Ammonia plant stoppage

According to the Capital Market Act and the Rules of the Zagreb Stock Exchange, the Board of Petrokemija d.d. has issued the following notice:

The ammonia plant has been temporarily shut down since Tuesday morning due to a technical failure. The plant is expected to resume operation following the technical fault assessment and repair. Other mineral fertilizer production plants are in operation in accordance with the plan.

The temporary stoppage of ammonia production will not negatively affect the end-consumers in agriculture since Petrokemija has provided sufficient reserves to supply the domestic and regional markets with all types of mineral fertilizers until the resumption of ammonia production.
