the Management Board of Varteks d.d. based in Varaždin submits:

### MANAGEMENT INTERIM REPORT

For the second quarter of the year 2020 (cumulative period 01.01. – 30.06.2020/unaudited)

Indications of significant events that occurred during the reporting period and the impact of these events on the condensed set of financial statements

In the second quarter of 2020 Varteks Group had revenue of HRK 30.6 million which is 42% less than second quarter of 2019 Varteks d.d. had revenue of HRK 20.5 million which is 53% less than second quarter of 2019.

The mentioned decline in revenues of the Group and the Company is a direct consequence of the impact of the crisis due to the coronavirus pandemic. In the Retail and Wholesale segment all stores were closed except the web shop in the period from March 9<sup>th</sup> to April 27<sup>th</sup>, which resulted in a sharp decline in revenues. In the Production for Others segment, orders from key foreign customers were reduced by 50% and additional price increase opportunity was missed out.

Adverse impact of the crisis was partly amortized by state grant for employees' salaries from March to May in the total amount of HRK 15.1 million, whereby the Company achieved positive normalized H1 EBITDA including grants of HRK 5.1 million. State grants at the Group level amount to HRK 15.6 million. The Group achieved positive normalized H1 EBITDA including grants of HRK 5.5 million. Actual performance was still below budget for 2020 which was set ambitiously after achieving excellent results in 2019 (2019: achieved growth of Retail and Wholesale segment of 59% and an increase of EBITDA by HRK 10.6 million.

In June, revenues in the most significant Retail and Wholesale segment were increased by 36% compared to the previous month and are higher by 17% than projected revenues as compared to the crisis business plan of the Group and the Company. In July, the recovery trend slowed down somewhat and retail revenues were lower by 17% compared to 2019, which, given the new wave of the corona crisis, confirms the strength of the Varteks brand and the potential for rapid recovery after the crisis. Web shop sales in the first half of 2020 reached 13% of retail revenue, which is at the level of established global brands and the further strengthening of omni-channel sales. The realized normalized gross margin in the Retail and Wholesale segment in the first 6 months is 30%, primarily due to significant discounts, which is fully expected and at the level of the crisis plan, but compared to the first 6 months of 2019 there was a decrease of 23 percentage points.

# VARTEKS

In the segment of Contract manufacturing, the decline in revenues in the second quarter of 2020 compared to the same period last year amounted to HRK 8.4 million, which is a drop of 60%, while at the level of the first 6 months there was a drop of HRK 11 million, which is a drop of 39%. Given the current orders, by the end of the year we expect a total drop in revenue of 55% compared to 2019. Taking into account that in 2019 the segment of Contract manufacturing engaged 51% of available production capacity and due to expected reduced orders from foreign customers by the end of the year, the Management Board of the Company decided to use the grants for preserving jobs by shortening working hours. This measure is expected to provide an additional grant inflow in the amount of HRK 5.8 million by the end of the year, which will allow the flexibility to increase production capacity during the recovery of domestic and foreign markets.

In the segment of Special-purpose clothing, in the second quarter, net income grew by 6% compared to the same period last year, and a positive normalized EBITDA of HRK 0.8 million was achieved. Given that the business model of the segment is based in part on public procurement contracts, the conclusion of contracts ensures short-term and medium-term capacity utilization and business stability.

The impact of the coronavirus pandemic is visible through the normalized EBITDA result of the Group. The drop in gross profit in the first 6 months of 2020 of HRK 14.9 million compared to last year was partly mitigated by good control over operating expenses and reduced investments in marketing and promotion in the amount of HRK 2 million. The inclusion of incentives in the calculation of EBITDA fully offsets the operational loss caused by the crisis due to the coronavirus pandemic.

<sup>\*</sup> IFRS 16 effects were not reported in the financial statements for Q2 2019

With regards to financial activities of the Varteks Group, in the second quarter of 2020 a net expense was HRK 0.9 million which is HRK 0.2 million more than the same period last year. The increase in interest expense from HRK 0.5 million to HRK 1.7 million compared to the same period last year is the result of the use of the correct accounting treatment of the club loan (the correction is described in detail in the annual reports for 2019) which resulted in an increase in interest expense of HRK 0.6 million due to the amortization of profit arising from the recognition of significant difference in financing terms (refinancing of borrowings). The application of IFRS 16 resulted in an additional interest expense of HRK 0.2 million. At the same time, due to the strengthening of the HRK exchange rate against the EUR, there were positive unrealized exchange rate differences in the amount of HRK 0.8 million that arose on long-term bank loans.

# The most significant risks and expectations for the future

In 2019, the full effects of the implemented restructuring activities were achieved, and the extraordinary growth of retail revenues was an important step in the further development and stabilization of operations. While in the first half of 2020, the operations of the Company and the Group were severely affected by the coronavirus pandemic, a recovery is expected in the second half of the year. The key business segment of the Group (Retail and Wholesale) achieves extremely high growth rates month on month and the results in June and July are comparable with the results of the same period in 2019, which indicates a rapid recovery and is the basis for ambitious plans to further expand in 2021.

Illiquidity remains the most significant business risk of the Group in the short term. Pressure on the Group's cash position is evident given the reduced inventory turnover due to the drop in revenues in the period from March to May, the short-term excess of production capacity due to reduced orders from key foreign customers and the maturity of liabilities from previous periods. The impact of the crisis in the period from March to May was partially amortized by state financial grant, and new measures to reduce working hours will temporarily reduce production capacity and fixed operating costs, thus mitigating the negative effect of short-term reductions in foreign orders.

The Company continues to monetize non-operating real estate at prices higher than estimates, which improves the liquidity and capital position of the Company and the Group in the short term, and stabilizes operations and reduces debt in the medium and long term.

The following is a chronology of important events caused by a coronavirus pandemic and other important events in 2020:

- March 9th as of this date revenue in the Retail segment is plummeting in comparison to the week before by 32%, and it continues to fall from 50% to 80%
- March 19th we are forced to close all stores with the exception of web-shop
- Mid-March and End-March negotiation for the new credit facilities to finance working capital, which was in the late stage of realization, had not been concluded due to the financial market crisis caused by the coronvirus epidemic
- March 23rd an online application was sent for Government grant in the form subsidy for 3
  minimum monthly salaries for each employee for months of March, April and May. Grant of
  15.6 million was approved
- Mid-March and beginning of April the largest customer in the Contract manufacturing segment is reducing orders by 50%
- March 24th Contract manufacturing has been halted for safety reasons and from this day until April 1st only washable face masks are being produced with significantly reduced number of production workers. First 70.000 produced masks (valued at HRK 700 thousands)

were donated to the Civil protection of the Republic of Croatia and Ministry of the Interior of the Republic of Croatia

- April 1st Contract manufacturing production was restarted with limited capacity for safety reasons; however with significantly reduced orders
- April 27th stores that are not located in shopping malls were opened (participate in the total retail revenues with a lesser extent)
- May 11th stores in shopping malls with strict protection measures against COVID-19 were opened
- May 11th a pre-agreement was signed for the sale of part of the property in Varaždin. The
  area that is the subject of the pre-agreement is approximately 33,900 m2. Fulfillment of the
  defined preconditions for concluding the main contract is expected in the first quarter of
  2021.
- July 3rd receipt of down payment according to the preliminary Sale agreement for the sale
  of the property, which marks the start of the monetization of inactive assets. Despite the fact
  that we are in a difficult liquidity situation, it was necessary to forward a significant part of
  this down payment to settle the short-term club loan, which made the financial stabilization
  of the company difficult.
- July 15th a request for state grants in the form of shortening the working week was submitted. in the next 7 months, we expect to exercise the right to grants in the total amount of HRK 5.8 million
- July 29<sup>th</sup>— a reguest was submitted for installment payment and partial tax liabilities write-off.
   In the period from March 20th to June 23rd 2020, the revenue decreased by more than 50% compared to the same period in 2019.
