### Subject: New deals on the project Edison

AD Plastik won a nomination for additional deal on the project Edison, more accurately for the production of center console for the vehicles Smartfour (S4S) and Smarttwo (S2S). This refers to a transfer of production which previously took place at the plant Reydel in Rougegoutte, France. According to plan, the transfer includes a total of 19 tools which will be realized in three stages ending with winter shutdown.

These consoles will be produced at our sites in Zagreb and Solin and deliveries should start in early 2017. The estimated revenue from this deal amounts to three million euros per year.

Member of the Management Board

Katija Klepo
