Heading: Dalekovod Proizvodnja d.o.o. Signs Framework Agreement for the Supply of Suspension Equipment to Norwegian Buyer

In an international tendering process Dalekovod Proizvodnja d.o.o. was awarded the suspension equipment supply contract by Norway's transmission system operator Statnett after the pre-qualification round and with the world's leading suppliers of suspension equipment submitting their competing offers.

Under the signed Framework Agreement for the Supply of Suspension Equipment Dalekovod Proizvodnja d.o.o. will be responsible for 50% of the Statnett's TOTAL annual suspension equipment requirements, while the other half will be provided by other suppliers. The supply will include suspension equipment for 420 and 132 kV transmission lines.

Dalekovod d.d. and Dalekovod proizvodnja d.o.o. have been exporting products and services to Norway for years and the companies have gained a good reputation as highly reliable partners and suppliers of high-quality products. Due to extreme weather conditions there are special design and quality requirements and pre-qualification is necessary so that all of the quality, safety and environmental standards would be met, which will be assured by repeated testing.

Additionally, Norway and Statnett are dedicated to the highest ecological and environmental standards, so part of the equipment will have special protective properties to ensure compliance with ecological standards and minimize environmental impact.
