Notice pursuant to the Capital Market Act

Production resumed

In accordance with the Capital Market and Rules of the Zagreb Stock Exchange, Petrokemija, Plc. has released the following announcement:

The operation of the Urea Production Plant had been suspended due to a malfunction of the scrubber and carbamates pumps. Due to the complexity of the technical analysis of the equipment damage and subsequent repair, it had been necessary to suspend the Ammonia Plant operation, as we already informed the public.

However, the repair of the failure at the Urea Production Plant was carried out very quickly and the production at the Plant is expected to restart later today. The technical conditions and safety of the plant are satisfactory, so at this point the shutdown of Ammonia Plant is not necessary.
