One millionth ton shipped and membership in the European Fertilizer Manufacturers Association

On 21 November 2012, Petrokemija, Plc. Kutina shipped its millionth ton of fertilizers to the markets.

Very severe weather and economic conditions during the year - winter storms during the preparation of the spring season and drought in the second half of the year with the difficult economic conditions have resulted in the present market situation of agriculture in the region. With great efforts Petrokemija is making up for the lost volumes during these adverse circumstances and trying to catch up with planned objectives.

Further to the contacts started early this year with European Fertilizer Manufacturers Association based in Brussels, Belgium, Petrokemija received their proposal and request for formal acceptance into membership of the Association.

Accordingly, Petrokemija submitted its official application for its membership in the Association, which will be considered in mid-December 2012 in Madrid. The Company is expected to become an official member in January 2013.
