Information on production status of Petrokemija, Plc. facilities after overhaul

The facilities of Petrokemija Plc. Kutina were successfully overhauled in January and all plants were successfully started-up as planned. Repair works were carried out with minimum investment and maximum engagement of own workforce.

At some plants, repair works were done successively, so they resumed production after they had been completed.

This ensured sufficient volumes of all grades of mineral fertilizers to supply the domestic market and markets in the region for the top dressing of winter crops and spring sowing in the upcoming agricultural season.
