Title: ELES and Dalekovod optimistic about continuation of works on the Beričevo-Krško project

A meeting of the management boards of the companies Elektro-Slovenija d.o.o. and Dalekovod d.d. was held on Tuesday 15 January 2013 in Ljubljana. The joint meeting was held with a view of solving the problems related to the TL 2x400 kV Beričevo-Krško transmission line. Both parties have expressed their intention to solve the arisen open issues in order not to jeopardise the performance of contracted works and the scheduled completion thereof. Dalekovod shall as soon as possible eliminate all ambiguities and submit its answers to the questions posed by Elektro-Slovenija d.o.o. and shall accordingly continue performance of works on the captioned project.

Sincerely yours,
