Introduction of Energy Management System

Petrokemija, Plc. has been audited for certification against ISO50001: 2011 Standard, Energy Management System, by Lloyd's Register. Petrokemija is the second Croatian company to introduce this certification for Energy Management System.

The ISO50001: 2011 Standard assists organizations in establishing the systems and procedures necessary to improve energy efficiency, which should lead to a reduction in energy costs and reduction of greenhouse gas emissions. The Standard specifies requirements for Energy Management System, which enables organizations to develop and implement policies and objectives that take into account legal requirements and information about significant energy aspects.

Obtaining this certification is a major step forward for Petrokemija, because it is only through energy savings that the Company can advance and be competitive with other fertilizer manufacturers. In this way, another aim defined by the Company business policy will be achieved.
