CONTRACT ON RECONSTRUCTION OF CROATIAN TELECOM FACILITY AND EQUIPPING OF NEW DATA CENTRE EXECUTED

KONČAR and Croatian Telecom (HT) have executed the Contract on Reconstruction of the Existing HT Facility at 122, Selska Street, Zagreb and its equipping for a new data centre.

Today, Ivica Mudrinić, the president of the Managing Board and the Chief Executive Officer of Croatian Telekom, and Dranko Bago, the president of KONČAR Managing Bored have signed the Contract worth more than HRK 60 million in KONČAR Business Skyscraper.

The Project is aimed at extension of HT infrastructure enabling installation of platforms for providing of new services to end users in the Croatian market, with a special emphasis on ICT services. The new data centre will completely comply with Tier 3 category.

KONČAR will completely solve data centre energy infrastructure issues delivering new electric energy equipment (a transformer substation and a generating set, middle voltage and low voltage switchgear) and mechanical equipment (heating, cooling and air conditioning systems). Rehabilitation will also comprise all auxiliary systems. In addition to KONČAR – Power Plant and Electric Traction Engineering (KET), the Project Holder, five other KONČAR Group Companies participate in the Project. The total net surface for placement of technological equipment amounts to 1000 m². The total planned duration of works is 16 months for the complete facility, while the first phase covering 450 m² will be finished in 11-month-time period.

KONČAR – ELECTRICAL INDUSTRY Inc.
