

Zagreb – 28 October 2011

T-Hrvatski Telekom Results for the nine months to 30 September 2011

Recession, regulatory initiatives and special tax continue to impact business; revenue fall of 3.6%, limited by Combis contribution and strong IP revenue growth; solid margins on effective cost management

T-Hrvatski Telekom (Reuters: THTC.L, HT.ZA; Bloomberg: THTC LI, HTRA CZ), Croatia's leading telecommunications provider, announces unaudited results for the nine months to 30 September 2011.

Group Highlights

- Revenues down 3.6% to HRK 6,092 million or EUR 822 million (Jan-Sep 2010: HRK 6,321 million, EUR 871 million)
 - Combis contributes HRK 281 million or EUR 38 million (Jan-Sep 2010: HRK 110 million, EUR 15 million. Consolidated from May 2010)
 - Underlying revenues down 7.6%, excluding both Combis contribution and revenue recognition after change in useful life of customer relationship as outlined on page 7
- IP and ICT revenues show continued growth
- Cost control initiatives continue
- EBITDA down 2.1% at HRK 2,799 million (EUR 378 million) and 46.0% margin (Jan-Sep 2010: HRK 2,858 million or EUR 394 million, 45.2%)
- Net profit almost flat at HRK 1,483 million (EUR 200 million)
- Operating cash flow down 14.8% to HRK 1,894 million (EUR 256 million)
- T-HT has reviewed its continued participation in the privatisation process; unconfirmed media reports suggest Government of Kosovo has cancelled process

Residential Segment

- T-HT maintained its leading position in all three markets (mobile, fixed line and IP)
- Introduced new mobile tariffs targeting a range of customer segments
- Mobile subscribers up 3.5% (up 2.9% on Q2 2011), following change in definition of prepaid subscribers as outlined on page 7
- 538,443 ADSL mainlines, up 8.3% from Q3 2010 (flat to Q2 2011), and 317,847 TV customers, up 21.7% (up 4.6% on Q2 2011)
- Revenues down 5.0%, due largely to lower voice revenues in the mobile and fixed network and lower non voice revenue in mobile

Business Segment

- Stable customer base across all segments and products/tariffs
- Mobile subscribers up 5.6% (up 1.1% on Q2 2011)
- 109,342 ADSL mainlines up 6.0% (up 0.9% on Q2 2011) and 18,919 TV customers, up 17.0% (up 2.6% on Q2 2011)
- Revenues down 1.9%
 - IP and ICT revenues showing further growth with new ICT services launched

Ivica Mudrinić, President of the Management Board and CEO, said:

"T-HT has released another robust set of results against the backdrop of a difficult economic environment and our revenue was 3.6% lower in the period. However, we have maintained our strict cost control initiatives and we are reporting a solid EBITDA margin, whilst ICT services provider Combis has made a positive contribution to our business. Despite further downward pressure from regulation

and intense competition across all our operations, we have maintained our number one position across all areas of business.

“Furthermore, the Government of Croatia is proposing to abolish the 6% fee on mobile network services introduced in 2009 and this should have a positive impact on the Croatian telecoms sector. Nevertheless, the existing regulatory regime continues to deter investment in a next generation communications/fiber infrastructure that would help to stimulate economic growth in Croatia.”

About T-Hrvatski Telekom

T-Hrvatski Telekom (T-HT) is the leading provider of telecommunication services in Croatia, serving more than 1.3 million fixed lines, nearly 2.5 million mobile subscribers and 648,000 broadband connections through its Residential and Business divisions.

Since its initial public offering in October 2007, T-HT shares have traded on the Zagreb Stock Exchange, with global depositary receipts trading on the London Stock Exchange. Deutsche Telekom AG owns 51% of T-HT's shares, with the War Veterans' Fund owning 7%. The remaining free float is in the hands of private and institutional investors.

Results for the nine months to 30 September 2011

Business and financial review

Introduction

T-Hrvatski Telekom is Croatia's largest telecommunications provider and the market leader in all segments in which it operates. At 30 September 2011, the Group served 1.3 million fixed-line customers, nearly 2.5 million mobile subscribers, 648,000 broadband connections and provided TV services to more than 337,000 customers. In March 2010, T-HT acquired the ICT company Combis, significantly expanding its ability to provide integrated solutions to Croatia's business market.

Market overview

The key event in the Croatian telecommunications sector in recent months has been the acquisition by VIPnet, the second largest mobile player, of leading cable operator B.net in June 2011. This is expected to increase competition in integrated telecommunications products. Major growth areas in the sector are broadband and TV, while usage of fixed telephony continued to decline in line with expectations and world-wide trends. With new regulation in force from July 2011 regarding Wholesale Line Rental (WLR) and naked bit-stream, all operators are now achieving full country-wide reach.

The Croatian mobile market also declined throughout 2011 owing to market saturation and the impact of the recession (reduced consumer purchasing power and the 6% tax on mobile services imposed in August 2009). Increased availability of smartphones and mobile broadband devices boosted mobile broadband usage, however.

T-HT remained the leader in a saturated market served by three operators since 2005. All three operators offer new tariff bundles with combinations of voice, messaging and data both to consumer and business customers, along with new offers such as e-books. According to the Croatian Central Bureau of Statistics, total Croatian mobile MOU increased by 4.0% in first half 2011. Mobile Internet promotion has intensified as all three mobile operators promote new mobile broadband products with attractive smartphone and tablet deals.

Fixed telephony remains competitive in Croatia with 10 active operators, while VIPnet's recent acquisition of B.net is likely to increase competition in integrated telecommunication products.

T-HT has successfully maintained its leading market position in all segments. This reflects the Group's continuing dedication to high-quality services and improved marketing with offers tailored to suit the needs of specific customer segments.

According to the Croatian Central Bureau of Statistics, the number of fixed-line minutes of use (MOU) decreased by 9.4% in first half 2011. Fixed-line penetration remained stable at 42% of the population, according to the National Regulatory Agency.

T-HT Group remained the largest provider of broadband services in Croatia, continuing to expand the roll out of its high-speed MAXdsl offering and augmenting it with premium services such as MAXtv – the Group's TV service. During first nine months of 2011 a new player entered in the Croatian pay TV market but T-HT continued to enrich its TV offer with the addition of new TV channels and social media functionality. Croatia's broadband market remains a growth area for T-HT, with approximately 45% of

Croatian households connected via fixed broadband compared to an average of around 62% in Western Europe.

Economic background

After nine consecutive quarters of decline, Croatia's GDP recorded very moderate growth of 0.8% in the second quarter of 2011 boosted by exports and consumption. At the same time, however, the decline in investment continued. Revised forecasts have lowered Croatia's estimated GDP growth to just between 0.5% and 0.8% for FY 2011.

Registered unemployment remains high at 16.8% in September 2011 (September 2010: 16.9%) according to the Croatian Central Bureau of Statistics, with no sign yet of real recovery, while the corporate sector has not been initiating projects that would generate new employment.

Average monthly net earnings for the first seven months of 2011 was HRK 5,393, marking a fall of 0.3% year on year.

Privatisation of Post and Telecommunications of Kosovo J.S.C. (PTK)

As announced in early June 2011, T-HT has fulfilled the pre qualification requirements in relation to the privatisation of Post and Telecommunications of Kosovo J.S.C. (PTK) and has been confirmed as one of the Pre-Qualified Applicants.

In light of charges recently filed against certain PTK managers suspected of corruption, however, T-HT has reviewed its continued participation in the privatisation process.

According to media reports, the Government of Kosovo recently cancelled the tender process and will announce another in due course. However, T-HT has not received any official notification that this is the case.

Update on 6% fee on mobile network services

The Group released an update on 14 October 2011 on the status of the 6% fee on mobile network services imposed under the *Fee for the Provision of Mobile Electronic Communications Networks Services Act* and introduced on 1 August, 2009.

The update followed a proposal on 13 October 2011 by the Croatian Government to abolish this fee, with effect from 1 January 2012.

The Government proposes abolition of the fee under the *Act on the Termination of the Fee for the Provision of Services in Mobile Electronic Communications Networks Act*, which will go before the Croatian Parliament. At this moment there is no precise clarity on when the Parliament will approve the proposal.

The impact of the 6% tax in the nine months to 30 September 2011 was HRK 113 million (Jan-Sep 2010: HRK 124 million).

Regulatory environment

The Law on Electronic Communications, which replaced the previous Law on Telecommunications, has been in force since 1 July, 2008 and transposed the 2002 EU Regulatory Framework onto Croatia's electronic communications market.

In order to align the Croatian regulatory framework with EU framework amendments from 2009, the Croatian Parliament adopted amendments to the Law on Electronic Communications in July 2011 and this came into force in August 2011.

These amendments will increase the discretionary powers of the Croatian Post and Electronic Communications Agency (Agency, or HAKOM) with regard to regulating the electronic communications market and is expected to result in a tighter regulatory regime.

Croatian operators were given 90 days' notice to comply with the new provisions of the Law.

In April 2011, the Agency adopted decisions by which it determined that "three criteria tests" were fulfilled for two markets in terms of "Access to the fixed network and public voice markets:"

1. Publicly available local and/or national telephone services provided at a fixed location for residential customers
2. Publicly available local and/or national telephone services provided at a fixed location for non-residential customers.

Subsequently, in July 2011 the Agency adopted decisions by which it determined that "three criteria tests" were fulfilled for:

3. The retail broadband Internet access market.

This implies that the Agency considers that these markets under 1, 2 and 3 above are susceptible to *ex ante* regulatory control and thus should be analysed for the existence of significant market power (SMP). Public consultation on market analysis for markets 1 and 2 above ended on 16 June and for market 3 above ended on 12 September, 2011. The final decisions by the Agency on these market analyses and regulatory remedies are still pending.

Under a decision adopted in March 2010, the Agency determined that the "x" percentage that should be used for the purpose of calculating the Group's prices for wholesale *bitstream* access services on copper network - IP level (retail minus methodology) - should be 40%. A further price reduction in wholesale *bitstream access service* was adopted by the Agency in September 2010 (price reduction for virtual private channels for voice and IPTV services). However, in September 2011 the Agency initiated a revision of the x% level for the purpose of calculating *bitstream prices* on copper network, with a proposal to increase it to 60%. The outcome of this process is still pending.

Also, in line with the obligation imposed upon the Group by the Agency's decision on SMP designation and imposition of remedies in the wholesale broadband access market, the Company published a "reference offer for the wholesale *bitstream* access over the Group's fibre optics access network". However, in August 2011 the Agency initiated amendments to this part of the Group's reference offer. The outcome of this process is still pending.

On 6 April, 2011, the Agency finalized its analysis of the retail market regarding Access to the Public Communications Network at a Fixed Location for residential and non-residential customers and designated the Company and its subsidiary Iskon Internet as operators with SMP. The following remedies were imposed upon the Company:

- Network access and use of special network facilities (obligation to introduce naked DSL and wholesale line rental - WLR - and standalone retail access service)
- Non-discrimination
- Transparency
- Price control of retail access services (notification of retail prices 30 days in advance; prohibition from unreasonably bundling services)
- Accounting separation and cost accounting (cost accounting project, initiated at the end of 2008, is ongoing)

Price control of retail access services were imposed on Iskon Internet.

In line with these requirements, in June and July 2011 the Company published wholesale reference offers for naked BSA and wholesale line rental.

In August 2011, the Agency finalized its analysis of retail markets - Publicly available local and/or national telephone services provided at a fixed location for residential customers and non residential customers - and determined the Group and Iskon to be the SMP operators in these markets. Consequently, the following obligations were imposed upon the Group:

- retail price control (cost-orientation, price notification to the Agency 45 days prior to launch, non-discrimination)
- regulation of promotional offers (notification of promotional offers to the Agency 15 days prior to the launch, duration of promotional offers restricted to two months, promotional benefits must not apply longer than three months, promotional offers for the same service must not be repeated more than once a year)

In September 2011, the Agency finalized the procedure of the “three criteria test” for the retail broadband Internet market, and determined that this market is susceptible to *ex ante* regulation.

Consequently, on 24 October 2011, the Agency publicly announced its proposal to designate the Company and Iskon as operators with significant market power (SMP) in (i) retail broadband Internet access market and (ii) retail market for transmission of television programmes with remuneration (hereinafter: IPTV market) although the IPTV market was not defined in accordance to applicable laws, neither was it previously determined as a market susceptible to sector-specific regulation (regardless of the fact that this is a precondition according to EU rules). Public consultation on proposed regulatory remedies for retail broadband Internet access and IPTV services continues until 23 November 2011.

In October 2010, the Group was (re)designated as the universal service provider for the next five years for all universal services (except for the subscribers’ directory, which the Group can continue to provide on a commercial basis). Tariffs for universal services must be set at an “affordable level.” Other tariffs, besides those mentioned above, are subject to ex-post review and are essentially unregulated.

Accounting separation (applies only to the Company’s fixed business); cost accounting project, initiated at the end of 2008, is ongoing. In Q3 2011 the Agency started developing its own cost modelling for all regulated services.

The registration of pre-paid customers in mobile networks is now underway.

Segmental reporting

On 1 January 2010, the old operating segments T-Com and T-Mobile, serving fixed and mobile markets respectively, were replaced by a new structure based upon Residential and Business units. As of the first quarter of 2011, new segment reporting based on this customer segmentation was introduced with three separate operating segments: Residential Segment, Business Segment and Network and Support Functions.

The Residential Segment (RS) includes marketing, sales and customer services, focused on providing mobile, fixed line telecommunications and TV distribution services to residential customers.

The Business Segment (BS) includes marketing, sales and customer services, focused on providing mobile and fixed line telecommunications and systems integration services to corporate customers, small- and medium-sized businesses and the public sector. The Business Segment is also responsible for the wholesale business in both fixed and mobile services.

The Network and Support Functions (NSF) performs cross-segment management and support functions, and includes the Technology department, Procurement, Accounting, Treasury, Legal and other central functions.

Fully owned subsidiaries Iskon Internet, Combis and KDS are consolidated within the respective operating segments.

The Group reports EBITDA and primary revenues and expenses (i.e. revenues and expenses involving third parties) for its operating segments.

Depreciation is not allocated to the segments as the majority is related to the fixed and mobile network, which is part of the NSF.

Change in useful life of customer relationship

Under Group Accounting policies, revenue from connection fees should be recognized over the estimated useful life of a customer relationship. To date, the lifetime of a customer relationship in the fixed telephony segment was estimated at 10 years.

Due to changed market conditions, the period that constitutes useful life has been re-evaluated and is now calculated at three years, with effect from 1 January 2011. This change has been recognized in Q3 2011 and has had a positive impact on revenue of HRK 73 million.

Change in definition of Prepaid Subscribers

From Q1 2011, the regulator (HAKOM) amended the definition of the total prepaid subscriber base so that only SIMs showing traffic or voucher recharges in the previous 90 days should be considered as subscribers.

To date, T-HT had been using a definition of its subscriber base that included all connected SIMs in the subscriber base. For Q3 2011, T-HT has aligned the number of prepaid subscribers with the new HAKOM definition and all related KPIs. Data for comparable periods in this report are restated in line with the new definition.

Summary of key financial indicators

in HRK million	Jan-Sep 2011	Jan-Sep 2010	% of change 11/10
Revenue	6,092	6,321	-3.6%

Group financial performance

Revenues

in HRK million (IFRS)	Jan-Sep 2011	Jan-Sep 2010	% of change 11/10
Voice revenue	3,352	3,820	-12.3%
Non voice revenue	1,946	1,930	0.9%
Other service revenue	535	259	106.5%
Terminal equipment	161	179	-10.0%
Miscellaneous	98	133	-25.9%
Revenue	6,092	6,321	-3.6%

Group revenues continue to be affected by the recession and special taxation measures designed to improve Government finances. Croatia's economic recovery has been slower than expected and one of the slowest in the region.

The Group benefited from a contribution of HRK 281 million from Combis (five months contribution in Jan-Sep 2010: HRK 110 million), but total revenues fell 3.6% to HRK 6,092 million (Jan-Sep 2010: HRK 6,321 million).

Voice revenues fell by 12.3% as a result of lower voice revenues in both the Residential and Business segments, pricing pressures in both mobile and fixed markets, lower termination rates and fixed wholesale revenues.

Other service revenues rose by 106.5%, largely due to the consolidation of Combis.

Iskon contributed HRK 179 million to Group consolidated revenues (Jan-Sep 2010: HRK 142 million) due to growth in its broadband and IPTV subscriber base.

Mobile telephony revenues were again hit by the government's 6% tax on mobile services imposed in August 2009, which is deducted directly from revenue. The impact of the 6% tax in the nine months to 30 September 2011 was HRK 113 million (Jan-Sep 2010: HRK 124 million). As outlined above, the Government has proposed abolition of the fee.

Operating expenses

Total consolidated operating expenses before depreciation and amortization decreased 2.5% to HRK 3,478 million in 2011 from HRK 3,567 million in 2010. Lower operating expenses achieved mainly through the execution of a number of cost control initiatives, falling telecommunications services costs and decreased asset write downs, more than offset the consolidation of Combis' expenses for the full nine months in Jan-Sep 2011 and increased merchandise costs associated with mobile promotions.

Material expenses were up by 1% at HRK 1,645 million (Jan-Sep 2010: HRK 1,628 million). Lower telecommunications services costs were more than offset by higher merchandise costs as a result of strong mobile promotions at the beginning of the year. The change in business model/accounting

treatment of Consumer Premises Equipment (CPE) from 1 September 2010 resulted in a fall in merchandise costs in Jan-Sep 2011 of HRK 112 million (Jan-Sep 2010: HRK 14 million) which was more than offset by the consolidation of Combis expenses.

Total employee benefit expenses decreased by 1.8% to HRK 860 million in Jan-Sep 2011 from HRK 876 million in Jan-Sep 2010, despite consolidation of Combis' expenses for the full nine months of the period. The Group's (FTE) employee numbers fell to 6,066 in September 2011 from 6,251 in September 2010 mainly as a result of a continuing program to rationalize business processes and drive efficiency improvements.

Other expenses decreased by 5.2% to HRK 975 million (Jan-Sep 2010: HRK 1,028 million) primarily due to lower maintenance and advertising expenses.

Asset write-downs decreased by 46.3% to HRK 48 million (Jan-Sep 2010: HRK 89 million) after improvements made in the collection of written off receivables and in dunning procedures.

Depreciation and amortization rose by 1.7% to HRK 1,005 million (Jan-Sep 2010: HRK 988 million).

T-HT Group profitability

in HRK million	Jan-Sep 2011	Jan-Sep 2010	% of change 11/10
Revenue	6,092	6,321	-3.6%
EBITDA before exceptional items	2,799	2,858	-2.1%
EBITDA after exceptional items	2,799	2,858	-2.1%
EBIT (Operating profit)	1,794	1,870	-4.0%
Net profit after minority interest	1,483	1,484	-0.1%
EBITDA margin before exceptional items	46.0%	45.2%	0.7 p.p.
EBITDA margin after exceptional items	46.0%	45.2%	0.7 p.p.
EBIT margin	29.5%	29.6%	-0.1 p.p.
Net profit margin	24.3%	23.5%	0.9 p.p.

EBITDA decreased by 2.1% to HRK 2,799 million (Jan-Sep 2010: HRK 2,858 million). The EBITDA margin increased to 46.0% (Jan-Sep 2010: 45.2%) as EBITDA declined more slowly than revenues, as outlined above.

Operating profit (EBIT) fell 4.0% to HRK 1,794 million (Jan-Sep 2010: HRK 1,870 million).

Net profit was almost flat at HRK 1,483 million (Jan-Sep 2010: 1,484 million) as lower EBIT was offset by the absence of last year's one-off charge related to involvement in HT Mostar (Jan-Sep 2010: HRK 32 million), higher financial income and lower taxation year on year.

Balance sheet

T-HT's balance sheet remains strong, with total assets of HRK 12,532 million. At 30 September 2011, cash and cash equivalents stood at HRK 2,478 million, compared with HRK 3,282 million at 31 December. A dividend totalling HRK 1,863 million was paid in May 2011.

Cash flow

As a result of lower profitability and higher redundancy payments, net cash flow from operating activities in Jan-Sep 2011 fell 14.8% to HRK 1,894 million (Jan-Sep 2010: 2,223 million).

Capital expenditure

in HRK million	Jan-Sep 2011	Jan-Sep 2010	% of change 11/10
Business	61	36	70.3%
Residential	252	115	119.9%
Network and Support Functions	320	467	-31.4%
T-HT Group	633	617	2.6%
Capex / Revenue ratio	10.4%	9.8%	0.6 p.p.

Capital expenditure was 2.6% higher compared with the first nine months of 2010. The merger of T-HT with T-Mobile Croatia along with efforts to maximize internal synergy potential between the fixed and mobile business areas meant that several major projects were rescheduled or postponed in 2010. The shift of Consumer Premises Equipment (CPE) from OPEX to CAPEX as of 1 September 2010 also resulted in an HRK 112 million increase (Jan-Sep 2010: HRK 14 million).

The Residential Segment experienced substantially higher capital expenditure, mostly due to the change in business model/accounting treatment of network CPE and increased capital expenditure related to IT.

Business Segment capital expenditure was 70.3% higher, mainly due to increased investment in business-related IT solutions, change in business model/accounting treatment of CPE equipment as well as increased capex in Combis and Iskon.

In the absence of clarity on the issue of fiber access, the Group has continued with its modernisation of the current fixed core and aggregation network, while in the mobile network it continues to invest in radio access and core network transformation in order to improve mobile broadband access.

Analysis of segment results

Residential Segment highlights

- T-HT maintained its leading position in all three markets (mobile, fixed line and IP)
- Introduced new mobile tariffs targeting a range of customer segments
- Mobile subscribers up 3.5% (up 2.9% on Q2 2011), following change in definition of prepaid subscribers as outlined on page 7
- 538,443 ADSL mainlines, up 8.3% from Q3 2010 (flat to Q2 2011), and 317,847 TV customers, up 21.7% (up 4.6% on Q2 2011)
- Revenues down 5.0%, due largely to lower voice revenues in the mobile and fixed network and lower non voice revenue in mobile
- Contribution to EBITDA of HRK 2.248million, down 2.0%

Key operational data	Jan-Sep 2011	Jan-Sep 2010	% of change 11/10
Mobile subscribers in 000			
Number of subscribers ³⁾	2,031	1,964	3.5%
Minutes of use (MOU) per average subscriber ³⁾	100	97	3.4%
Blended ARPU (monthly average for the year in HRK) ³⁾	73	85	-13.5%
Fixed mainlines in 000			
Total mainlines ¹⁾	1,123	1,225	-8.3%
Total Traffic (mill. of minutes)	1,558	1,733	-10.1%
ARPA voice per access (monthly average for the year in HRK)	99	107	-7.4%
IP mainlines/customers in 000

TV customers ²⁾	318	261	21.7%
ADSL mainlines ARPA (monthly average for the year in HRK)	118	125	-5.9%

1) Includes POTS+FGSM+ ISDN+Payphones

2) Includes IPTV, DTH and Cable TV customers

3) In September 2011 definition of prepaid subscribers was changed in order to be aligned with HAKOM definition. According to new definition, only SIMs showing traffic or voucher recharges in the last 90 days should be considered as subscribers. Number of subscribers in 2010 and all related KPIs were restated accordingly.

In the first six weeks of 2011, T-HT launched sustained mobile acquisition and retention campaigns for new and existing customers signing 24 months contracts. The Group also introduced postpaid tariffs focusing on data and targeting young people, along with new family and broadband mobile tariffs.

After its first successful year, bonbon has more than 100,000 subscribers, with 85% of the customer base under 35 years old, establishing it as an attractive brand for young professionals.

Minutes of usage per average mobile subscriber in nine months to 30 September 2011 increased by 3.4%, compared to the same period last year.

Blended ARPU decreased by 13.5% in the period compared to the nine months to 30 September 2010, as a result of the economic environment and intense competitive pressures.

The Group also introduced bundled fixed and mobile products to boost ADSL customer acquisition.

T-HT's IPTV and DTH satellite TV services were further boosted by offers including new and exclusive sports content, pay per view and "try and buy." Subscription to the satellite TV service was boosted by the repositioning of the service in Q1 2011. Satellite TV is becoming an increasingly important element of the Group's TV product offering.

In Q2 it was decided to unbundle ADSL service for provisioned DTH customers, not using the ADSL service connected to DTH, resulting in a decline of ADSL connections in Q3.

Total fixed access mainlines at the end of September 2011 were 1,123million, down 8.3% year on year. This decline is in line with the wider trend in the telecommunications market for fixed to mobile and IP substitution. At the same time, the Group continues to ensure the competitiveness of its products through attractive promotional offers and excellent service delivery.

Fixed telephony traffic fell to 1,558 million minutes in the nine months to 30 September 2011, down 10.1% on the previous year. This market trend is indicative of the ongoing substitution of fixed traffic by mobile and IP traffic.

Fixed voice average revenue per access (ARPA) decreased 7.4% from the same period last year as a result of the overall market trends described above.

At the end of September 2011, ADSL mainlines were up 8.3% at 538,443 compared with the same period in 2010. ADSL mainline ARPA fell 5.9%.

The Group's TV subscriber base has shown further growth, with 317,847 customers at the end of September 2011, up 21.7% on the year. Subscriptions to Satellite TV, an extension of the Group's IPTV service, continue to grow.

Residential Segment financial performance

in HRK million	Jan-Sep 2011	Jan-Sep 2010	% of change 11/10
Voice revenue	1,969	2,256	-12.7%
Non voice revenue	1,117	1,053	6.1%
Other service revenue	113	45	152.9%
Terminal equipment	115	135	-15.1%
Miscellaneous	13	13	0.0%
Total revenues	3,327	3,502	-5.0%
Operating expenses	1,079	1,208	-10.7%
Contribution to EBITDA before exceptionals	2,248	2,294	-2.0%

In the nine months to 30 September 2011, total residential revenues fell to HRK 3,327 million, down 5% year on year. The decline was due to lower voice revenues in the mobile and fixed network along with lower non voice revenues in mobile.

This decline is largely due to the delayed economic recovery, regulatory measures and an intensely competitive market.

Voice revenues

A fall in retail mobile voice revenues in the nine months to 30 September 2011 from the same period in 2010 was driven by a highly competitive market, with prices showing a consistently decreasing trend in the face of a tough economic environment. In addition, voice mobile termination revenues were lower following reductions in termination rates.

Mobile minutes of use (MOU) per average subscriber rose by 3.4%, however, demonstrating that the revenue decline resulted from lower average revenue per usage, owing to the factors mentioned above.

Fixed telephony revenues in the nine months to 30 September 2011 were lower year on year owing to the continuation of fixed to mobile substitution as well as regulatory measures (including the regulation of WLR and naked ADSL). This resulted in an 8.3% fall in the number of mainlines and a 10.1% decrease in minutes of use. As a result of lower minutes spent and downward pricing pressure, voice ARPA declined by 7.4%.

Non voice revenues

In the first nine months to 30 September 2011, non voice revenues rose 6.1% over the previous year as a result of higher revenues from fixed services, whilst mobile revenues slipped slightly.

The mobile business has seen a notable redistribution of non voice revenues, with higher data revenues, supported by competitively priced packages and the increased availability of smart phones. This underscores the shift toward usage of data transmission services by the average mobile customer and away from voice and SMS.

Higher fixed non voice (IP) revenues achieved at the end of September 2011 in comparison with the same period last year were a result of an 8.3% increase in ADSL mainlines and 21.7% rise in TV subscribers. Marketing initiatives and promotional offers caused ADSL ARPA to slip 5.9% in the period, however.

Other service revenues

Other service revenues were HRK 68 million higher as a result of different tariff structures for mobile.

Terminal equipment

Revenues from terminal equipment fell 15.1% in the nine months to 30 September 2011 to HRK 115 million compared with the previous year. This was due to decreased sales of handsets and different treatment of CPE equipment compared to last year.

Contribution to EBITDA

In the nine months to 30 September 2011, the contribution to EBITDA was HRK 2,248 million, down 2.0% compared with the same period last year.

Business Segment highlights

- Stable customer base across all segments and products/tariffs
- Mobile subscribers up 5.6% (up 1.1% on Q2 2011)
- 109,342 ADSL mainlines up 6.0% (up 0.9% on Q2 2011) and 18,919 TV customers, up 17.0% (up 2.6% on Q2 2011)
- Revenues down 1.9%
 - IP and ICT revenues showing further growth with new ICT services launched
- Maintained position as major wholesale provider
- Contribution to EBITDA of HRK 1,731 million, down 9.8%

Key operational data	Jan-Sep 2011	Jan-Sep 2010	% of change 11/10
Mobile customers in 000			
Number of subscribers	454	430	5.6%

Minutes of use (MOU) per average subscriber	288	301	-4.2%
Blended ARPU (monthly average for the year in HRK)	184	204	-9.6%
Fixed mainlines in 000			
Total mainlines ¹⁾	199	219	-9.2%
Total Traffic (mill. of minutes)	538	654	-17.7%

NP (Number portability) users/number	535	399	34.1%
ULL (Unbundled Local Loop)	144	130	11.1%
WLR (Wholesale Line Rental) ²⁾	78	0	-

1) Includes POTS+FGSM+ ISDN+Payphones

2) On 1 July 2011 T-HT published new WLR (Wholesale Line Rental) offer in line with HAKOM regulation

Mobile business customers rose 5.6 % at the end of September 2011 due to a mobile acquisition and retention marketing campaigns at the start of the year and new tariffs introduced in March to suit customers' varying needs: e.g. occasional Internet users, heavy Internet users. T-HT also introduced tariffs specifically targeting SMEs.

Minutes of use per subscriber slipped 4.2%, however, and ARPA fell 9.6%, due to the impact of the economic downturn.

Fixed line customer mainlines fell 9.2% year on year in the nine months to 30 September to 198,622. This fall is in line with the wider trend of fixed to mobile and IP substitution in the telecommunications market.

Fixed telephony business minutes totalled 538 million minutes in nine months to 30 September 2011, down 17.7% on the same period last year. Fixed voice ARPA decreased 11.0% on the year to HRK 238, as result of lower usage.

The ADSL subscriber base is showing continued growth as a result of attractive retention and acquisition promotions. ADSL mainlines in the nine month period rose 6.0% over the previous year to 109,342 whilst ADSL ARPA fell 3.9% to HRK 133.

Subscribers to TV services grew 17.0% to 18,919 over the previous year as result of continuous service enhancements and offers on program packages to both new and existing subscribers. The Group launched a hotel TV service in March.

The VPN customer base rose 8.5%. T-HT constantly promotes the migration of existing traditional data customers to IP based products.

The number of data lines fell 7.2% in the nine months to 30 September 2011 compared with the previous year. Whilst traditional data lines are falling, however, uptake of new Metro Ethernet services continues to increase.

In Q3 2011, tportal.hr became the Number Two web portal in Croatia by reach, with more than 800,000 unique visitors per month according to Gemius, an independent Internet traffic research agency.

The consolidation of Croatia's telecommunications market continues. The most significant recent development was the acquisition by VIPNet of cable operator B.Net. This move will intensify competition in the national wholesale and retail data market.

With Croatia in the final stages of accession to the European Union, there is pressure from EU-based operators to increase discounts on roaming to levels close to EU benchmarks.

Business Segment financial performance

in HRK million	Jan-Sep 2011	Jan-Sep 2010	% of change 11/10
Voice revenue	1,383	1,565	-11.6%
Non voice revenue	829	876	-5.4%
Other service revenue	422	214	96.8%
Terminal equipment	46	44	6.1%
Miscellaneous	85	120	-28.8%
Total revenues	2,765	2,819	-1.9%

Operating expenses	1,034	899	15.0%
Contribution to EBITDA before exceptionals	1,731	1,919	-9.8%

Revenues

Voice revenues

Voice revenues fell 11.6% to HRK 1,383 million (Jan-Sept 2010: HRK 1,565 million) mainly driven by continued economic downturn, competitive pressure on pricing and a 9.2% decline in total fixed mainlines with 17.7% fall in total fixed minutes .

Wholesale fixed voice revenues fell 13.8% due to regulatory intervention in the form of lower IC prices as of 1 January 2011. In addition, voice services revenues from international operators fell 5.8% compared with the previous year, primarily as result of lower traffic.

Downward pressure on mobile voice revenues continued, with a fall in retail mobile voice revenues driven by lower voice ARPU. This was partially offset by an increase in subscribers. In addition, voice mobile termination revenues were lower following reductions in termination rates.

Non voice revenues

Non voice revenues fell 5.4% to HRK 829 million in the nine months to 30 September 2011, due primarily to declines in retail and wholesale fixed non voice revenues.

The decline in fixed retail was driven by lower revenues from traditional data, partially offset by higher IP revenues.

Non voice fixed wholesale revenues were lower on a decline in revenues from national leased lines, migration to new commercial models and a decrease in capacity. Revenues from national IP services slipped on a fall in dial-up traffic. Interconnection leased line revenues also showed a decrease.

Other service revenues

Other service revenues increased 96.8% to HRK 422 million (Jan-Sept 2010: HRK 214million) on growth in ICT-related revenues following the acquisition of Combis (consolidated as of May 2010).

Terminal equipment

Revenues from terminal equipment rose 6.1% to HRK 46 million. Fixed terminal equipment revenues decreased slightly but this was offset by higher revenue from mobile terminal equipment following promotional activities at the beginning of 2011.

Miscellaneous revenues

Miscellaneous revenues fell 28.8% to HRK 85 million. The fall was primarily driven by lower mobile revenue, as disconnection fee revenue became part of service revenue as of the start of 2011. Mobile wholesale miscellaneous revenues also decreased due to lower national roaming (NR) prices and lower usage.

Contribution to EBITDA

The Business Segment's contribution to EBITDA in the nine months to 30 September 2011 fell 9.8% compared with the previous year to HRK 1,731 million.

Network and support functions financial performance

in HRK million	Jan-Sep 2011	Jan-Sep 2010	% of change <i>11/10</i>
Other Operating income	185	104	78.1%
Operating expenses	1,365	1,459	-6.5%
Contribution to EBITDA before exceptionals	-1,180	-1,355	-12.9%

In the Network and support functions, a 78.1% increase in Other operating income resulted from the one-off impact of a reversal of provisions and increased revenue from dunning letters. Operating expenses were 6.5% lower compared with the previous year due to lower maintenance expenses and service costs. Overall this resulted in a lower negative contribution to EBITDA for the nine months to 30 September 2011 of -HRK 1.180 million (Jan-Sept 2010: -HRK 1,355 million).

Network and Service Platforms

Network and Service Platforms are T-HT's core infrastructure and as such are continuously upgraded and improved in line with Group strategy. With the consolidation of T-HT's business operations, the Group started to converge the functionalities of its resources in both fixed and mobile networks on joint service platforms, thus achieving improved service availability and greater cost efficiencies. In the nine months to 30 September 2011, T-HT has been working on the further development of its network infrastructure, increasing broadband access capacity and establishing a common, fixed and mobile, transport and core network.

In fixed networks, T-HT has adopted a strategy of providing all services via one common broadband port, triggering the transformation of its access network by the construction of a new optical access network, including an optical access platform (GPON) and modernization of the copper access network. Furthermore, the Group continues functional upgrades of the existing PSTN network to enable VoIP telephony provision on broadband.

In mobile networks, continuous radio access and core network transformation will support the development and rapid implementation of new, economically optimized technologies (e.g. HSPA, LTE), while taking into account maximum utilization of existing infrastructure and frequency resources. Mobile BroadBand (MBB) access was strongly in the focus of development, through existing and newly deployed technologies such as UMTS900, in order to improve data services coverage. Expansion of network by building of new infrastructural points is continued, along with capacity expansion to support strong data traffic increase.

T-HT Group Third Quarter 2011 Report

Summary of key financial indicators

in HRK million (IFRS)	Jul-Sep 2011	Jul-Sep 2010	% of change 11/10
Voice revenue	1,222	1,377	-11.3%
Non voice revenue	695	686	1.3%
Other service revenue	214	110	94.4%
Terminal equipment	48	58	-16.4%
Miscellaneous	30	46	-35.6%
Revenues	2,209	2,278	-3.0%
EBITDA before exceptional items	1,132	1,137	-0.5%
EBITDA after exceptional items	1,132	1,137	-0.5%
EBIT	791	814	-2.9%
Net profit	655	662	-1.2%

In the third quarter of 2011, revenues declined 3.0%, due primarily to a 11.3% fall in Voice revenues. This was the result of a tough economic environment, a consistent decline in prices (including interconnection prices) and intense competitive pressure. Non voice revenues rose by 1.3%, due largely to an increase in residential fixed non voice revenues (connected with ADSL and IPTV services) and higher mobile non voice usage. Both, Voice and Non voice were supported by the change in revenue recognition outlined above, due to the amended definition of useful life of a customer relationship.

Other service revenues rose 94.4% due to an improved contribution from Combis and the implementation of different tariff structures in mobile. Following a decrease in operating expenses, EBITDA fell 0.5% while larger depreciation expenses caused EBIT to decrease 2.9%. Net profit fell 1.2%.

Risk management

As well as the business and regulatory developments outlined in this statement, the Group also reports the following changes to its risk profile in the period under review.

The Group understands that the Agency has filed two indictments to the Misdemeanour Court against the Company over infringements of the Electronic Communications Act, proposing that the Company should be fined 3% of its annual gross revenues in each of these two proceedings due to the Company's alleged breach of regulatory obligations proscribed by the decision of the Agency Council dated 6 April 2011 upon which the Company is obligated to offer alternative operators wholesale line rental service as of 1 July 2011. These indictments have not yet been officially delivered to the Company. When and if such misdemeanour charges are received, the Company will present its defence before the Misdemeanour Court.

Croatian Competition Agency (CCA) has initiated proceedings against all three mobile operators (including the Company) for the alleged agreement on concerted practice prohibited by the Competition Act since all three mobile operators changed billing units in their tariff plans on 1 October 2009 from 15 seconds to 60 seconds. The CCA considers the change of billing units to be an agreement on a price increase. The Company received the CCA's decision on official initiation of the procedure on 21 September 2011. In these proceedings, the CCA will examine the existence of such agreement among the above-mentioned operators and whether as such it constitutes concerted practice as prohibited under Article 8 of the Competition Act (OJ 79/09).

Group 2011 outlook

Revenue

As stated in the Q1 results on 28 April 2011, the Group's performance for the current financial year is influenced by the strength of the tourist season in Croatia and recovery in the national economy. The economic turnaround that had been predicted earlier this year has not materialized, while unemployment remains high and the amount of overdue payments has reached record levels. At the same time, the government's 6% tax on mobile services, originally imposed in 2009, has not been removed, whilst the recent introduction of regulations governing wholesale line rental and naked DSL will further impact the Group's business.

The Group continues to maintain its focus on exploiting new growth opportunities and maximising existing ones. However, given the tough economic conditions and accelerated regulatory pressures the Group expects 2011 revenue to be moderately lower than the 2010 level.

EBITDA before exceptional items

In light of continued challenging economic conditions in Croatia, regulatory impact and consequently lower expectations for revenue, the Group expects 2011 EBITDA close to the 2010 level. However, the Group is committed to maintaining the year-on-year EBITDA margin through efficiencies gained so far and continuing strong cost controls.

CAPEX

While the current regulatory regime remains a disincentive to T-HT's potential investment in fiber infrastructure, the Group expects 2011 capital expenditure to be lower than 2010. However, T-HT will continue to invest in modernizing the network and IT systems, as well as in mobile capacity.

Regional Expansion

The Group continues to monitor and evaluate expansion opportunities to increase shareholder value.

Notes to the condensed consolidated financial statements For the nine months ended on 30 September 2011

Basis of preparation

The condensed consolidated financial statements as of 30 September 2011 and for the nine months then ended, have been prepared using accounting policies consistent with International Financial Reporting Standards.

Significant Accounting Policies

The consolidated financial statements have been prepared under the historical cost convention, except for investments available-for-sale stated at fair value.

The same accounting policies, presentation and methods of computation are followed in these condensed consolidated financial statements as were applied in the preparation of HT's consolidated financial statements for the year ended 31 December 2010.

Dividends

Dividend in the amount of HRK 1,864 million (HRK 22,76 per share) was paid to the shareholders on 23 May 2011.

Segment information

On 1 January 2010, the old divisions of T-Com and T-Mobile, serving fixed and mobile markets respectively, were replaced by a new structure based upon Residential and Business segments. Starting from first quarter of 2011, new segment reporting following this structure is introduced.

The group's operating segments are Residential Segment, Business Segment and Network and Support function segment.

The Residential Segment (RS) includes marketing, sales and customer care activities, focused on providing mobile, fixed line telecommunications and TV distribution services to residential customers.

The Business Segment (BS) includes marketing, sales and customer care activities, focused on providing mobile and fixed line telecommunications, system integration services to corporate customers, small and medium business, and public sector. Also BS is responsible for wholesale business for both, fixed and mobile services.

The Network and Support Functions (NSF) performs cross-segment management and support functions, including Technology department, Procurement, Accounting, Treasury, Legal and other central functions.

Business segments

Relations with the governing company and its affiliated companies

In the first nine months of 2011 there were no transactions among related parties with a significant impact on the financial position and operations of the Group in the given period.

In the first nine months of 2011 there were no changes in transactions among related parties which were specified in the annual financial report for 2010 and which had a significant impact on the financial position and operations of the Group in the first nine months of 2011.

Business relations transacted between HT d.d. and affiliated companies thereof (hereinafter referred to as: Group) in the first nine months of 2011 and the governing company and affiliated companies thereof can be classified as follows:

Transactions with related companies

Transactions with related companies primarily relate to the transactions with the companies owned by Deutsche Telekom AG (hereinafter referred to as: DTAG). The Group enters into transactions in the normal course of business on an arm's length basis. These transactions included the sending and receiving of international traffic to/from these companies.

In the first nine months of 2011 the Group generated total revenue from related companies from international traffic to the amount of HRK 115 million (the first nine months of 2010: HRK 131 million), while total costs of international traffic amounted to HRK 72 million (the first nine months of 2010: HRK 95 million).

DTAG companies provided intellectual services to the Group in the amount of HRK 7 million in the first nine months of 2011 (the first nine months of 2010: HRK 8 million).

Compensation of the Supervisory Board

The chairman of the Supervisory Board receives remuneration in the amount of 1.5 of the average net salary of the employees of the Company paid in the preceding month. To the deputy chairman, the amount of 1.25 of the average net salary of the employees of the Company paid in the preceding month is paid, while any other member receives the amount of one average net salary of the employees of the Company paid in the preceding month. To a member of the Supervisory Board who is in the same time the Chairman of the Audit Committee of the Supervisory Board in the amount of 1.5 of the average monthly net salary of the employees of the company paid in the preceding month. To a member of the Supervisory Board who is in the same time a Member of the Audit Committee of the Supervisory Board in the amount of 1.25 of the average monthly net salary of the employees of the company paid in the preceding month. To a member of the Supervisory Board who is in the same time a Member of the Compensation and Nomination Committee of the Supervisory Board in the amount of 1.25 of the average monthly net salary of the employees of the company paid in the preceding month. DTAG representatives do not receive any remuneration for the membership in the Supervisory Board due to a respective policy of DTAG.

In the first nine months of 2011, the Company paid a total amount of HRK 0.5 million (the first nine months of 2010: HRK 0.5 million) to the Members of its Supervisory Board. No loans were granted to the Members of the Supervisory Board.

Compensation to key management personnel

In the first nine months of 2011 the total compensation paid to key management personnel of the Group amounted to HRK 35 million (first nine months of 2010: HRK 28 million Compensation paid to key management personnel relates to short-term employee benefits. Key management personnel include members of the Management Boards of the Company and its subsidiaries and the operating directors of the Company, who are employed by the Group.

Notes to the condensed financial statements For period ended 30 September 2011

Basis of preparation

The condensed financial statements of 30 September 2011 and for the nine months then ended, have been prepared using accounting policies consistent with International Financial Reporting Standards.

Significant Accounting Policies

The financial statements have been prepared under the historical cost convention, except for investments available-for-sale stated at fair value.

The same accounting policies, presentation and methods of computation are followed in these condensed financial statements as were applied in the preparation of the Company's financial statements for the year ended 31 December 2010.

Dividends

Dividend in the amount of HRK 1,864 million (HRK 22,76 per share) was paid to the shareholders on 23 May 2011.

Segment information

On 1 January 2010, the old divisions of T-Com and T-Mobile, serving fixed and mobile markets respectively, were replaced by a new structure based upon Residential and Business segments. Starting from first quarter of 2011, new segment reporting following this structure is introduced.

The Company's operating segments are Residential Segment, Business Segment and Network and Support functions.

The Residential Segment includes marketing, sales and customer care activities, focused on providing mobile, fixed line telecommunications and TV distribution services to residential customers.

The Business Segment includes marketing, sales and customer care activities, focused on providing mobile and fixed line telecommunications to corporate customers, small and medium business, and public sector. Also Business Segment is responsible for wholesale business for both, fixed and mobile services.

The Network and Support functions perform cross-segment management and support functions, including Technology department, Procurement, Accounting, Treasury, Legal and other central functions.

Business segments

The following tables present revenue and profit of HT's business segments:

Relations with the governing company and its affiliated companies

In the first nine months of 2011 there were no transactions among related parties with a significant impact on the financial position and operations of the Company in the given period.

In the first nine months of 2011 there were no changes in transactions among related parties which were specified in the annual financial report for 2010 and which had a significant impact on the financial position and operations of the Company in the first nine months of 2011.

Business relations transacted between HT d.d. in the first nine months of 2011 and the governing company and affiliated companies thereof can be classified as follows:

Transactions with related companies

Transactions with related companies primarily relate to the transactions with the companies owned by Deutsche Telekom AG (hereinafter referred to as: DTAG). The Company enters into transactions in the normal course of business on an arm's length basis. These transactions included the sending and receiving of international traffic to/from these companies.

In the first nine months of 2011 the Company generated total revenue from related companies from international traffic to the amount of HRK 115 million (the nine months of 2010: HRK 131 million), while total costs of international traffic amounted to HRK 72 million (the first nine months of 2010: HRK 95 million).

DTAG companies provided intellectual services to the Company in the amount of HRK 7 million in the first nine months of 2011 (the first nine months of 2010: HRK 8 million).

Compensation of the Supervisory Board

The chairman of the Supervisory Board receives remuneration in the amount of 1.5 of the average net salary of the employees of the Company paid in the preceding month. To the deputy chairman, the amount of 1.25 of the average net salary of the employees of the Company paid in the preceding month is paid, while any other member receives the amount of one average net salary of the employees of the Company paid in the preceding month. To a member of the Supervisory Board who is in the same time the Chairman of the Audit Committee of the Supervisory Board in the amount of 1.5 of the average monthly net salary of the employees of the company paid in the preceding month. To a member of the Supervisory Board who is in the same time a Member of the Audit Committee of the Supervisory Board in the amount of 1.25 of the average monthly net salary of the employees of the company paid in the preceding month. To a member of the Supervisory Board who is in the same time a Member of the Compensation and Nomination Committee of the Supervisory Board in the amount of 1.25 of the average monthly net salary of the employees of the company paid in the preceding month. DTAG representatives do not receive any remuneration for the membership in the Supervisory Board due to a respective policy of DTAG.

In the first nine months of 2011, the Company paid a total amount of HRK 0.5 million (the first nine months of 2010: HRK 0.5 million) to the Members of its Supervisory Board. No loans were granted to the Members of the Supervisory Board.

Compensation to key management personnel

In the first nine months of 2011 the total compensation paid to key management personnel of the Company amounted to HRK 26 million (first nine months of 2010: HRK 28 million Compensation paid to key management personnel relates to short-term employee benefits. Key management personnel include members of the Management Boards of the Company and the operating directors of the Company, who are employed by the Company.

Statement of the Management Board of Hrvatski Telekom d.d.

To the best of our knowledge, unaudited financial statements of the company Hrvatski Telekom d.d. (hereinafter: "Company") and unaudited consolidated financial statements of the Company and affiliated companies thereof (hereinafter: "Group"), which are prepared in accordance with International Financial Reporting Standards (IFRS), give a true and fair view of assets and obligations, profit and loss, financial position, and operations of both the Company and the Group. The management report for the first nine months to 30 September 2011 contains a true presentation of development and results of operations and position of the Group, with description of significant risks and uncertainties for the Group as a whole.

Mr. Ivica Mudrinić, President of the Management Board

Mr. Dino Dogan, Member of the Management Board and Chief Financial Officer

Mr. Johan Busé, Member of the Management Board and Chief Operating Officer Residential

Ms. Irena Jolić Šimović, Member of the Management Board and Chief Operating Officer Business

Mr. Božidar Poldrugač, Member of the Management Board and Chief Technical Officer and Chief Information Officer

Ms. Branka Skaramuča, Member of the Management Board and Chief Human Resources Officer

Zagreb, 28 October 2011
