Headline: **DALEKOVOD's Daughter Company Signs an Agreement with a British Client**

**Zagreb, October 3, 2013 – Dalekovod Projekt d.o.o., a daughter company of Dalekovod d.d., has signed a design planning services agreement with British construction company Costain.**

Costain has signed an agreement with UK Power Networks (one of the British Distribution System Operators) concerning the design planning and performance of works associated with the reconstruction of the existing 132 kV power line and installment of optical fiber ropes. Dalekovod Projekt d.o.o. has been engaged to carry out the design planning component of the reconstruction project.

Costain is a renowned British company engaged in the construction of infrastructural facilities (roads, energy production facilities, railroads, airports) and natural resources (water, gas, nuclear energy).

This agreement is extremely important for Dalekovod Projekt d.o.o., and for Dalekovod d.d. as well, since it is one of the major international projects that will secure long-term presence of these companies in the relevant market and since it also represents the first step in the process of penetrating that demanding market.

Dalekovod d.d.
