Headline: Dalekovod successfully completed yet another project in Ukraine

Ukraine, August 20, 2013 – With the ceremonial opening of the reconstructed 330/110 kV Transformation Station Bar, Dalekovod successfully completed yet another project in Ukraine.

The opening ceremony was attended by the Ukrainian Minister of Energy, the Croatian Ambassador to Ukraine, the IBRD Director for the Ukraine, representatives of Dalekovod d.d., and other distinguished guests.

Transformation Station Bar is the final point of the 330 kV HE Dniestrovskaya – TS Bar power transmission line completed by Dalekovod last year.

The 330/110 kV Transformation Station Bar reconstruction project was financed by the International Bank for Reconstruction and Development (IBRD) and represents a significant improvement in the power supply system in that part of the Vinita district.

Dalekovod has been successfully operating in the Ukrainian market for years, where it also runs a daughter company and a subsidiary.
