Subject-matter: **Major New Contract for Dalekovod in Poland**

Zagreb, February 3, 2014 - It has been announced on the web pages of the company PSE S.A. Poland (Transmission System Operator) that the works contractor for the construction of a double circuit 400 kV transmission line Kozenice-Oltarzew in Poland has been chosen. The contract for the construction was awarded to the consortium of the company Dalekovod Polska S.A., a company which is 100% owned by the company Dalekovod d.d. and the Polish company ZUE S.A., the consortium leader.

This is a "turn key" project. A transmission line, 132 kilometers long, will be constructed and will connect TE Kozenice, one of the largest power plants in Poland, with the Warsaw Region.

The project is worth a bit over 110 million euros. The works will take place from the contract signing until the middle of 2019.
