listed on the Official Market of the Zagreb Stock Exchange
Notice pursuant to the Capital Market Act

Ammonia plant stoppage

In line with the Rules of the Zagreb Stock Exchange, Petrokemija, d.d. announces as follows:

On September 11, 2018. at 07.35 PM, a failure occurred at the Kutina I transceiver station owned by the Transmission System Operator Plinacro d.o.o., which resulted in a sudden stoppage of Ammonia and Urea production facilities.

After repeated attempts to establish and normalize the operation of the plant due to failure in the Plinacro gas supply system, a failure was reported on the Ammonia plant, which would result in a delay in the operation of ammonia and urea plants.

The plant is expected to resume operation next week. Other mineral fertilizer production plants are in operation in accordance with the plan.

The company has provided sufficient quantities of mineral fertilizers for Croatian and other markets.
